# Understanding customer needs to deliver the best solutions

Our success is built on the success of our customers. The approach to product development and the unrivalled quality and versatility of our integrated solutions means we are able to react quickly to customer needs.

Daikin's International Key Account Team demonstrates our commitment to customers. By partnering with our most important clients, we can fully understand what their challenges are and ensure efficient, transparent, flexible and seamless advice and support across Europe.

We aim to apply this philosophy in our dealings with all our customers, from large businesses to individual households, to allow us to provide energy-efficient solutions to improve comfort, reduce costs and lower environmental impact.

The EMEA Development Center (EDC) is pivotal, developing innovative, energy-efficient solutions, designed and manufactured in Europe, specifically for the European market. Following on from the launch of the fully flat cassette in 2013, the second indoor unit designed specifically for Europe after Daikin Emura, the EDC is continuing to develop new products and technologies to meet, and often exceed, the changing demands of businesses and homeowners. Another example is the Daikin Altherma hybrid heat pump, combining over 30 years of heat pump experience with gas condensing technology, this as an answer to the growing demand to replace heating systems, especially replacing of gas boilers.

As the world's leading manufacturer of climate control solutions, protecting the environment is Daikin's priority. We take a leading role in the development of both innovative products and demonstrate best environmental practice in everything we do.

We are determined to deliver on our commitments to understanding customer needs, creating innovative products and maintaining our responsibility to the environment. We believe this is critical to the future growth and success of both Daikin and everyone we work with.

**Wim Vangeenberghé**

**Jan Cluyse**  
Deputy General manager  
EMEA Development Center

# BENEFITS

## WE CARE ICONS

### Seasonal efficiency, smart use of energy

Seasonal efficiency gives a more realistic indication on how efficient air conditioners operate over an entire heating or cooling season.

### Auto-cleaning filter

The filter automatically cleans itself once per day. Simplicity of upkeep means optimum energy efficiency and maximum comfort without the need for expensive or time-consuming maintenance.

### Inverter technology

In combination with inverter controlled outdoor units

### 2 area intelligent eye

Air flow is sent to a zone other than where the person is located at that moment. If no people are detected, the unit will automatically switch over to the energy-efficient setting.

### Energy saving during operation standby

Current consumption is reduced by about 80 % when operating on standby. If no people are detected for more than 20 minutes, the system will automatically switch to the current-saving mode.

### Night set mode

Saves energy, by preventing overcooling or overheating during night time.

### Econo mode

This function decreases the power consumption so that other appliances that need large power consumption can be used. This function is also energy saving.

### Movement sensor

The sensor detects whether someone is in the room. When the room is empty, the unit switches to economy mode after 20 minutes and restarts when a person enters the room.

### Home leave operation

During absence, the indoor temperature can be maintained at a certain level.

### Fan only

The air conditioner can be used as fan, blowing air without cooling or heating.

### Free cooling

By exploiting the low external air temperatures to cool the water, free cooling reduces the load on the compressors and decreases considerably the annual operating costs during the cold season.

### Floor & presence sensor

The presence sensor directs the air away from any person detected in the room, when the air flow control is on. The floor sensor detects the average floor temperature and ensures an even temperature distribution between ceiling and floor

## COMFORT

### Comfort mode

The new flap changes the discharge angle horizontally for cooling operation and downward vertically for heating operation. This in order to prevent cold or warm air from blowing directly on the body.

### Powerful mode

If the temperature in the room is too high/low, it can be cooled down/heated quickly by selecting the 'powerful mode'. After the powerful mode is turned off, the unit returns to the preset mode.

### Whisper quiet

Daikin indoor units are whisper quiet. Also the outdoor units are guaranteed not to disturb the quiet of the neighbourhood.

### Outdoor unit silent operation

Lowers the operation sound of the outdoor unit by 3dB(A) to ensure a quiet environment for the neighbourhood.

### Comfortable sleeping mode

Increased comfort function that follows a specific temperature fluctuation rhythm.

### Draught prevention

When starting to warm up or when the thermostat is off, the air discharge direction is set horizontally and the fan to low speed, to prevent draught. After warming up, air discharge and fan speed are set as desired.

### Auto cooling-heating changeover

Automatically selects cooling or heating mode to achieve the set temperature (heat pump types only).

### Indoor unit silent operation

Lowers the operation sound of the indoor unit by 3dB(A). This function is useful when studying or sleeping.

### Night quiet mode (cooling only)

Lowers the operation sound of the outdoor unit automatically by 3dB(A) by removing a jumper wire on the outdoor unit. This function can be deactivated if the jumper wire is reinstalled on the outdoor unit.

### Radiant heat

The front panel of the indoor unit radiates additional heat to add to your comfort on cold days

## AIR FLOW

### Ceiling soiling prevention

A special function prevents air blowing out too long in horizontal position, to prevent ceiling stains.

### Vertical auto swing

Possibility to select automatic vertical moving of the air discharge louvre, for uniform air flow and temperature distribution.

### Auto fan speed

Automatically selects the necessary fan speed to reach or maintain the set temperature.

### Individual flap control

Flexible installation thanks to the possibility of easily closing one flap via the wired remote controller, to suit any new room configuration. Optional closure kits are available as well.

### 3-D Air flow

This function combines Vertical and Horizontal auto-swing to circulate a stream of cool/warm air right to the corners of even large spaces.

### Horizontal auto swing

Possibility to select automatic horizontal moving of the air discharge louvre, for uniform air flow and temperature distribution.

### Fan speed steps

Allows to select up to the given number of fan speed.

# BENEFITS

## HUMIDITY CONTROL

### Ururu - humidification

Moisture is absorbed from the outdoor air and evenly distributed throughout the indoor areas.

### Sarara - dehumidification

Reduces indoor humidity, without affecting the room temperature, by mixing cool, dry air with warm air.

### Dry programme

Allows humidity levels to be reduced without variations in room temperature.

## AIR TREATMENT

### Flash streamer

The Flash Streamer generates high-speed electrons that powerfully break down odours and formaldehyde

### Titanium photocatalytic air purification filter

Removes airborne dust particles, decomposes odours and restrains the reproduction of bacteria, viruses, microbes, this to ensure a steady supply of clean air

### Photocatalytic deodorising filter

Removes airborne dust particles, decomposes odours and restrains the reproduction of bacteria, viruses, microbes, this to ensure a steady supply of clean air.

### Air filter

Removes airborne dust particles to ensure a steady supply of clean air.

## REMOTE CONTROL & TIMER

### Weekly timer

Timer can be set to start heating or cooling anytime on a daily or weekly basis

### 24 Hour timer

Timer can be set to start cooling/heating anytime during a 24-hour period.

### Timer

Allows to preset the air conditioner to start/stop at a specified time.

### Infrared remote control

Infrared remote control with LCD to start, stop and regulate the air conditioner from a distance.

### Wired remote control

Wired remote control to start, stop and regulate the air conditioner from a distance.

### Centralised control

Centralised control to start, stop and regulate several air conditioners from one central point.

### Online controller

Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen

## OTHER FUNCTIONS

### Auto-restart

The unit restarts automatically at the original settings after power failure.

### Self-diagnosis

Simplifies maintenance by indicating system faults or operating anomalies.

### Twin/triple/double twin application

2, 3 or 4 indoor units can be connected to only 1 outdoor unit even if they have different capacities. All indoor units operate within the same mode (cooling or heating) from one remote control.

### Multi model application

Up to 5 indoor units (even different capacities) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.

### VRV for residential application

Up to 9 indoor units (even different capacities and up to 71 class) can be connected to a single outdoor unit. All indoor units can individually be operated within the same mode.

### Drain pump kit

Facilitates condensation draining from the indoor unit.

### Multi tenant

The indoor unit's main power supply can be turned off when leaving the hotel or office building.

# New products 2014

21

## DAIKIN ALTHERMA HYBRID HEAT PUMP

- > Low running costs for heating and domestic hot water
- > Low investment cost
- > Provides sufficient heat in renovation applications
- > Easy and fast installation

24

## DAIKIN ALTHERMA GROUND SOURCE HEAT PUMP

- > Highest seasonal efficiency thanks to our inverter heat pump technology
- > Quick and easy installation including a domestic hot water tank
- > Compact indoor unit with pleasing design
- > New user interface

44

## DAIKIN ALTHERMA LOW TEMPERATURE - INTEGRATED SOLAR UNIT

- > Solar support of domestic hot water with unpressurised (drain-back) and pressurised solar system
- > Lightweight plastic tank
- > Bivalent option: combinable with a secondary heat source
- > App control possible

82

## URURU SARARA - FTXZ-N

- > Top SEER and SCOP in the market - A+++
- > Total comfort solution thanks to 2-area intelligent eye, improved air flow pattern, user friendly remote control and auto cleaning filter
- > Award winning design - Reddot Design Award 2013
- > Lower GWP refrigerant - R32

85

**DAIKIN EMURA - FTXG-LW/S**

- > Unique design. Designed in Europe for Europe.
- > Improved energy efficiency. SEER up to A+++, SCOP up to A++
- > Improved comfort thanks to 2-area intelligent eye, 3D air flow, sound levels down to 19dBA

192

194

**INTEGRATING VRV IV TECHNOLOGIES ON THE FULL OUTDOOR UNIT RANGE**

- > Heat pump, heat recovery, water-cooled and replacement series now all available in VRV IV!
  - VRV IV standards now available on all series
- > Replacement VRV IV - RXYQQ-T
  - VRV IV standards: Variable Refrigerant Temperature and VRV configurator
  - Cost effective and fast upgrade for R-22 systems as only the outdoor unit needs to be replaced
  - Efficiency gains of more than 70% can be realized when switching to VRV IV
- > Water cooled VRV IV - RWEYQ-T
  - VRV IV standards: Variable Refrigerant Temperature and VRV configurator
  - Unified range for easier stock and order management
  - Reduced CO<sub>2</sub> emissions thanks to the use of geothermal energy as a renewable energy source
  - No need for an external heating or cooling source when used in geothermal mode

**VRV IV**

224

225

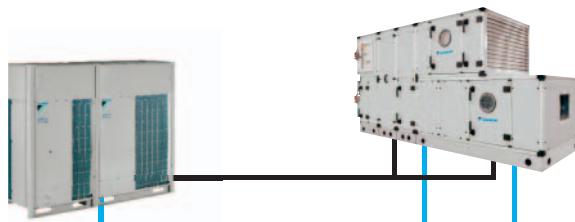

**VAM AND VKM**

- > High energy efficiency with DC fan motors
- > Optional CO<sub>2</sub> sensor saves energy while improving indoor air quality
- > Optional medium (M6) and fine (F7, F8) dust filters for VAM-FB
- > Shorter installation time thanks to easy adjustment of nominal air flow rate
- > Total fresh air solution with optional supply of electrical heater (VAM-FA/FB)

# New products 2014

227

## PLUG & PLAY CONNECTION TO DAIKIN AIR HANDLING UNITS

- > Complete plug & play solution including AHU, ERQ or VRV condensing unit and all unit control (EKEQ, EKEX, DDC controller), factory mounted and configured
- > Used when the commercial ventilation range cannot satisfy the ventilation requirement (up to 140,000 m<sup>3</sup>/h)
- > High efficiency
- > High comfort levels thanks to rapid response of ERQ and VRV to temperature fluctuations

268

## NEW SINGLE SCREW COMPRESSOR WITH BUILT-IN INVERTER AND VARIABLE VOLUME RATIO - EWAD-TZ

- > Class A energy efficiency: ESEER up to 6.0
- > Perfect comfort solution: infinitely variable load regulation and highly accurate precision leaving water temperatures
- > 1-year Return-on-Investment for typical process cooling application
- > Lowest possible sound levels
- > Reducing energy demand without compromising on reliability and performance
- > Compact design

284

## MULTIPLE SCROLL HEAT PUMP - EWYQ-F-

- > High efficiency values both in cooling and heating mode
- > Extremely wide operating range, outside temperatures up to 52°C
- > Plug&play unit concept and straightforward maintenance
- > Small footprint and reduced installation cost
- > Huge range of options for a complete customization
- > Reliable ON/OFF scroll compressor

254  
286

## AIR COOLED MULTI-SCROLL HEAT PUMP WITH DC INVERTER - EWA/YQ-GZ

- > In-house designed DC-inverter scroll compressor, unique in the market and based on the latest Daikin technology development
- > Built-in redundancy (up to 12 compressors)
- > Highest ESEER in its class (up to 5)
- > Low inrush current
- > Seasonal quietness

**313**
**FAN COIL UNITS WITH BRUSHLESS TECHNOLOGY:  
FWZ-AT/AF, FWR-AT/AF, FWS-AT/AF, FWP-AT**

- > Up to 70% energy savings
- > Less fluctuation of air temperature and relative humidity
- > Low sound levels
- > High configuration flexibility

**347**
**MULTI ZEAS**

- > Application range from -45°C to +10°C (evaporating temperature)
- > High energy efficiency
- > VRV technology for refrigeration
- > Increased installation flexibility thanks to limited dimensions
- > Low sound levels

**357**
**SIMPLIFIED WIRED REMOTE CONTROL  
FOR HOTEL APPLICATIONS**

- > Symbol driven interface for intuitive control
- > Contemporary design
- > Energy saving thanks to set point limitation

**364**
**Intelligent Manager - DCM601A51**

- > Cost competitive mini BMS
- > Cross-pillar integration of Daikin products (VRV hydroboxes, air curtains, AHU, refrigeration indoors, Chillers, ...)
- > Integration third party equipment via WAGO and BACnet

# Choosing the best refrigerant

## The environmental and efficiency benefits of R32

Daikin is renowned for its pioneering approach to product development, with more than 50 years' experience in the design and manufacture of heat pump technology. As part of its commitment to the environment, Daikin aims to develop systems that improve comfort levels while having low environmental impact. Refrigerant choice is a key factor in the drive to maximise energy efficiency and to minimise the global warming impact of systems.

When choosing which refrigerant to use in a heat pump system, the entire Life Cycle Climate Performance of a unit must be considered. This is based not only on the global warming equivalent of any direct refrigerant emissions but also on the energy consumption over the lifetime of the system, giving a much more accurate picture of the true global warming impact of a unit throughout its life.

The use of refrigerants is assessed on the following key factors: Global Warming Potential (GWP), energy efficiency and natural resource efficiency.

R32 has a GWP of 650<sup>1</sup>, compared with R410A's GWP of 2,088, a reduction of 68%. R32 products can also achieve higher efficiency levels both in part load and full load conditions and R32 is a single component refrigerant, which makes it easy to recycle.

Europe's first commercialised air-to-air heat pump system to use R32 refrigerant was introduced by Daikin in Autumn 2013. The new Ururu Sarara range, which has already won the prestigious 2013 red dot award for product design, offers very high energy efficiencies thanks to the use of R32, which at the same time means these units have a lower environmental impact than ever before.

The use of R32 in the new Ururu Sarara range offers end-users the opportunity to benefit from class-leading energy efficiencies, excellent air quality and high comfort levels, while lowering the environmental impact of their heat pump system.

<sup>1</sup> Intergovernmental Panel on climate change, Fourth Assessment Report: Climate Change, 2007.

# The Daikin solution

## to upgrade R-22 and R-407C systems

Due to significant developments in heat pump technology, today's air conditioning systems, running on R-410A refrigerant, offer better performances than R-22 and R-407C systems did in the past. Furthermore, R-22 will be soon unavailable in Europe. Already today, only reclaimed or recycled

R-22 can be used for servicing. To upgrade R-22 and R-407C systems as cost effectively as possible, Daikin units can be installed using existing pipe work. Replacement technology is available for residential and commercial applications in the following ranges: Split, Sky Air, VRV

### Plan your system replacement now!

The R-22 phase out regulation will impact on all currently operating R-22 systems, although reliable R-22 equipment does not need to be replaced immediately because maintenance can be carried out with recycled or reclaimed R-22 until 1st January 2015. However, not enough R-22 is currently

reclaimed or recycled to cover the demand. As a consequence, supply shortages and price increases are expected. If there is no reclaimed or recycled R-22 available, certain repairs (for example: compressor change) will no longer be possible and considerable air conditioning system downtime can occur.

**It is therefore worthwhile to consider a replacement system before 2015, especially for air conditioning systems with a large impact on the daily running of the business.**

### R-22, an ozone depleting refrigerant

R-22 is a hydrochlorofluorocarbon (HCFC) which was commonly used in air conditioning systems. When R-22 is released into the air, the ultraviolet rays of the sun cause it to decompose and chlorine is released into the stratosphere. Chlorine reacts with ozone, reducing the amount of ozone.

Due to ozone layer depletion, harmful ultraviolet rays reach the surface of the earth giving rise to a number of health and environmental issues. The international community therefore, signed the Montreal Protocol to phase out ozone depletion materials by 2030. The European Union, however, decided to ban R-22 already in 2015.

### When will R-22 be banned in Europe?

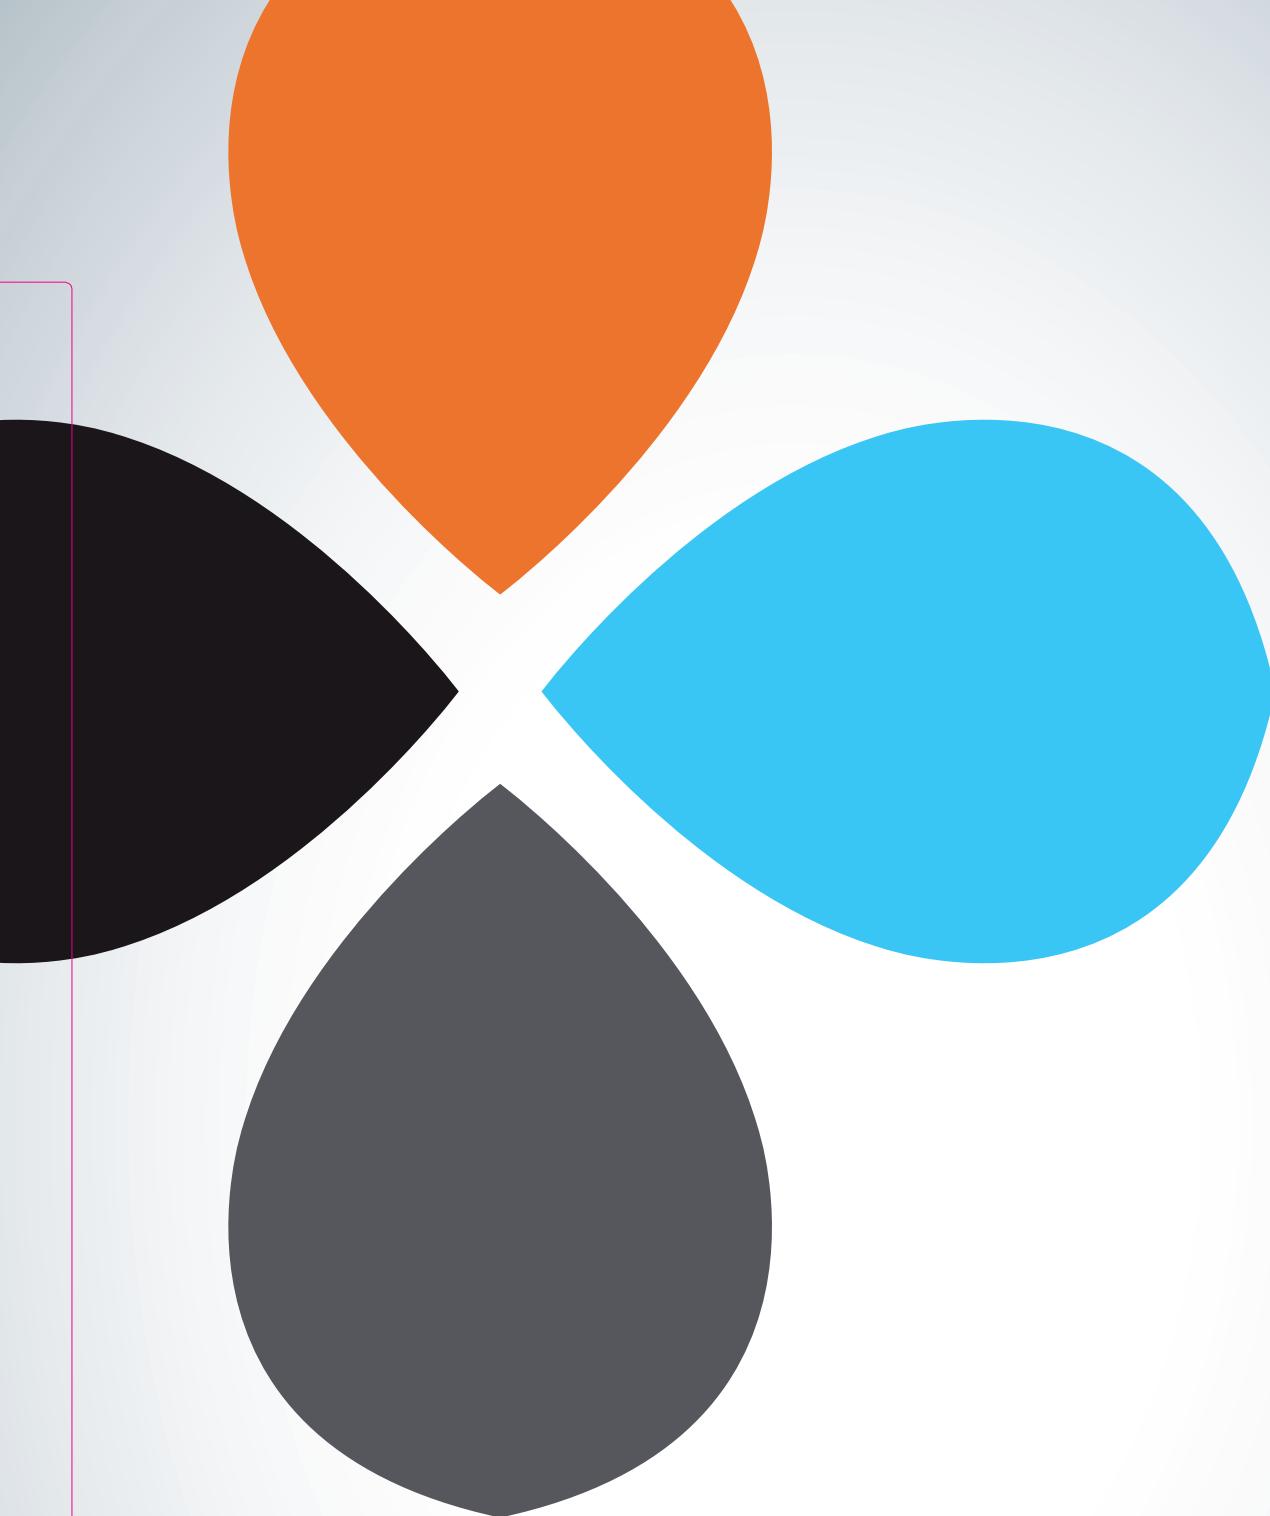

2004	2005	2006	...	2009	2010	2011	...	2014	01/01/2015
Ban of the sale of R-22 air conditioning equipment									

Daikin advises the replacement of your existing R-22 installation

Ban on the use of virgin R-22 for service & maintenance Ban on the use of all R-22 for service & maintenance

Only reclaimed & recycled<sup>1</sup> R-22 allowed

<sup>1</sup> Recycled: re-use of R-22 following a basic cleaning process. Recycled R-22 must be re-used by the same company that carried out the recovery (can be done by installer)  
Reclaimed: reprocessed R-22 in order to meet the equivalent performance of virgin R-22 (by specialized company)

## Seasonal efficiency, smart use of energy

### SEASONAL EFFICIENCY

Smart use of energy

Seasonal efficiency is a measure mandated by the European Union to optimise energy consumption. The EU wants to make people aware of what units are consuming and ban non-efficient products from the market. Seasonal efficient units reflect the actual performance you can expect over an entire heating and cooling season. The standard came into force in January 2013 for products under 12 kW.

Today, Daikin is leading the way towards more efficient and cost-effective comfort solutions. All Daikin products – residential and commercial as well as industrial – are seasonal efficient, they all reduce energy and costs in a smart way.

Find out more on [www.daikin.eu](http://www.daikin.eu)

## Seasonal efficiency, Smart use of energy

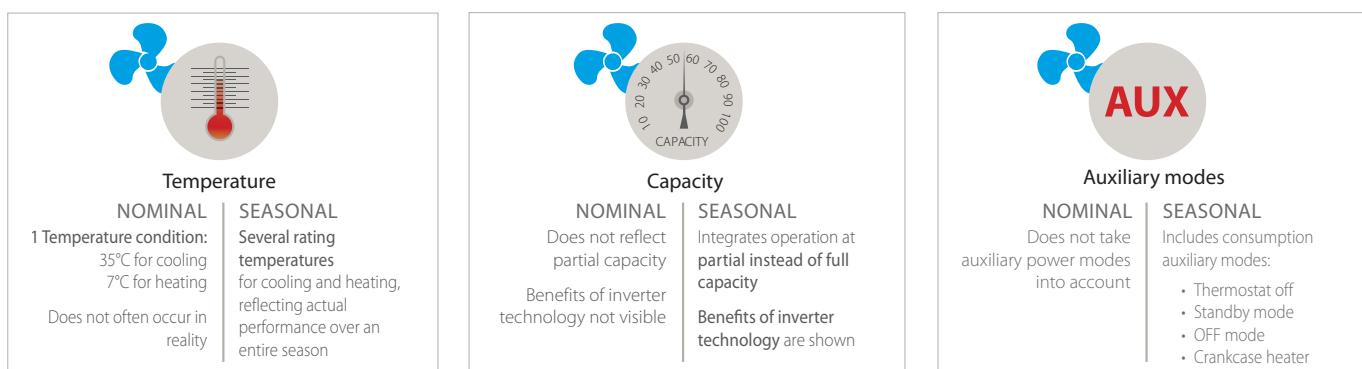

### Challenging 20-20-20 environmental targets

The European Commission has set challenging targets for improving energy efficiency in the EU. These so-called 20-20-20 targets aim at a 20% reduction in CO<sub>2</sub> emissions, 20% share of renewable energy and a 20% reduction in the use of primary energy, all by the year 2020. To realise these objectives, Europe issued the Eco-Design Directive [2009/125/EC]. This sets minimum efficiency requirements for energy related products. After 2013, all air conditioners and air to air heat pumps under 12 kW come into scope of this Eco-Design Directive. From 2013, products unable to comply with the minimum efficiency requirement (such as non-inverter air conditioners) will lose their CE marking and thus may no longer be sold in Europe. In 2014 the energy-performance bar will again be raised significantly.

### Major change: seasonal efficiency in line with real-life performance

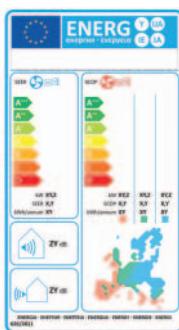

Not only does the Eco-Design Directive systematically raise the minimum requirements with respect to environmental performance, the method used to measure this performance has also been changed to better reflect real-life conditions. Previous measurements reflected so-called nominal efficiency, a measurement of performance at one fixed outdoor temperature and with equipment running at full power. Since a cooling or heating season involves a range of outdoor temperatures (not just the one nominal temperature in the rating) and equipment is often only running at partial load, this old rating did not properly reflect actual performance.

The new method, seasonal efficiency, measures heating and cooling performance across a range of outdoor temperatures that give a better representation of actual efficiency over an entire heating or cooling season. Moreover, auxiliary modes such as stand-by mode are also taken into account in the new seasonal efficiency ratings. Thus seasonal efficiency gives a much better representation of the real performance of an air conditioner, in real-life conditions, across an entire season.

**Nominal efficiency** gives an indication on how efficient an air conditioner is when operating in a nominal condition.

**Seasonal efficiency** gives an indication on how efficient an air conditioner is when operating over an entire cooling or heating season.

### Europe's new energy label: raising the bar on energy efficiency

To inform consumers concerning these new energy performance standards, Europe is also introducing a new energy label. The present European energy label, introduced in 1992, has had its effect. Consumers are able to compare and make purchasing decisions based on uniform labelling criteria. The new label that came into force on 1 January 2013 allows end-users to make even better informed choices, since seasonal efficiency reflects air conditioner efficiency over an entire season.

The energy label includes multiple classifications from A+++ to D reflected in colour shadings ranging from dark green (most energy efficient) to red (least efficient). Information on the label includes not only the new seasonal efficiency ratings for heating (SCOP) and cooling (SEER), but also annual energy consumption and sound levels.

### Daikin leading the way to seasonal efficiency

While the challenges of Eco-Design are immense, Daikin has resolutely chosen for early implementation of this new legislation. Already in 2010, Daikin launched a new light commercial range fully optimised for seasonal efficiency. The Seasonal Smart series in this range in fact already complies with the very challenging 2014 minimum requirements. Today Daikin is proud to indicate the seasonal performance of its entire residential and light commercial range up to 12 kW.

# Tools & platforms

Have a question, looking for specific software applications, need detailed product information or looking for any other marketing tools? This overview gives you an idea of what we can offer ...

## Mini sites

Some products need slightly more attention than others. That's why we have developed mini sites. These sites provide all information (specifications, video, animation, drawings,...) related to one specific topic.

Below you can find some examples of minisites, which can easily be found on our website.

## Extranet

The Daikin extranet is a dedicated area with limited access for professionals in HVAC-R. It offers 24/7 access to the most up to date information, such as technical and commercial documentation, e-data, selection software, training, webshop, etc.

No account yet? Visit:

[http://www.daikineurope.com/  
business-partners/index.jsp](http://www.daikineurope.com/business-partners/index.jsp)

# Software

Daikin offers an extensive range of online supporting tools, enabling you to select & sell the product of your interest. These are some examples:

## Sales supporting apps

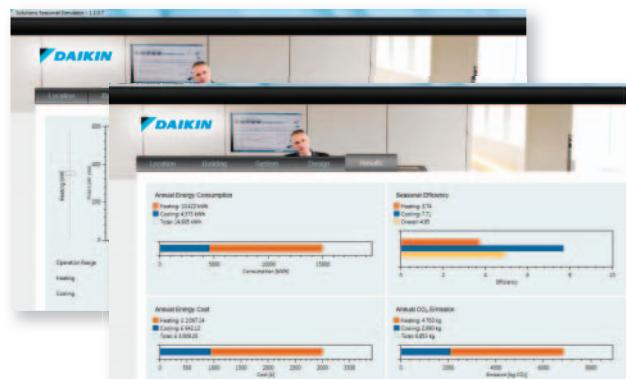

### Daikin E-data app:

contains an overview of all Daikin Europe N.V. products that are available in your country, in your own language. You can easily browse the products to find the engineering data you need.

## Seasonal Solutions Simulator:

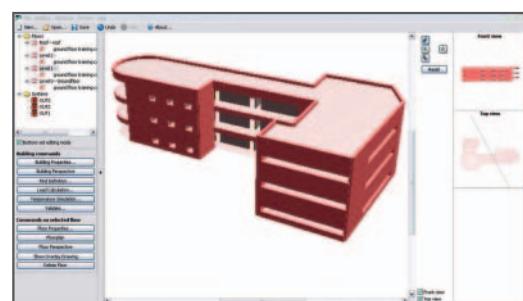

With this software tool you can simulate the seasonal efficiency, the annual power consumption and CO<sub>2</sub> emission for a given climate, load profile (cooling, heating, heat recovery, covalent, bivalent...) and (combination of) system(s). With its intuitive and graphical appealing interface, a simulation can be made in a matter of minutes. The solution basket system enables you to compare the results of several system configurations.

## Selection software

**Xpress** is a flexible design software to optimise equipment selection in cost and it enables you to make a high efficient building design.

VRV Pro is a true VRV design tool. The program enables VRV air conditioning systems to be engineered in a precise and economical way, taking into account the complex piping rules. Moreover, it ensures optimum operating cycles and maximum energy efficiency. In this way, it gives the designer the possibility to make accurate selections and get competitive quotations for each project.

For a complete line-up of tools & downloads, visit:

[http://extranet.daikineurope.com/  
en/software/default.jsp](http://extranet.daikineurope.com/en/software/default.jsp)

# Pure air

## Because Daikin cares

The streamer technology air purifier, a blend of new technology, improved performance, and ultra quiet operation, it is designed to care for you by unobtrusively providing purified air to produce a healthy home environment. Purified air improves the perception of comfort and, by removing and destroying contaminants and odours, the streamer technology air purifier also plays an essential role for those who suffer from asthma or allergies. These efforts place the streamer technology air purifier among the best residential air purifiers on the market today.

### Three times purification, a good deed for your health

Pollen, dust and pet hair are just some of the potential causes of allergies, asthma and respiratory problems. A Daikin air purifier cleans the air and relieves you of these troubles thanks to a three-part operation:

- › allergen removal
- › virus and bacteria removal
- › odour removal

### Six-layer powerful decomposition and removal configuration

1 High-speed electrons are discharged that enable decomposition and removal

Dirty air

2 Dust is captured.  
Bacteria and allergens  
are removed

Prefilter

3 Dust and pollen  
are electrically  
charged and then  
sent to the filter

Plasma ionizer

4 Dust and pollen  
are absorbed  
by the electrically  
charged filter

Electrostatic dust  
collection filter  
(front of pleated dust  
collection filter)

5 Odours and viruses are kept  
under control by  
photocatalyst

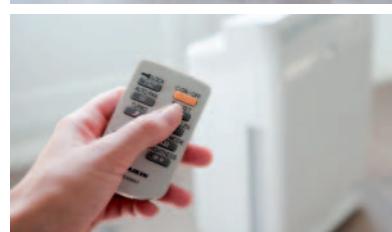

Titanium apatite filter  
(back of pleated dust  
collection filter)

6 Formaldehyde and odours are  
decomposed

Deodorising catalyst filter

Clean air

- › stylish design
- › improved performance
- › unprecedented comfort
- › super quiet operation
- › easy to maintain
- › portable
- › no installation

# What is the Daikin streamer technology?

"Streamer Discharge" is a type of plasma discharge in which high speed electrons capable of oxidative decomposition are generated. It has the ability to eliminate bacteria and mould as well as hazardous chemical substances and allergens, etc. Compared to standard plasma discharge (glow discharge), the discharge range of Daikin's Streamer Discharge is wider, which makes it easier for electrons to collide with oxygen and nitrogen in the air. This enables high speed electrons to be generated three dimensionally over a wide area, which results in an oxidative decomposition speed that is over 1,000 times greater with the same electrical power. Daikin's Streamer Discharge technology has proven successful in stably generating high speed electrons, a feat that has been considered difficult up to now.

## Main specifications

Daikin has already received great praise for its air purifiers: a British Allergy Foundation seal of approval and the TÜV Nord test mark confirm the efficiency of our units.

## Humidification and purification in One

There are many substances in the air you breathe such as allergen, bacteria, virus and tobacco smoke, which causes your health to suffer. Above all things, dryness is especially a big issue during wintertime.

Daikin Ururu Air Purifier moisturizes the air inside your home and relieves the effects of dry air. Just fill the 4l tank occasionally and it will humidify your room with a maximum volume of 600ml/h.

This useful and innovative function stems from the incorporation of a slim line water tank and combined water wheel and vaporisation filter assembly.

- › Humidification thanks to the slim water tank
- › Air purification

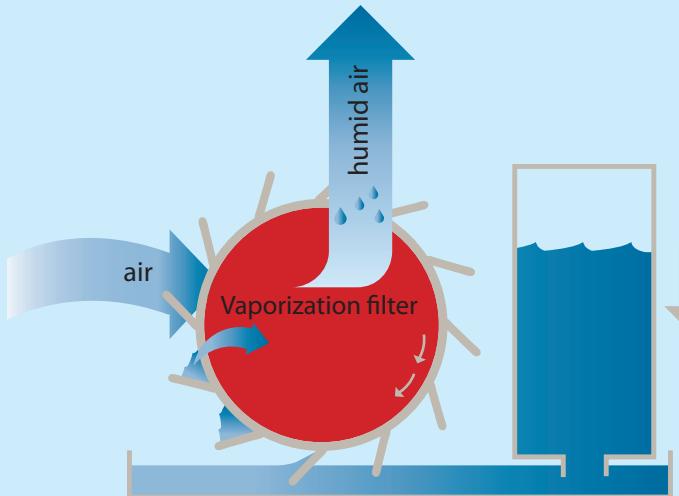

Daikin has already received great praise for its air purifiers: the Daikin TÜV award confirms the efficiency of this unit.

## MCK75J

Indoor unit				MCK75J
Application				Floor standing type
Applicable room area				46
Casing	Colour			Black (N1) (Panel colour: silver)
Dimensions	Unit	HeightxWidthxDepth	mm	590x395x268
Weight	Unit	kg		11.0
Fan	Type			Multi Blade Fan (Sirocco fan with shroud assembly)
	Air flow rate	Air purifying operation	Turbo/H/M/L/Silent	450/330/240/150/60
		Humidifying operation	Turbo/H/M/L/Silent	450/330/240/150/120
Sound pressure level	Air purifying operation	Turbo/H/M/L/Silent	dBA	50/43/36/26/17
	Humidifying operation	Turbo/H/M/L/Silent	dBA	50/43/36/26/23
Humidifying operation	Power input	Turbo/H/M/L/Silent	kW	0.084/0.037/0.020/0.013/0.012
	Humidification	Turbo/H/M/L/Silent	ml/h	600/470/370/290/240
	Water tank capacity	I		4.0
Air purifying operation	Power input	Turbo/H/M/L/Silent	kW	0.081/0.035/0.018/0.011/0.008
Deodorizing method	Flash streamer / Titanium apatite photocatalytic filter / Deodorising catalyst			
Dust collecting method	Plasma ionizer / Electrostatic dust collection filter			
Sign	Item	01	Dust: 3 stages / Odour: 3 stages / Air flow rate: auto/LL/L/M/H, Turbo mode HH, anti-pollen mode / Off timer: 1/4/8h / Cleaning: ionization/streamer	
Power supply	Name/Phase/Frequency/Voltage	Hz/V	VM/1~/50/60/220-240/220-230	
Type	Humidifying air purifier			

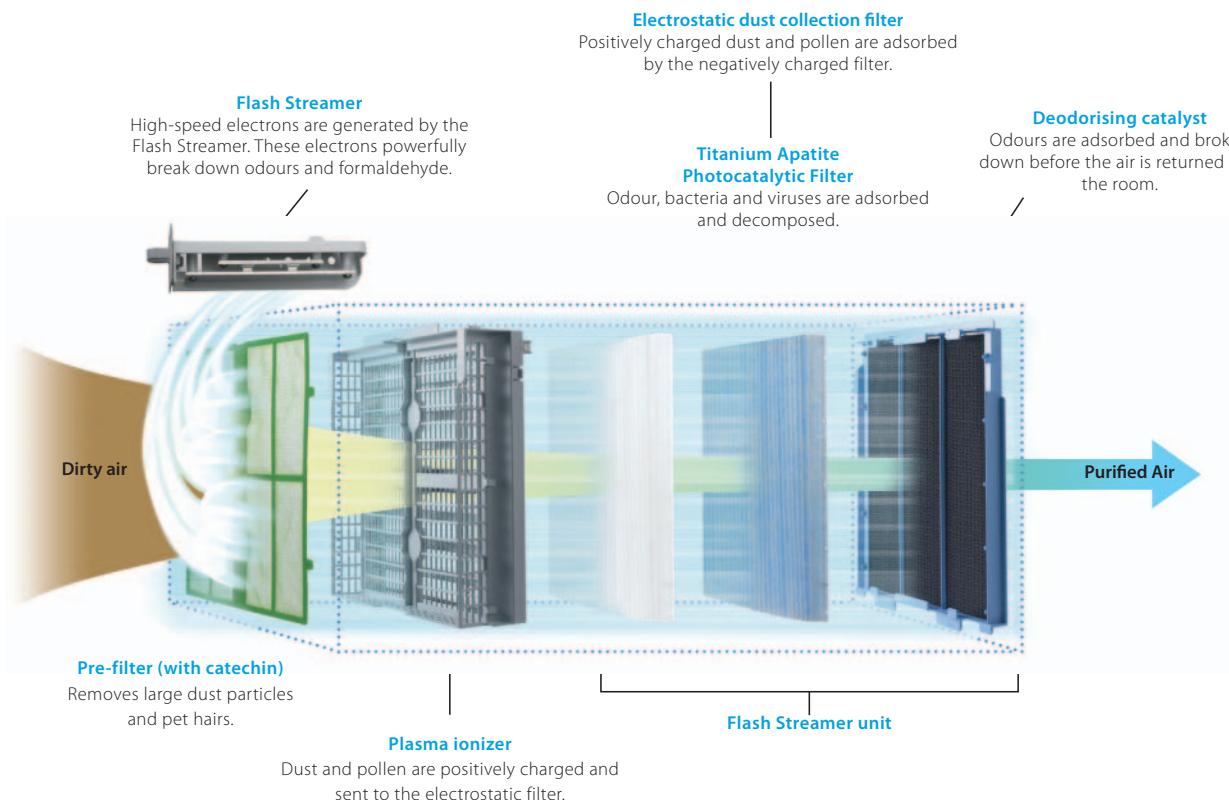

MCK75J

## How does the humidification function work?

Water in the tank flows into the receiver tray housing the water wheel, which lifts the water as it rotates and releases it onto the filter. Air blown onto the filter, absorbs its moisture and discharges it into the room as humidification.

Daikin Ururu Air Purifier also removes efficiently allergens (e.g. pollen, house dust mites, dust, etc.), bacteria and viruses. Additionally, it has a high deodorizing efficiency; it eliminates efficiently tobacco smoke whilst decomposing other smells. It quickly collects particles and breaks them down rapidly. Its quiet operation makes it ideal for quiet nights. The unit includes seven pleated filters (one for immediate use and 6 spares).

People are more and more switching to an energy-efficient heating system that produces low CO<sub>2</sub> emissions.

Daikin offers a total heating and domestic hot water system based on air and ground source heat pump technology. One that represents a flexible and cost-effective alternative to a traditional fossil fuel boiler.

The inherent energy-efficiency characteristics of Daikin make it an ideal solution for reduced energy consumption and low CO<sub>2</sub> emissions. Its high- and low-temperature heating systems provide optimal comfort.

Highly energy-efficient heat pumps with advanced compressor technology transform unused and inexhaustible heat from the surrounding air into usable heat, either as part of the overall climate-control system or to heat domestic hot water.

Daikin Altherma hybrid heat pump

# The natural combination

Heat pump and gas condensing boiler in one,  
the best of two technologies!

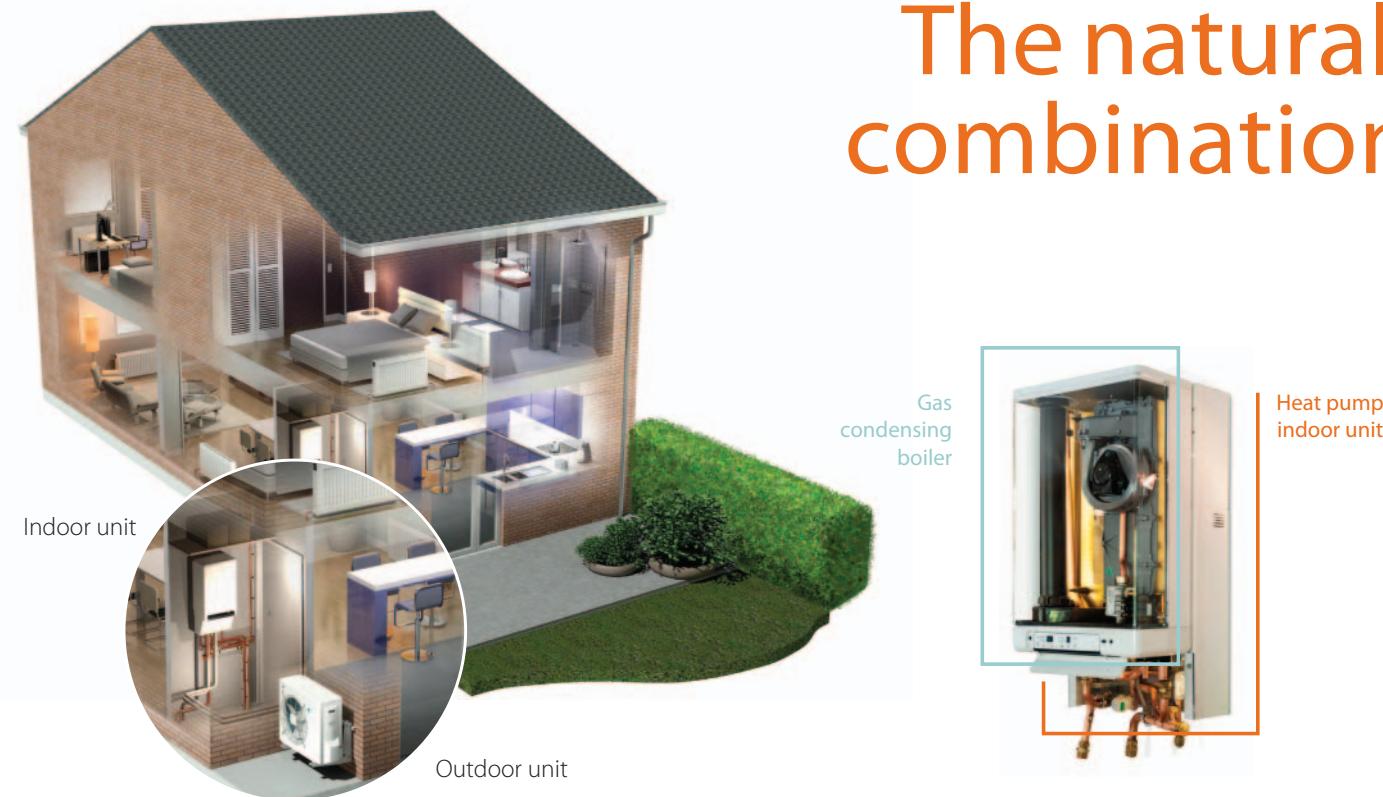

The Daikin Altherma hybrid heat pump is the ideal solution for the replacement of a gas boiler. Depending on the outdoor temperature, energy prices and the internal heat load, the Daikin Altherma hybrid heat pump smartly chooses between the heat pump and/or the gas boiler, always selecting the most economical mode to operate.

Find out more on [www.daikin.eu](http://www.daikin.eu)

**DAIKIN**  
altherma

# Daikin Altherma hybrid heat pump

## The natural combination

Daikin Altherma hybrid heat pump combines air-to-water heat pump technology with gas condensing technology for space heating by searching for the optimum economical condition for its operation, combining parameters of energy cost (electricity, gas), heat pump efficiency and heat load requirements to deliver up to 35% more heating efficiency, plus major cost savings.

### Low running costs for heating and domestic hot water

#### 1. Space heating

Daikin Altherma hybrid heat pump smartly chooses between the heat pump and/or the gas boiler, possibly in simultaneous operation always selecting the most economical mode to operate.

#### 2. Domestic hot water: heated using gas condensing technology

Efficiency increase of up to 30% compared to traditional gas condensing boilers thanks to a **special dual heat exchanger**: cold tap water flows directly into the heat exchanger.  
=> optimal and continuous condensing of the flue gases during domestic hot water preparation

### Low investment cost

- › No need to replace the existing radiators (up to 80°C) and pipe work
- › compact dimensions: space needed for the new system is very similar to that of an existing system

### Provides sufficient heat in renovation applications

- › All heat loads are covered up to 32 kW

### Easy and fast installation

- › heat pump outdoor unit
  - › heat pump indoor unit
  - › gas condensing boiler
- => easier to handle and manipulate, and easier to install

# EHYHBH-AV3 / EVLQ-CV3 EHYKOMB-AA

Daikin Altherma hybrid heat pump

EHYHBH-AV3 EHYKOMB-AA

EVLQ-CV3

- › Daikin Altherma hybrid heat pump **combines air-to-water heat pump technology with gas condensing technology**
- › Wall mounted indoor unit of air-to-water heat pump
- › Depending on outdoor temperature, energy prices and internal heat load, Daikin Altherma hybrid heat pump **always selects the most economical mode to operate**
- › Low investment cost: no need to replace the existing radiators (up to 80°C) and pipe work
- › Provides sufficient heat in renovation applications as all heat loads are covered up to 27kW
- › Easy and fast installation thanks to the compact dimensions and quick interconnections
- › Outdoor unit extracts heat from the outdoor air, even at -25°C

## The geothermal power

Geothermal energy is a free source of energy for heating, and domestic hot water. It delivers enormous cost savings in even the coldest climates. The compact design of the indoor unit requires very little space whilst, at the same time, making the system very easy and quick to install. And, once commissioned, our easy, user-friendly controls put the user in complete command.

### Highest seasonal efficiency thanks to our inverter heat pump technology

- › The Daikin inverter heat pump technology has been shown to provide an increase in seasonal efficiency of up to 20% when compared to traditional on/off ground source heat pumps
- › Higher brine temperatures during continuous compressor operation, in partial load conditions
- › Less back up heater operation thanks to the boosting of the inverter compressor frequency

### Quick and easy installation including a domestic hot water tank

To keep things simple, the domestic hot water tank is factory-fitted, thus reducing the installation time and with the pipework connections on the top of the unit it is very easy to connect. The overall weight of the unit is kept at a minimum to facilitate ease of shipping and installation.

### Compact indoor unit with pleasing design

- › The full integration of heat pump module and domestic hot water tank keeps the footprint very compact
- › High quality design helps the unit blend in with other household units

### New user interface

- › Quick commissioning
- › User-friendly room thermostat functionality
- › Energy management functionality
- › Easy servicing

EGSQH-A9W

- > Ground source heat pump technology uses stable geothermal energy, unaffected by the outside temperature
- > **Highest seasonal efficiency** thanks to our inverter heat pump technology
- > Quick and easy installation thanks to factory-fitted piping on top of the unit and reduced overall weight
- > **Integrated indoor unit:** all-in-one floor standing unit including the domestic hot water tank
- > User interface with thermostat function for higher comfort, quick commissioning, easy servicing and energy management to control energy consumption and costs

# Daikin Altherma low temperature

Daikin Altherma offers two low temperature systems including a domestic hot water system all of which connect to the same range of accessories

## Daikin Altherma low temperature split

### Best seasonal efficiencies providing the highest savings on running costs

- › excellent COP ratings for incentive and certification schemes
- › no need for or only very limited use of electrical assistance
- › best efficiencies achieved within the most relevant temperature range

### Perfect fit for new builds, as well as for low-energy houses

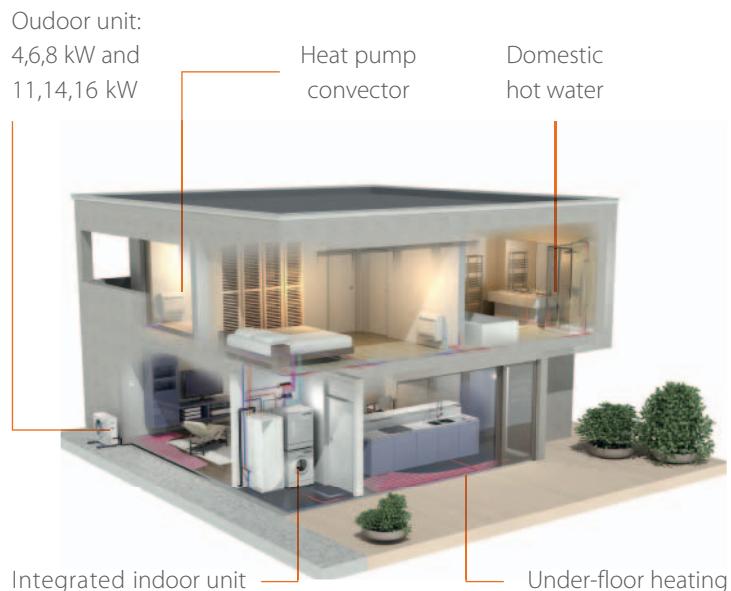

- › custom-made product for very low heat loads
- › built to withstand most severe winter conditions
- › heating, cooling and domestic hot water in one system

### Heating, cooling and domestic hot water

#### Integrated heating and hot water unit, saving installation space and time

- › all components and connections factory-made
- › very small installation footprint required
- › minimum electrical input with constant availability of hot water

### Heating, cooling and domestic hot water with solar energy

#### Integrated heating and hot water unit with extended flexibility

- › Solar support of domestic hot water with unpressurised (drain-back) and pressurised solar system
- › Lightweight plastic tank with exceptional hygienic benefits
- › Bivalent option: combinable with a secondary heat source
- › App control possible

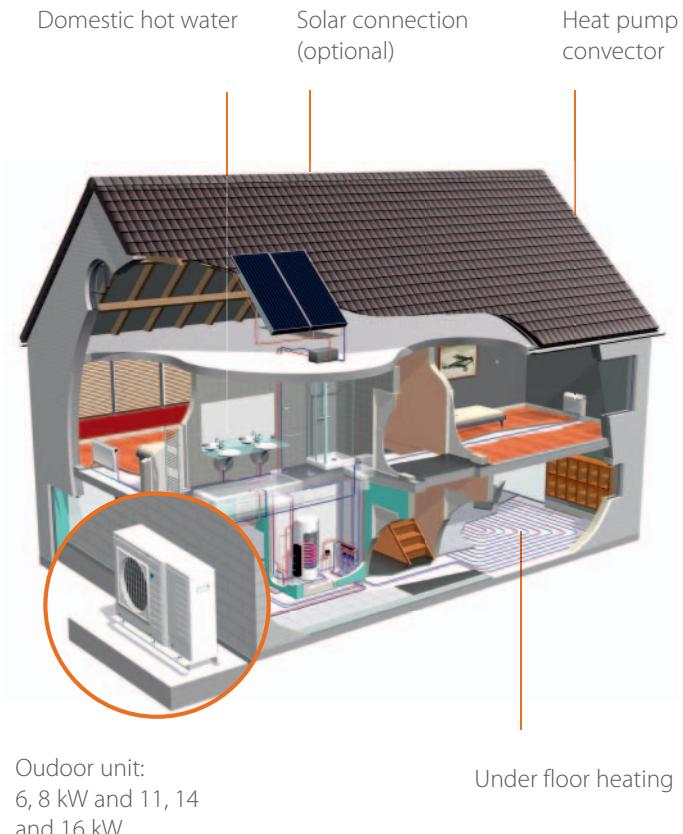

### Wall mounted indoor unit with optional solar energy

A wall-mounted indoor unit is available as well, to offer the best solution in specific situations, e.g. when no domestic hot water heating is required or when a separate tank for solar energy is preferred.

## Daikin Altherma low temperature monobloc

Everything combined in one outdoor unit

Outdoor unit:  
6, 8 kW and 11, 14  
and 16 kW

### Easy installation

- › Quick and easy installation as only water pipes run indoors from the outdoor unit
- › Limited installation space thanks to small footprint and only outdoor space required

### Freeze protection of hydraulic parts

- › insulation of all hydraulic components
- › special software to activate the pump and back-up heater if necessary

### A solution for any application

- › Heating only or heating and cooling
- › Combinable with a domestic hot water tank with optional solar support

## Accessories for low temperature applications

### Heat pump convector

The heat pump convector is much more than a fan coil unit as it provides both heating and cooling if required and obtains optimal energy efficiency by approximately 25% when connected to a Daikin Altherma low temperature system in combination with under floor heating.

### Solar connection

To save even more energy on your domestic hot water production, the Daikin Altherma system can be connected to a solar system. The high-efficiency collectors transfer all the short-wave solar radiation into heat as a result of their highly selective coating. The collectors can be mounted on the roof tiles.

### Under floor heating

As Rotex is part of the Daikin group, all heating supplies can be offered. For more information, contact your local supplier.

EHVH-CB

ERLQ004-008CV3

ER(L/H)011-016CV3/BV3

- > Perfect fit for new built as well as for low energy houses
- > Best seasonal efficiencies, providing the highest savings on running costs
- > **Integrated indoor unit:** all-in-one floor standing unit including the domestic hot water tank
- > Energy efficient **heating only** system based on air to water heat pump technology
- > Flexible configuration with respect to heat emitters
- > Outdoor unit extracts heat from the outdoor air, even at -25°C
- > Inverter controlled swing compressor

- > **Wall mounted indoor unit**
- > Energy efficient **heating only** system based on air to water heat pump technology
- > Perfect fit for new built as well as for low energy houses
- > Best seasonal efficiencies, providing the highest savings on running costs
- > Flexible configuration with respect to heat emitters
- > Possible to combine with domestic hot water
- > Outdoor unit extracts heat from the outdoor air, even at -25°C
- > Inverter controlled swing compressor

Space heating  
and cooling  
Domestic hot  
water

EKHWP300B

EKHWP500B

- › Tank designed for connection with thermal solar collectors
- › Available in 300 and 500 liters
- › Large hot water storage tank to provide domestic hot water at any time
- › Heat loss is reduced to a minimum thanks to the high quality insulation
- › Space heating support possible (500l tank only)

EKRTW

EKRTW

- > Easy and convenient regulation of the indoor temperature, resulting in ideal comfort and energy efficiency
- > Heating and cooling mode, with possibility to disable cooling mode if not required
- > Comfort function mode activates the programmed temperature levels intended for a home occupied during the day; default setpoints are 21°C in heating mode and 24°C in cooling mode and can be changed by the user
- > Reduced function mode activates the programmed temperature levels for periods when the house is unoccupied or at night; default setpoints are 17°C in heating, 28°C in cooling mode and can be changed by the user
- > Scheduled function mode: uses a timer to schedule heating and cooling setpoints throughout the day; up to 12 setpoints can be programmed per day; the selected setpoints will be automatically activated at the scheduled time
- > Holiday function mode: intended for setting reduced and fuel-efficient setpoints when the house is unoccupied for long periods. The default setpoints are 14°C for heating and 30°C for cooling.
- > Off function: switches the system off; however, the integrated frost protection remains activated (set by default at 4°C).
- > Setpoint limitation sets the upper and lower setpoint limits within which the user can programme the desired comfort levels and can only be modified by the installer
- > Number of setpoint changes: 12/day
- > Key lock function: possible to lock the keys of the room thermostat

FWXV-A

ARC452A15

- › Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- › Energy efficient heating and cooling system based on air source heat pump technology
- › Optimum energy efficiency when connected to a Daikin Altherma low temperature system
- › The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 19dB(A). In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- › Reduced running costs
- › Its low height enables the unit to fit perfectly beneath a window
- › Weekly timer can be set to start heating or cooling anytime on a daily or weekly basis
- › Indoor unit silent operation: "silent" button on the remote control lowers the operation sound of the indoor unit by 3dBA
- › Can be installed against a wall or recessed
- › Powerful mode can be selected for rapid cooling; after the powerful mode is turned off, the unit returns to the preset mode.
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air

# Daikin Altherma high temperature split

Heating & domestic hot water

## for renovations

The Daikin Altherma high temperature system offers heating and domestic hot water for your home. Replacing a traditional boiler, it connects to the existing piping allowing you to keep your current hydraulic connections and emitters. The Daikin Altherma high temperature system is therefore the ideal solution for renovations. The split system consists of an outdoor unit and an indoor unit and can be completed with a solar connection.

Accessories  
for high temperature  
applications

### Easy control

With Daikin Altherma's user interface, the ideal temperature can be easily, quickly and conveniently regulated. It allows for more precise measurement and can regulate your comfort even more optimally and energy efficiently.

- ✓ Low running costs and optimum comfort at even the coldest outdoor temperatures, thanks to the unique cascade compressor approach
- ✓ No need to change your existing radiators and piping as water temperatures can be increased up to 80°C for heating and domestic hot water use
- ✓ Only limited installation space needed as the indoor unit and domestic hot water tank can be stacked on each other

**a -** Indoor unit

**b -** Outdoor unit

**c -** Domestic hot water tank

## Heat emitters

The Daikin Atherma high temperature system is designed to work only with high-temperature radiators, which come in various sizes and formats to suit the interior design as well as the heating requirement. Our radiators can be individually controlled or they can be regulated by the central heating control programme.

## Solar connection

The Daikin Altherma high temperature heating system can optionally use solar energy for hot water production.

If the solar energy is not required immediately, the purpose-built hot water tank (EKHWP) can store large quantities of heated water for up to a day for later use as domestic hot water or for heating.

# EKHBRD-ACV1/Y1 ER(R/S)Q-AV1/Y1

Daikin Altherma high temperature split

EKHBRD-ACV1/Y1

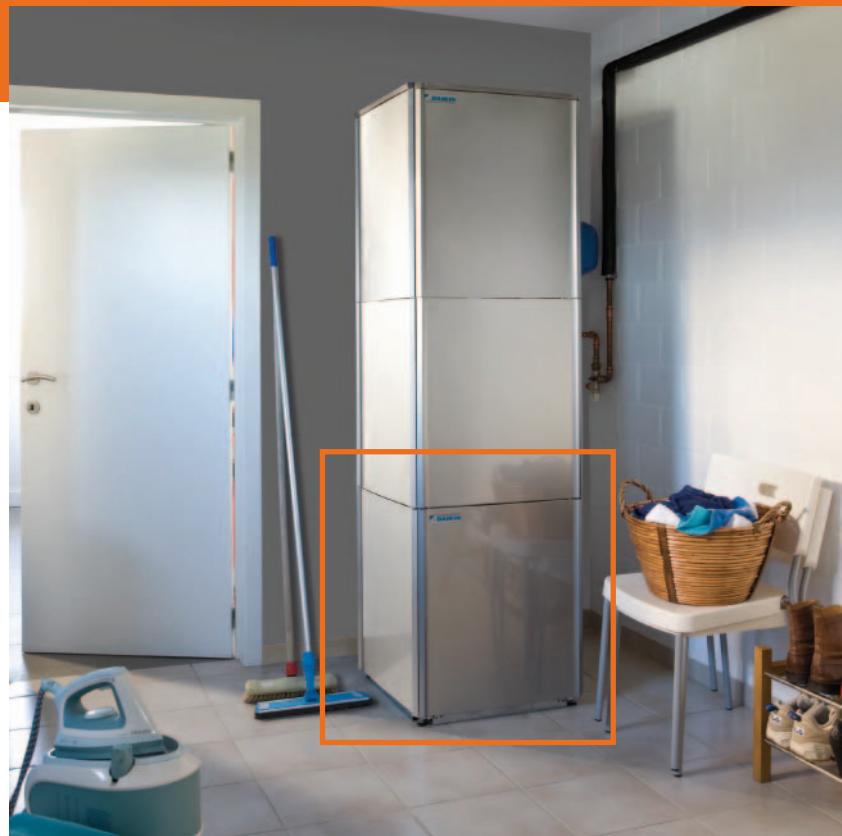

ER(R/S)Q-AV1/Y1

- > Easy replacement of existing boiler, without changing heating pipes
- > Low energy bills and low CO<sub>2</sub> emissions
- > Energy efficient heating only system based on air to water heat pump technology
- > Combinable with high temperature radiators
- > High temperature application: up to 80°C without electric heater
- > Floor standing indoor unit up to 16kW
- > Inverter controlled scroll compressor
- > Outdoor unit extracts heat from the outdoor air, even at -20°C

## Domestic hot water tank

- > Stainless steel domestic hot water tank
- > The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- > Available in 200 and 260 liters
- > Heat loss is reduced to a minimum thanks to the high quality insulation
- > At necessary intervals, the indoor unit can heat up the water to 60°C to prevent the risk of bacteria growth
- > Efficient temperature heat-up: from 10°C to 50°C in only 60 minutes

# Daikin Altherma Flex Type

The Daikin Altherma range is a mix of intelligent solutions and advanced control technologies that provide the ultimate in controllable comfort for **residential** or **commercial** buildings while respecting the environment through reduced energy consumption.

## Concept description

One or more indoor and outdoor units

## 3-in-1 system

Daikin Altherma Flex Type heats, cools, and produces domestic hot water:

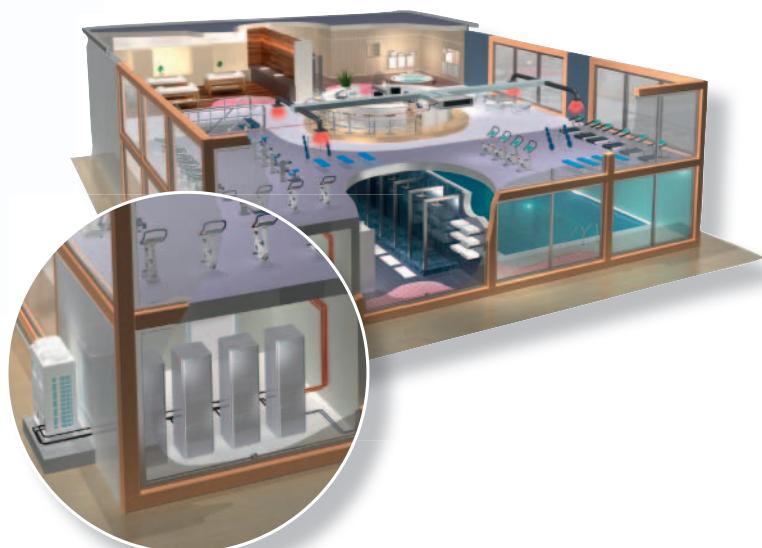

- › Heating: leaving water temperatures up to 80°C
- › Cooling: leaving water temperatures down to 5°C
- › Hot water: tank temperatures up to 75°C

Thanks to its heat recovery function, the system can heat up the hot water tank up to 60°C with rejected heat from cooling operation.

**1** Heating

**2** Cooling

**3** Hot water

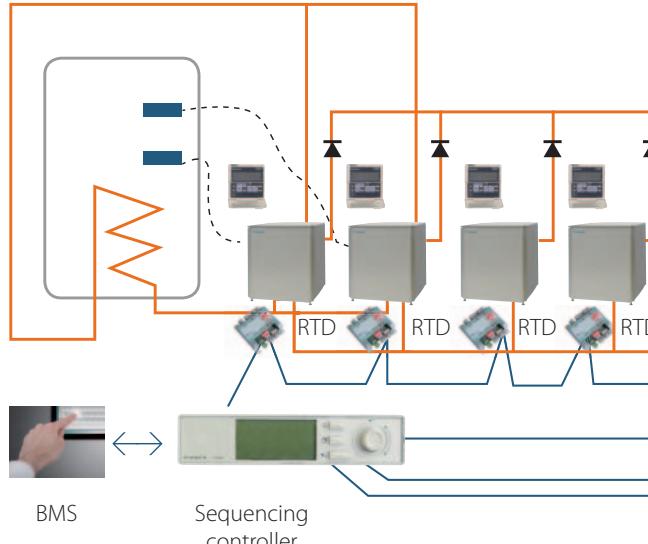

- ✓ Top Comfort
- ✓ Heating, hot water and cooling
- ✓ Low CO<sub>2</sub> emissions
- ✓ Modular system

## Advanced control and monitoring for high efficiency and ease of operation

To further increase the efficiency, an RTD-W per indoor unit and a sequencing controller for the full heating system can be installed to monitor the exact heating demand.

### RTD-W interface

Daikin's RTD control systems allow the company's entire product portfolio to be integrated fully with other building systems to reduce energy consumption (and bills), as well as lowering carbon emissions.

### Sequencing controller

Thanks to the Modbus interface of the RTD-W, the sequencing controller (EKCC7-W) can centrally monitor the whole heating system, ensuring a low energy bill and a clear view on the

operation of the system. A main energy reducing function is the cascade operation of units. The number of operating indoor units is defined based on the difference between measured common leaving water temperature and the set point. The order of start-up of the units is determined by running hours, domestic hot water operation and grouped per outdoor unit.

# EKHVM(R/Y)D-A EKHBRD-ACV1/Y1

Daikin Altherma Flex Type - indoor unit

EKHVM(R/Y)/D-A / EKHBRD-AC

- > Energy efficient heating only system based on air to water heat pump technology
- > Low energy bills and low CO<sub>2</sub> emissions
- > Inverter controlled scroll compressor
- > High temperature application: up to 80°C without electric heater
- > Combinable with high temperature radiators
- > Easy replacement of existing boiler, without changing heating pipes
- > Three phase floor standing indoor unit up to 16kW

FWXV-A

ARC452A15

- > Vertical auto swing moves the discharge flaps up and down for efficient air and temperature distribution throughout the room
- > Energy efficient heating and cooling system based on air source heat pump technology
- > Optimum energy efficiency when connected to a Daikin Altherma low temperature system
- > The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 19dB(A). In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- > Reduced running costs
- > Its low height enables the unit to fit perfectly beneath a window
- > Weekly timer can be set to start heating or cooling anytime on a daily or weekly basis
- > Indoor unit silent operation: "silent" button on the remote control lowers the operation sound of the indoor unit by 3dBA
- > Can be installed against a wall or recessed
- > Powerful mode can be selected for rapid cooling; after the powerful mode is turned off, the unit returns to the preset mode.
- > Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air

**DAIKIN**  
emura

- › Daikin Emura's most obvious asset is its looks. The sober but stylish appearance adds an additional dimension to Daikin's well-known brand values of superior comfort and quality
- › Remarkable blend of iconic design and engineering excellence with an elegant finish in matt crystal white or brushed aluminium
- › Good design award: unique evaluation criterion for industrial design in Japan
- › Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen
- › Extended operation range down to -25°C in heating

SEASONAL EFFICIENCY

Saves cost of energy

nexura

- > The aluminium part of the front panel of the Nexura indoor unit has the capability of warming up, just like a traditional radiator, to add even more comfort on cold days
- > Quiet and discrete, Nexura offers you the best in heating and cooling, in comfort and design
- > The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 23dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- > Comfortable vertical auto swing ensures draughtfree operation and prevents ceiling soiling
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen
- > Can be installed against a wall or recessed
- > Extended operation range down to -25°C in heating

**SEASONAL EFFICIENCY**  
Smart use of energy

- > Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- > High quality matt crystal white finish
- > Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- > Ideal for installation in bedrooms (20,25 class) and larger or irregular shaped living areas (35,42,50 class)
- > 2 area intelligent eye: air flow is sent to a zone other than where the person is located at that moment. If no people are detected, the unit will automatically switch over to the energy-efficient setting.
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen (35,42,50 class)
- > Extended operation range down to -25°C in heating

**down to

**VRV IV**

- › Customize your VRV for best seasonal efficiency & comfort with the weather dependant Variable Refrigerant Temperature function
- › Up to 28% higher seasonal efficiency with Variable Refrigerant Temperature when compared to previous series
- › Best comfort, no cold draft by supply of a high outblow air temperature thanks to Variable Refrigerant Temperature and all inverter technology
- › Continuous comfort: Unique continuous heating technology makes VRV IV the best alternative to traditional heating systems
- › VRV configurator software for the fastest and most accurate commissioning, configuration and customisation
- › Accurate temperature control, fresh air provision, Biddle air curtains and hot water production, all integrated in a single system requiring only one single point of contact
- › Outdoor unit display for quick on-site settings and easy read out of errors together with the indication of service parameters for checking basic functions.
- › Free combination of outdoor units to meet installation space or efficiency requirements
- › Fits any building as also indoor installation is possible as a result of high external static pressure of up to 78.4 Pa. Indoor installation leads to less piping length, lower installation costs, increased efficiency and better visual aesthetics
- › Simplified installation & guaranteed optimal efficiency with automatic charging & testing
- › Easy compliance with F-gas regulation thanks to automated refrigerant containment check
- › Wide piping flexibility: 30m indoor height difference, maximum piping length: 190m, total piping length: 1,000m
- › The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- › Spread your installation cost by phased installation
- › Wide range of indoor units: possibility to combine VRV with stylish indoor units (Daikin Emura, Nexura, ...)
- › Keep your system in top condition via our ACNSS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage
- › Available as heating only by irreversible field setting

**VRV III-C**

RTSYQ14-16PA

- > First system in the industry developed for heating operation in low ambient conditions, making it suitable for single source heating
- > Extended operation range down to -25°C in heating

- > High COP values at low ambients thanks to the two stage compression technology (COP values of 3.0 and more at -10°C)
- > Improved comfort thanks to shorter defrost time
- > Shorter heat up time compared to standard VRVIII heat pump
- > Easy installation thanks to automatic refrigerant charging operation, automatic test operation
- > Connectable to all VRV indoor units, ventilation and control systems
- > Keep your system in top condition via our ACNSS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage

RWEYQ-8-10T

**VRV IV W-series**

- › Reduced CO<sub>2</sub> emissions thanks to the use of geothermal energy as a renewable energy source
- › No need for an external heating or cooling source when used in geothermal mode
- › Suitable for multi-storey and large buildings because of the hardly unlimited possibilities of water piping
- › 2-stage heat recovery: first stage between indoor units, second stage between outdoor units thanks to the storage of energy in the water circuit
- › Customize your VRV for best seasonal efficiency & comfort with the weather dependant Variable Refrigerant Temperature function
- › Increased seasonal efficiency with Variable Refrigerant Temperature when compared to previous series
- › Best comfort, no cold draft by supply of a high outblow air temperature thanks to Variable Refrigerant Temperature and all inverter technology
- › High heating efficiency at low water entering temperatures in geothermal mode
- › Simultaneous cooling and heating from one system
- › VRV configurator software for the fastest and most accurate commissioning, configuration and customisation
- › Accurate temperature control, fresh air provision, air handling units Biddle air curtains and hot water production, all integrated in a single system requiring only one single point of contact
- › Compact design (stacked configuration possible)
- › The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- › Spread your installation cost by phased installation
- › Keep your system in top condition via our ACNSS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage
- › Easy compliance with F-gas regulation thanks to automated refrigerant containment check
- › European-optimised design and manufactured in Europe for short lead-in times
- › Variable Water Flow control option increases flexibility and control

# Ururu Sarara

To enjoy year-round comfort, you need more than just temperature control, you need control over the humidity level, combined with the supply of fresh clean air. Daikin's new Ururu Sarara, with its perfect combination of humidification, dehumidification, ventilation and purification provides exactly the room comfort you want, any time of the year. A bit of humidification in winter avoids sore throats and dry skin. Dehumidification in summer makes you feel more comfortable even with higher temperatures. Besides that, the Ururu Sarara brings in fresh air, but not without removing dust, pollen and smoke thanks to the special air purification techniques.

## 5 Air treatment techniques in 1 system

Cooling & heating, ventilation, air purification, humidification and dehumidification.

## Low environmental impact

With an SEER & SCOP of A+++ on the entire range and by using a low GWP refrigerant, R32 GWP is approximately one third of R-410A GWP, Daikin Ururu Sarara delivers a lower environmental impact.

## SEER + SCOP

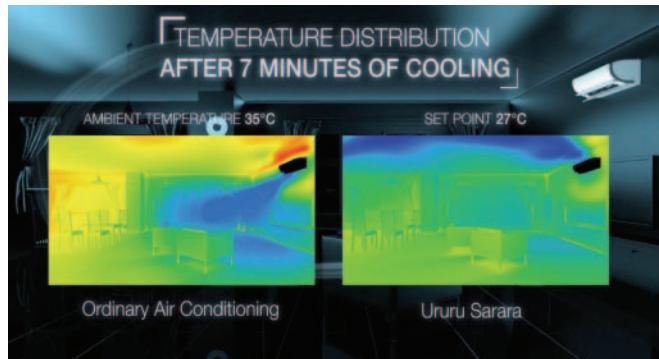

on the entire range

## Total comfort solution

Thanks to its auto-cleaning filter, an improved air flow pattern 2-area intelligent eye and its user friendly remote control.

NEW

## Award winning design

Daikin Ururu Sarara has been awarded with the prestigious Reddot design award 2013

FTXZ-N

RXZ-N

reddot design award  
winner 2013

- > SEER + SCOP = A+++ on the entire range
- > Unique combination of humidification, dehumidification, ventilation, air purification and heating & cooling in 1 system
- > Enhanced comfort thanks to 2-area intelligent eye, improved airflow pattern and user friendly control
- > Reddot design award winner 2013
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen
- > First R32 air-to-air heat pump in the European market

## Optimal design and comfort for the whole home

### Integrated design

- › Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- › High quality matt crystal white finish.
- › New remote control design, in the same high quality matt white finish to create a perfect match with the indoor unit.

### Top performance

The FTXS-K series delivers top performance with seasonal energy efficiency ratings up to A++ and they are equipped with a weekly timer and intelligent eye to generate further energy savings. The weekly timer allows you to programme your unit so that it best suits your needs, whereas the intelligent eye detects the presence of people in the room and activates the economy mode when no one is there.

### The right indoor for the right room

We have a full range of wall units to provide optimal design and comfort in any room in your home.

Our small wall mounted units (CTXS15,35K and FTXS20,25K) are optimised for the modern bedroom.

- › Recognising the trend for less spacious bedrooms and better insulation, we extended our range with the 15 class to deliver exactly the right comfort in smaller rooms.
- › In general, silence is even more important in bedrooms than in living areas: our small wall mounted series go almost unnoticed with operating sound levels as low as 19dBA.

Our larger wall mounted units (FTXS35, 42, 50K) deliver perfect comfort to your living area.

- › The new discharge air pattern - using the 'Coanda effect' - provides a greater airflow length ensuring perfect comfort in every corner of your living room.
- › The two-area intelligent eye detects where people are located in the room and can project the airflow away from the occupants to avoid direct draught.
- › To optimize your comfort even further the new wall mounted series are whisper quiet.

FTXS20-25K//CTXS15-35K

RXS20-42L

ARC466A6

- > Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- > High quality matt crystal white finish
- > Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- > Ideal for installation in bedrooms (20,25 class) and larger or irregular shaped living areas (35,42,50 class)
- > 2 area intelligent eye: air flow is sent to a zone other than where the person is located at that moment; if no people are detected, the unit will automatically switch over to the energy-efficient setting (FTXS35,42,50K)
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen (FTXS35,42,50,60,71)
- > Improved air discharge pattern, using the Coanda effect

FTX-JV

RX-JV

ARC433A8

- › Energy saving during standby mode: reduces current consumption by about 80% when operating in standby (JV range only)
- › Comfort mode guarantees draught free operation by preventing that warm or cold air is directly blown on to the body (JV range only)
- › Whisper quiet operation: down to 22dBA sound pressure level
- › Titanium apatite photocatalytic air purification filter removes airborne microscopic particles, powerfully decomposes odours and helps to prevent the propagation of bacteria, viruses, microbes to ensure a steady supply of clean air
- › Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen (50 till 71 class only)

**SEASONAL EFFICIENCY**  
Smart use of energy

- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

- Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- Low energy consumption thanks to DC fan motor
- 3 fan speeds can be freely selected

# nexura

The best of two worlds united

Pure comfort and design

## COMFORT IS KEY

Nexura makes your world a comfortable one. The coolness of a summer breeze or the cosiness of an extra heat source brings a feeling of well-being to your living space all year round. Its unobtrusive yet stylish design with a front panel that radiates additional heat, its low noise level and reduced air flow turn your room into a haven.

FVXG-K

ARC466A2

SEASONAL EFFICIENCY

Smart use of energy

nexura

- > The aluminium part of the front panel of the Nexura indoor unit has the capability of warming up, just like a traditional radiator, to add even more comfort on cold days
- > Quiet and discrete, Nexura offers you the best in heating and cooling, in comfort and design
- > The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 23dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- > Comfortable vertical auto swing ensures draughtfree operation and prevents ceiling soiling
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen
- > Can be installed against a wall or recessed

nexura

- > The aluminium part of the front panel of the Nexura indoor unit has the capability of warming up, just like a traditional radiator, to add even more comfort on cold days
- > Quiet and discrete, Nexura offers you the best in heating and cooling, in comfort and design
- > The indoor unit distributes air at the sound of a whisper. The noise produced amounts to barely 23dB(A) in cooling and 19dB(A) in radiant heat mode. In comparison, the ambient sound in a quiet room amounts to 40dB(A) on average.
- > Comfortable vertical auto swing ensures draughtfree operation and prevents ceiling soiling
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen
- > Can be installed against a wall or recessed
- > Extended operation range down to -25°C in heating

down to  
-25°C

**SEASONAL EFFICIENCY**  
Smart use of energy

- > Discreet, modern design. Its smooth curve blends beautifully with the wall resulting in an unobtrusive presence that matches all interior décors.
- > High quality matt crystal white finish
- > Whisper quiet in operation: the operating of the unit can hardly be heard. The sound pressure level goes down to 19dBA!
- > Ideal for installation in bedrooms (20,25 class) and larger or irregular shaped living areas (35,42,50 class)
- > 2 area intelligent eye: air flow is sent to a zone other than where the person is located at that moment. If no people are detected, the unit will automatically switch over to the energy-efficient setting.
- > Online controller (optional): control your indoor unit from any location via smartphone, laptop, pc, tablet or touch screen (35,42,50 class)
- > Extended operation range down to -25°C in heating

**down to

# Multi model applications

## MXS

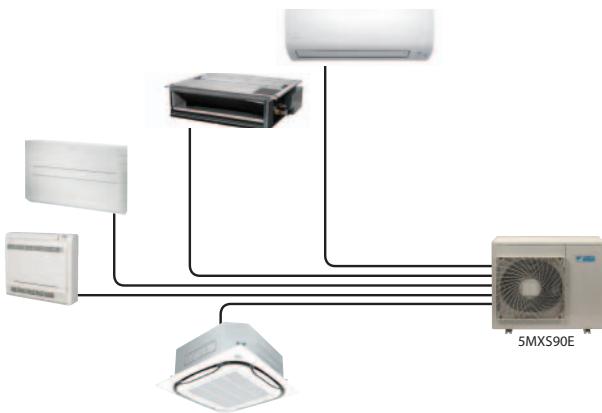

### INSTALLATION FLEXIBILITY

A very wide range is available, from 2-port to 5-port units, making all applications possible. Up to 5 indoor units can be connected to 1 multi outdoor unit. All indoor units can be individually controlled with remote control and do not need to be installed in the same room or even at the same time. The outdoor units are neat and sturdy and can be mounted easily on a roof or terrace or simply placed against an outside wall.

### WIDE CHOICE

It is possible to combine different types of indoor units: wall mounted, floor standing, round flow cassette, ceiling suspended, flexi type, concealed ceiling, 4-way blow cassette.

Outdoor multi split units are fitted with the Daikin swing compressor, renowned for its low noise and high energy efficiency.

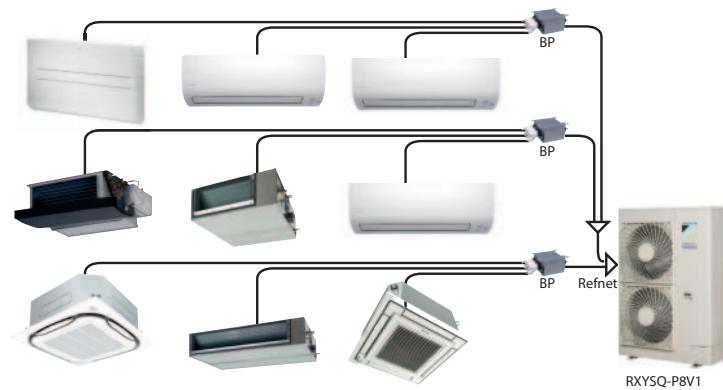

## RXYSQ

### INSTALLATION FLEXIBILITY

Up to 9 indoor units can be connected to 1 multi outdoor unit. All indoor units can be individually controlled with remote control and do not need to be installed in the same room or even at the same time. Narrow refrigerant piping makes handling and connecting easier, resulting in significantly reduced installation time. The REFNET joint reduces the amount of work involved in installation and increases the reliability of the system. A maximum total piping length of 145m offers much more flexibility in the choice of installation position for the indoor units and greatly simplifies system planning. The Branch Provider (BP) unit varies the refrigerant volume to meet the cooling or heating requirements of a room.

### WIDE CHOICE

It is possible to combine different types of indoor units: wall mounted, floor standing, round flow cassette, ceiling suspended, flexi type, concealed ceiling.

- › Wide range from 2 to 5 port units
  - › Possibility to connect up to 5 indoor units
  - › 3-port 40 multi outdoor unit gives an answer to lower capacity requirements of better insulated houses. The 15-class wall mounted allows efficient distribution of the lower capacity of the multi outdoor unit.
  - › All indoor units can be individually controlled and do not need to be installed in the same room or even at the same time
  - › Outdoor units are fitted with a Daikin swing compressor renowned for its low noise and high energy efficiency
  - › Possibility to combine different types of indoor units: wall mounted, floor standing, concealed ceiling, ceiling suspended units, round flow or 4-way blow cassettes

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected an indoor unit is up to 7.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5kW: wall mounted FTXS-K series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature). 35°CDB (Outdoor Temperature).

Heating capacity is based on 20°CDB (Indoor temperature). 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected a indoor unit is up to 9.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature). 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature). 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected a indoor unit is up to 11.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0 kW class: wall mounted G series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature). 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature). 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected a indoor unit is up to 11.0kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0 kW class; wall mounted G series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected a indoor unit is up to 14.5kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0, 7.1 kW class; wall mounted G series

Notes: 1. Cooling capacity is based on 27°CDB/19°CWB (Indoor temperature), 35°CDB (Outdoor temperature).

Heating capacity is based on 20°CDB (Indoor temperature), 7°CDB/6°CWB (Outdoor temperature).

2. The total ability of connected a indoor unit is up to 14.5kW.

3. It is impossible to connect the indoor unit for one room only.

4. The above is the value for connecting with the following indoor units.

1.5kW: wall mounted CTXS-K series; 2.0, 2.5, 3.5, 4.2, 5.0kW: wall mounted FTXS-K series

6.0, 7.1 kW class; wall mounted G series

- > Energy efficient heating system based on air source heat pump technology
- > Low energy bills and low CO<sub>2</sub> emissions
- > Possibility to connect up to 9 indoor units
- > All indoor units can be individually controlled and do not need to be installed in the same room or even at the same time
- > Possibility to combine different types of indoor units: wall mounted, floor standing, concealed ceiling, ceiling suspended units, round flow or 4-way blow cassettes
- > Slim design for flexible installation
- > 3 steps in night quiet mode: step 1: 47dBA, step 2: 44 dBA, step 3: 41 dBA
- > Easy installation thanks to automatic refrigerant charging operation, automatic test operation
- > Possibility to limit peak power consumption between 30 and 80%, for example during periods with high power demand

# Products overview - Sky Air

Indoor units      Pair, twin, triple & double twin application

Type	Model	Product name	
Ceiling mounted cassette	High COP, round flow cassette Auto cleaning function <sup>2</sup> , presence & floor sensor <sup>2</sup>	FCQHG-F	
	Round flow cassette Auto cleaning function <sup>2</sup> , presence & floor sensor <sup>2</sup>	FCQG-F	
	Fully flat cassette presence & floor sensor <sup>2</sup>	FFQ-C	
Concealed ceiling	Concealed ceiling unit	FDBQ-B	
	Inverter driven concealed ceiling unit	FBQ-C8 <sup>1</sup>	
	Large concealed ceiling unit	FDQ-C	
	Large concealed ceiling unit	FDQ-B <sup>1</sup>	
Wall mounted	Wall mounted unit	FAQ-C	
Ceiling suspended	Ceiling suspended unit	FHQ-C	
	4-way blow ceiling suspended unit	FUQ-C	
Floor standing	Floor standing unit	FVQ-C	
<i>Siesta</i>	Siesta, 4-way blow ceiling mounted cassette	ACQ-C	
	Siesta, Concealed ceiling unit	ABQ-C	
	Siesta, Ceiling suspended cassette	AHQ-C	

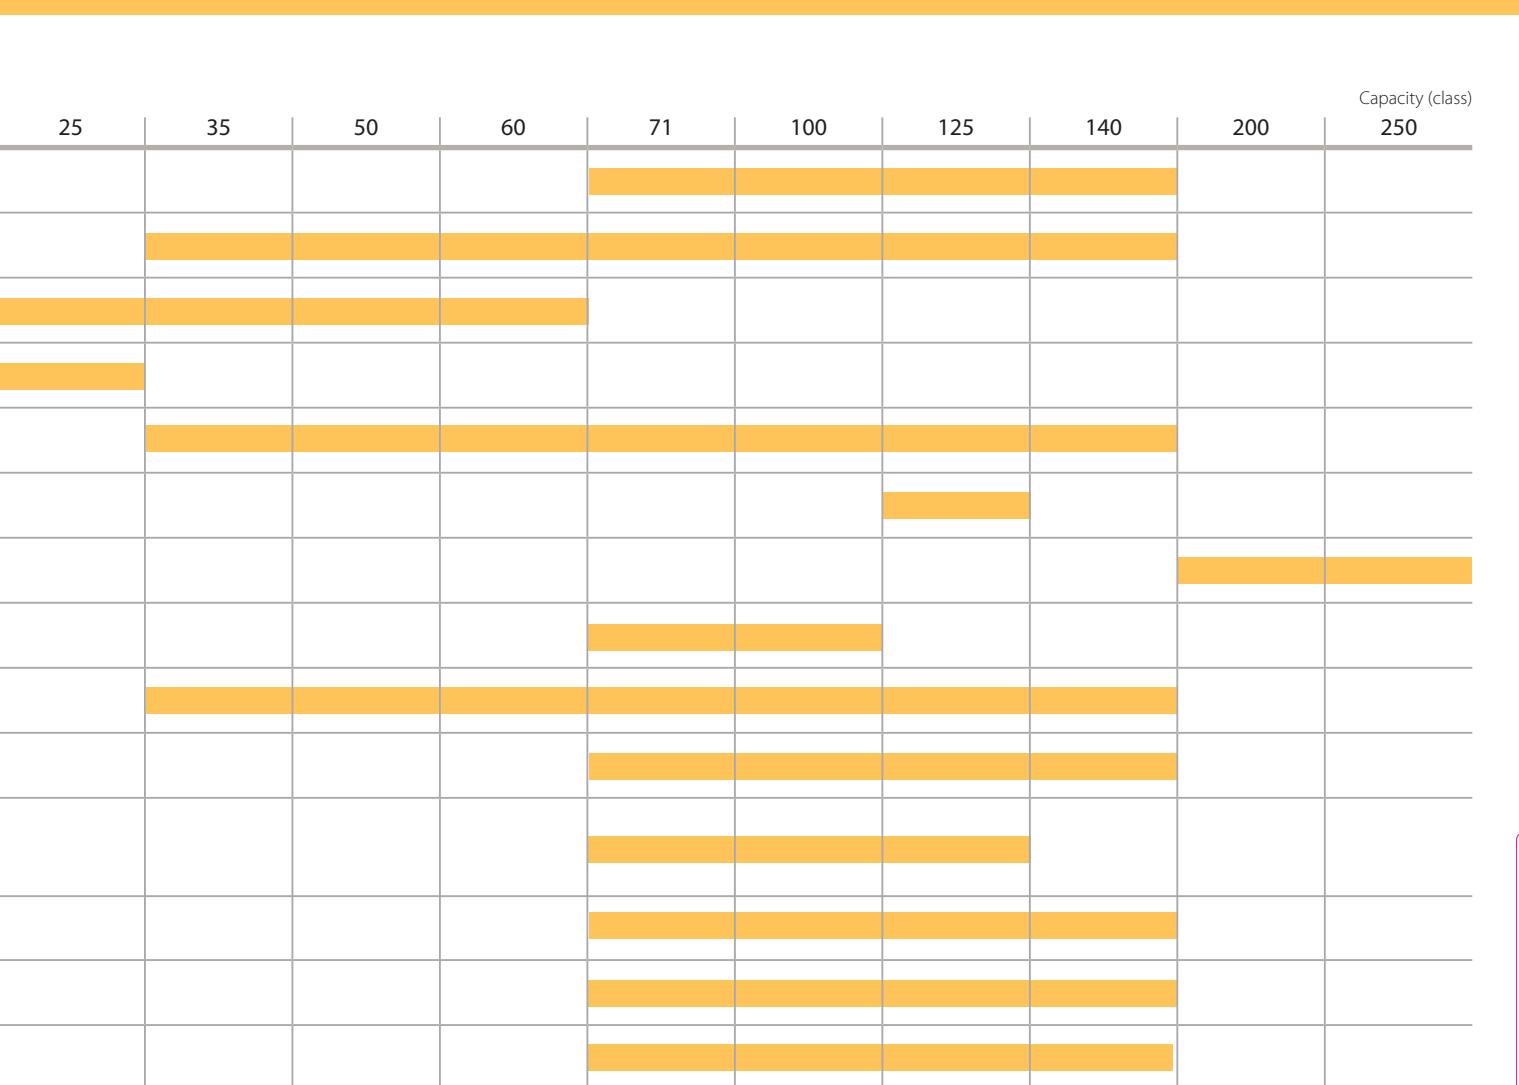

1) Twin, triple, double twin application is only possible up to 125 class    2) Optional

# Round flow cassette

## Round flow cassette: setting the standard for efficiency and comfort

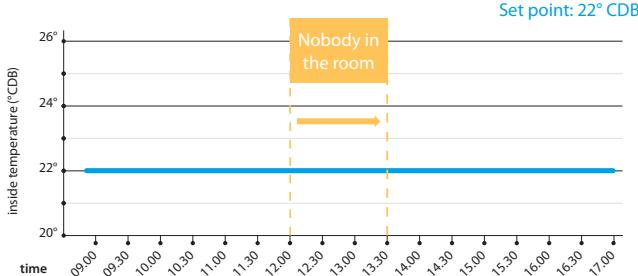

The round flow cassette is designed for use in all forms and sizes of commercial offices & retail environments. Today, Daikin has improved its technology even further to enhance your comfort and provide you better energy efficient models.

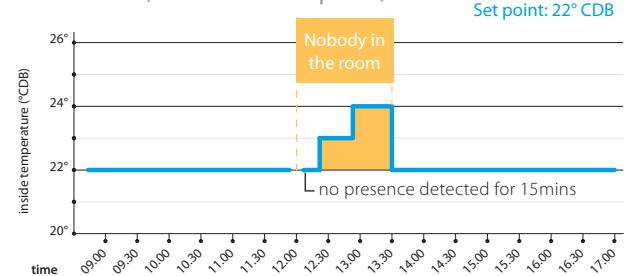

### Even more energy efficient...

- With the optional infrared **presence sensor** the set point can be adjusted or the round flow cassette switched off when there is nobody in the room. Up to **27% energy can be saved** (estimated) with this new function. If no presence is detected in the room for 15mins, the set temperature is changed until a minimum temperature (for heating) or maximum temperature (for cooling) is reached. When selecting the setback function, the unit will maintain the temperature within a preset minimum and maximum temperature, when there is no presence detected in the room for 1 hour.

#### Without sensor

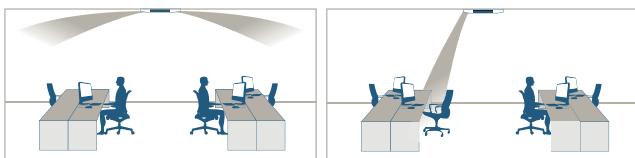

#### With sensor (BRC1E52A/B required)

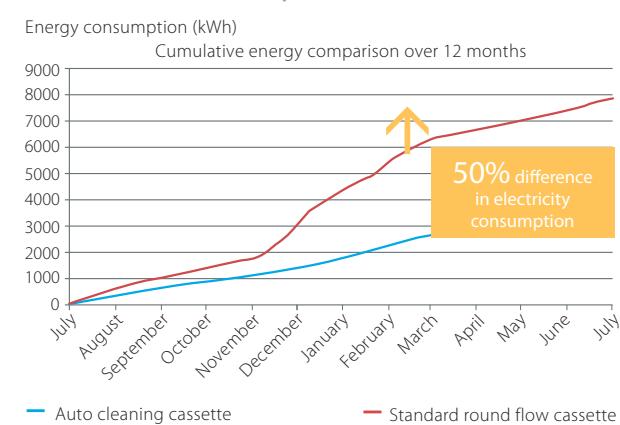

### ... and improved comfort

- With the optional infrared **floor sensor** having cold feet will become history. This sensor detects the average floor temperature and ensures even temperature distribution between ceiling and floor.
- The **presence sensor** directs air flow away from any person detected in the room, when the air flow control is on.

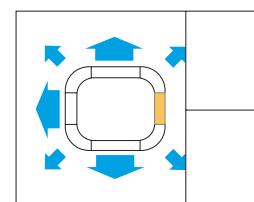

- The **unique 360° airflow** discharge pattern ensures a uniform temperature distribution across the room without dead corners.

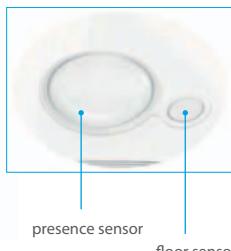

#### Test site, Wolverhampton, UK

### Flexible installation

- When refurbishing or rearranging the interior of your office, shop or other area, you no longer need to change the location of your indoor unit. With the round flow cassette one flap can be easily closed via the wired remote controller (BRC1E52A/B – optional). Optional closure kits are available as well.

Preliminary

- The round flow cassette provides a more comfortable environment and offers greater savings in energy consumption to shop, office and restaurant owners
- 360° air discharge** ensures uniform air flow and temperature distribution
- Modern style decoration panel is available in 3 different variations: pure white (RAL9010) auto cleaning panel, pure white (RAL9010) standard panel with grey louvers and pure white (RAL9010) standard panel with white louvers
- Daikin introduces first **auto cleaning cassette** to European market.
- Higher efficiency and comfort thanks to daily auto cleaning of the filter.
- Lower maintenance costs thanks to auto cleaning function.
- Easy dust removal with vacuum cleaner without opening the unit.
- The **presence sensor** (optional) : adjusts the temperature or switches off the unit when there is nobody in the room - ensures the air flow is directed away from any person detected in the room, when the air flow control is activated
- The **floor sensor** (optional) detects the average floor temperature and ensures even temperature distribution between ceiling and floor. Cold feet will become history.
- Individual flap control:** one flap can be easily closed via the wired remote control (BRC1E52) in case you would refurbish or rearrange your interior
- Fresh air intake: up to 20 %
- No optional adapter needed for DIII-connection**, link your unit into the wider building management system.

> **High COP cassette ensures top energy performance**

- The round flow cassette provides a more comfortable environment and offers greater savings in energy consumption to shop, office and restaurant owners
- 360° air discharge** ensures uniform air flow and temperature distribution
- Modern style decoration panel is available in 3 different variations: pure white (RAL9010) auto cleaning panel, pure white (RAL9010) standard panel with grey louvers and pure white (RAL9010) standard panel with white louvers
- Daikin introduces first **auto cleaning cassette** to European market.
- Higher efficiency and comfort thanks to daily auto cleaning of the filter.
- Lower maintenance costs thanks to auto cleaning function.
- Easy dust removal with vacuum cleaner without opening the unit.
- The **presence sensor** (optional) : adjusts the temperature or switches off the unit when there is nobody in the room - ensures the air flow is directed away from any person detected in the room, when the air flow control is activated
- The **floor sensor** (optional) detects the average floor temperature and ensures even temperature distribution between ceiling and floor. Cold feet will become history.
- Individual flap control:** one flap can be easily closed via the wired remote controller (BRC1E52) in case you would refurbish or rearrange your interior
- Fresh air intake: up to 20 %
- No optional adapter needed for DIII-connection**, link your unit into the wider building management system.

## Fully flat cassette

Design & Genius  
in one

Unique in the market, the fully flat cassette is a remarkable blend of iconic design and engineering excellence with an elegant white or a silver and white finish. Fitting flush within the ceiling modules and fully flat with the ceiling itself, the cassette is both stylish and unobtrusive. Superb efficiency and comfort is delivered through the combined use of floor and presence sensors and, when necessary, the individual flap control via the wired remote controller makes it simple to close one flap.

FFQ-C (white panel)

FFQ-C (silver and white panel)

RXS-L

BRC1E52A/B

BRC7F530W

- > **Unique design in the market: integrates fully flat into the ceiling** and fits flush into architectural ceiling modules
- > Remarkable blend of iconic design and engineering excellence with an elegant finish in white or a combination of silver and white
- > The **presence sensor** (optional) adjusts the set point with standard 1°C if no one is detected in the room, it is possible to adjust the set point with 2, 3 or 4°C (optional). It also automatically directs air flow away from any person to avoid draught.
- > The **floor sensor** (optional) detects the average floor temperature and ensures even temperature distribution between ceiling and floor. Cold feet will become history.
- > **Individual flap control:** one flap can be easily closed via the wired remote control (BRC1E52) in case you would refurbish or rearrange your interior
- > Low energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Fresh air intake for healthy living
- > **No optional adapter needed for DIII-connection,** link your unit into the wider building management system.

BRC1E52A/B

BRC4C65

- > Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- > Easy installation thanks to automatic air flow adjustment towards nominal air flow rate
- > Reduction in power consumption thanks to DC inverter fans
- > Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- > Up to 120Pa external static pressure facilitates using flexible ducts of varying lengths: ideal for shops and medium size offices
- > Whisper quiet operation: down to 29dBA sound pressure level
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.
- > The air suction direction can be altered from rear to bottom suction
- > Standard built-in drain pump increases reliability of the drain system

SEASONAL EFFICIENCY  
Smart use of energy

- > Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- > Easy installation thanks to automatic air flow adjustment towards nominal air flow rate
- > Reduction in power consumption thanks to DC inverter fans
- > Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- > Up to 120Pa external static pressure facilitates using flexible ducts of varying lengths: ideal for shops and medium size offices
- > Whisper quiet operation: down to 29dBA sound pressure level
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.
- > The air suction direction can be altered from rear to bottom suction
- > Standard built-in drain pump increases reliability of the drain system

- > Ideal solution for commercial spaces with narrow or no false ceilings
- > The unit can easily be mounted in corners and narrow spaces, as it only needs 30mm lateral service space
- > Low energy consumption thanks to DC fan motor and drain pump
- > Stylish unit blends easily with any interior, as the flaps close entirely when not in operation
- > Can be installed in both new and existing buildings
- > Wider air discharge thanks to Coanda effect: up to 100°

- > Air flow distribution for ceiling heights up to 3.8m without capacity loss
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.

**SEASONAL EFFICIENCY**  
Smart use of energy

- > Ideal solution for commercial spaces with no or narrow false ceilings
- > Low energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Stylish unit blends easily with any interior, as the flaps close entirely when not in operation
- > Improved comfort thanks to automatic air flow adjustment to required load
- > Individual flap control: one flap can be easily closed via the wired remote control (BRC1E52) in case you would refurbish or rearrange your interior
- > Can be installed in both new and existing buildings
- > Same outlook for all models (unified dimensions)
- > Auto swing function ensures efficient air and temperature distribution
- > Air can be discharged in 5 different angles between 0 and 60°

- > Possibility to shut 1 or 2 flaps for easy installation in corners

- > Air flow distribution for ceiling heights up to 3.5m without capacity loss
- > No optional adapter needed for Dll-connection, link your unit into the wider building management system.

**SEASONAL EFFICIENCY**  
Smart use of energy

- > Ideal solution for shops, restaurants or offices with no or narrow false ceilings
- > Can be installed in both new and existing buildings
- > Very efficient for use in rooms with high ceilings
- > Decrease of temperature variation by automatic fan speed selection or freely selectable 3-step fan speed.
- > Improved comfort as a result of better airflow distribution from the vertical out blow which allows manual adjustment of air outlet blades at the top of the unit. Selectable horizontal out blow to better suit the layout of the room (via BRC1E52).
- > Improved efficiency by adoption of the DC fan motor.
- > No optional adapter needed for Dlll-connection, link your unit into the wider building management system.

*Siesta*

- > 3-D air flow combines vertical and horizontal auto swing to circulate a stream of warm or cool air right to the corners of even large spaces
- > Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- > Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- > Compact dimensions, can easily be mounted in a narrow ceiling void
- > Air filter removes airborne dust particles to ensure a steady supply of clean air
- > Easy installation and maintenance

UATYQ-CY1

Remote control

- › Easy to install 'plug and play' concept plus single installation configuration; no additional piping is required since indoor and outdoor sides are pre-connected
- › High efficiency and reliable scroll compressor
- › Wide operating range
- › Flat top unit design allows maximum use of warehouse and container space
- › Free cooling and fresh air intake possible with optional economiser
- › Convertible return and supply air: fan can be mounted in two directions
- › Factory pre-charged refrigerant ensures clean and efficient operation
- › Belt driven fan enables air volume and static pressure to be adjusted as required.
- › Adjustable fan pulley as standard to meet a wide range of supply air volumes and external static pressures
- › Anti-corrosion treated coil

## 3 revolutionary standards

- ✓ Variable refrigerant temperature
- ✓ Continuous comfort during defrost
- ✓ VRV configurator

- ✓ Improved mix mode efficiency
- ✓ Improved flexibility
- ✓ Connectable to HT and LT hydroboxes
- ✓ Free combination of outdoor units and BS boxes
- ✓ Improved installation speed
- ✓ Fully redesigned multi BS boxes

**VRV IV**  
**Heat recovery**

The VRV air conditioning system is the world's first individual air conditioning system with variable refrigerant flow control and was commercialized by Daikin in 1982. VRV is the trademark of Daikin Industries, Ltd, which is derived from the technology we call "variable refrigerant volume".

For more information on Options & Accessories, please refer to page 356 of this catalogue.

# Total solution concept

The Daikin VRV Total Solution provides a single point of contact for the design and maintenance of your integrated climate control system. Our modular units enable you to select the right mix of equipment and technology to ensure that you achieve the optimal balance of temperature, humidity and air freshness for the perfect comfort zone with maximum energy efficiency and cost effectiveness.

Wide range of indoor units that fit rooms of any size and shape

- > Perfect comfort
- > Whisper-quiet operation
- > Stylish design
- > Concealed installation possible

## USER FRIENDLY CONTROL SYSTEMS

Full control for maximum efficiency

- > From individual control to the management of multiple buildings
- > User friendly touch screen control
- > Remote control & monitoring via internet
- > Zone control
- > Energy management tools
- > Easy F-gas compliance via remote refrigerant containment check

SAVE UP TO 15%  
COMPARED TO  
TRADITIONAL  
SYSTEMS

## VRV OUTDOOR UNITS

Integrated heat pump solution

- › Solution for every climate from -25°C to +52°C<sup>1</sup>
- › Flexible to fit any building
- › Can be customized to your specific needs to achieve the highest seasonal efficiency
- › The new standard in heating comfort

<sup>1</sup> Contact your local dealer

## AIR SEPARATION THROUGH AIR CURTAINS

A highly efficient solution to doorway climate separation

- › Most efficient open-door solution
- › Air curtain heating for free
- › Year-round comfort, even on the most demanding days

## VENTILATION

Create a high-quality indoor environment

- › Heat is reclaimed between out and indoor air
- › Free cooling
- › Optimum control of humidity
- › Air filtration ensures a steady supply of clean air
- › Complete plug & play solution to connect to air handling units available

## HOT WATER

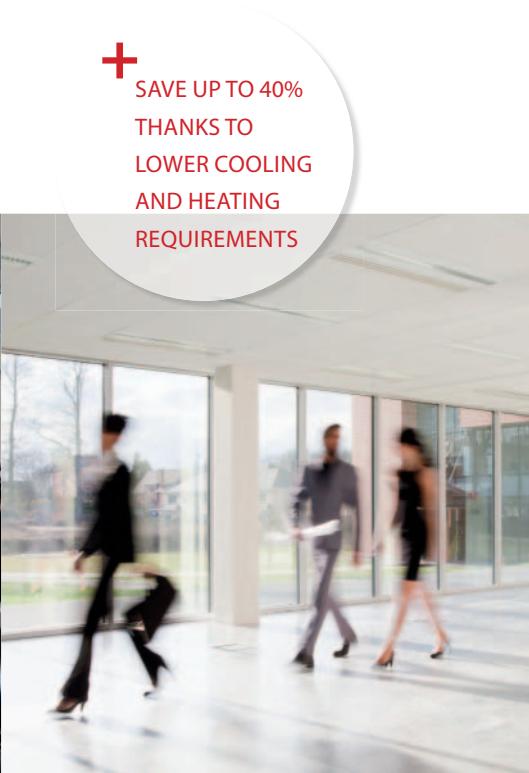

Use renewable energy to produce hot water

- › Free heating of water possible
- › Possibility to combine with solar panels
- › Hot water for showers, sinks, tap water for cleaning, under floor heating or radiators
- › Hot water up to 80°C

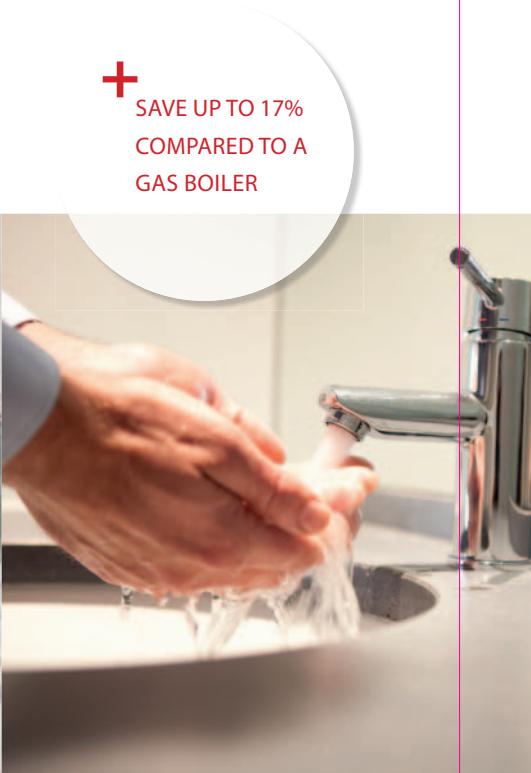

**+ SAVE UP TO 72% COMPARED TO AN ELECTRIC AIR CURTAIN**

**+ SAVE UP TO 40% THANKS TO LOWER COOLING AND HEATING REQUIREMENTS**

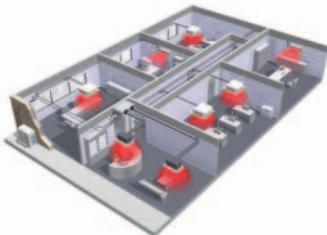

**+ SAVE UP TO 17% COMPARED TO A GAS BOILER**

# Which VRV outdoor system offers me the best solution?

## Air cooled outdoor systems

### VRV HEAT PUMP

- For either heating or cooling operation from one system

#### VRV IV HEAT PUMP

- Customize your VRV for best seasonal efficiency & comfort with Variable Refrigerant Temperature
- Continuous comfort: Unique continuous heating technology makes VRV IV the best alternative to traditional heating systems
- VRV configurator software for the fastest and most accurate commissioning, configuration and customisation
- Wide range of indoor units: possibility to combine VRV with stylish indoor units (Daikin Emura, Nexura, ...)

#### OTHER VRV HEAT PUMPS

VRVIII-S	VRVIII-C	VRV CLASSIC
<p>VRVIII-S Heat Pump</p> <ul style="list-style-type: none"><li>Especially designed for small capacities</li><li>Space saving design</li><li>Either connect VRV or stylish indoor units: Daikin Emura, Nexura...</li></ul>	<p>VRV Heat Pump optimised for heating</p> <ul style="list-style-type: none"><li>First system in the industry developed for heating operation at low ambient conditions.</li><li>Extended operation range for heating down to -25°C</li><li>Stable heating capacity and high efficiencies at low ambient temperatures (COP &gt; 3 at -10°C outdoor temperature)</li></ul>	<p>VRV Classic</p> <ul style="list-style-type: none"><li>For smaller projects with standard cooling &amp; heating requirements</li><li>Connectable to all VRV indoor units, controls and ventilation</li></ul>

### VRV HEAT RECOVERY

- For simultaneous heating and cooling from one system
- Heat exhausted from indoor units in the cooling cycle is merely transferred to units in areas requiring heat, maximising energy efficiency, reducing electricity costs and leading to high partload efficiencies (up to 9<sup>1</sup>).
- Operation range in cooling down to -20°C (technical cooling)

SMALL FOOTPRINT COMBINATION	HIGH COP COMBINATION	VRV heat recovery, with connection to HEATING ONLY HYDROBOX
<ul style="list-style-type: none"><li>Optimized footprint within heat recovery range</li></ul>	<ul style="list-style-type: none"><li>Top energy efficiency in Daikin heat recovery range</li></ul>	<ul style="list-style-type: none"><li>Fully integrated system</li><li>Free hot water</li></ul>

<sup>1</sup> REYQ8P8 50% cooling – 50% heating load. Conditions: outdoor temperature 11°CDB, indoor temperature 18°CWB, 22°CDB.

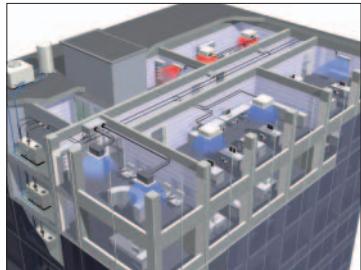

### REPLACEMENT VRV

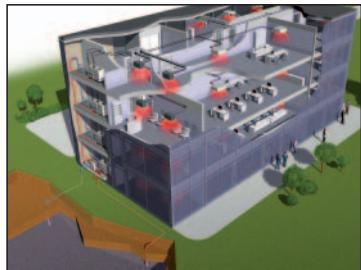

- For cost-effective upgrade from R-22/R-407C to R-410A

- Efficiency gains of more than 70% can be realized compared to R-22/R-407C systems
- Fast & cost effective installation compared to total system replacement (re-use of existing piping and in some cases indoor units)
- Variable Refrigerant Temperature
- VRV configurator
- Available in heat recovery and heat pump

# Water cooled outdoor systems

- › Allows heat recovery within the total building, thanks to the storage of energy in the water circuit.
- › Compact design and stacked configuration possible.
- › Suitable for multi-storey and large buildings because of the hardly unlimited possibilities of water piping.

## VRV IV W-series

- › Unified range for standard and geothermal operation
- › Reduced CO<sub>2</sub> emissions thanks to the use of geothermal energy as a renewable energy source
- › No need for an external heating or cooling source when used in geothermal mode
- › Available in heat pump and heat recovery
- › Variable Water Flow control option increases flexibility and control

## VRV + 3 revolutionary standards

### Variable refrigerant temperature

Customize your VRV for best seasonal efficiency & comfort:

Revolutionary variable refrigerant temperature control automatically adapts the system to individual building and climate requirements for greater efficiency and comfort.

- › **Annual cost savings up to 28%**
- › Optimise the match of building requirements with comfort and efficiency
- › Automatic adjustment of refrigerant temperature guarantees customer satisfaction thanks to elimination of cold draft

### Continuous comfort

The new standard in heating comfort:

Unique continuous heating technology makes VRV IV the best alternative to traditional heating systems.

- › Unique continuous heating during defrost technology
- › The best alternative to traditional heating systems as VRV IV can be used as a monovalent heating system

### VRV configurator

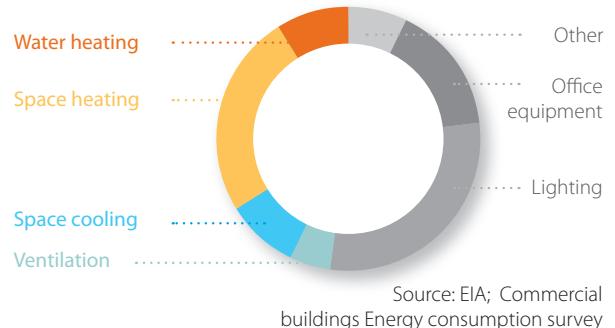

Software for simplified commissioning, configuration and customisation

Simplified commissioning: graphical interface to configure, commission and upload system settings.

- › Less time needed for commissioning
- › Manage multiple systems in exactly the same way
- › Retrieve initial system settings

→ Accurate temperature control, fresh air provision, Biddle air curtains and hot water production, all integrated in a single system requiring only one single point of contact

Manage up to 50% of your building's energy consumption

→ Outdoor unit display for quick on-site settings and easy read out of errors together with the indication of service parameters for checking basic functions.

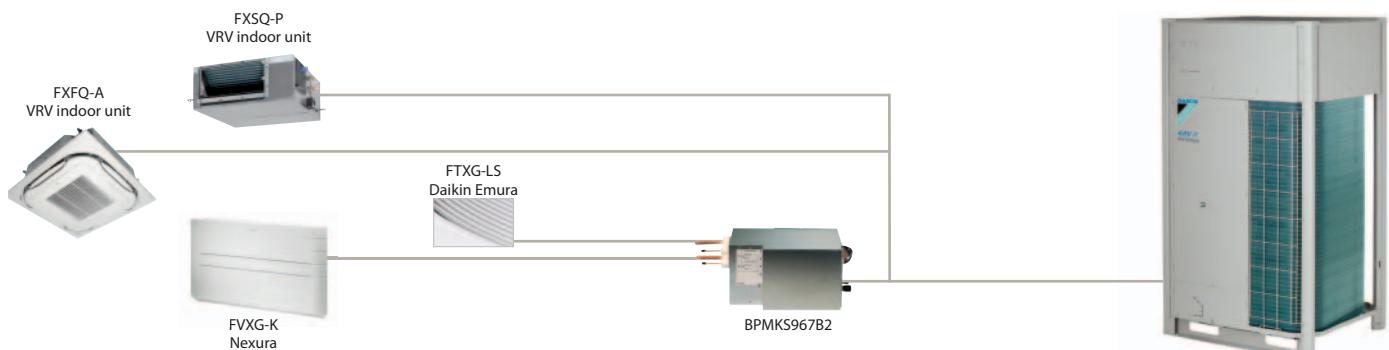

### Simplified servicing

The 7-segment indicator saves time through:

- › easy-to-read error report.
- › indication of basic service parameters to quickly check basic functions.
- › clear menu indicating quick and easy on-site settings.

→ Wide range of indoor units: possibility to combine VRV with stylish indoor units (Daikin Emura, Nexura, ...)

**VRV IV**

- > Customize your VRV for best seasonal efficiency & comfort with the weather dependant Variable Refrigerant Temperature function
- > Up to 28% higher seasonal efficiency with Variable Refrigerant Temperature when compared to previous series
- > Best comfort, no cold draft by supply of a high outblow air temperature thanks to Variable Refrigerant Temperature and all inverter technology
- > Continuous comfort: Unique continuous heating technology makes VRV IV the best alternative to traditional heating systems
- > VRV configurator software for the fastest and most accurate commissioning, configuration and customisation
- > Accurate temperature control, fresh air provision, Biddle air curtains and hot water production, all integrated in a single system requiring only one single point of contact
- > Outdoor unit display for quick on-site settings and easy read out of errors together with the indication of service parameters for checking basic functions.
- > Free combination of outdoor units to meet installation space or efficiency requirements
- > Fits any building as also indoor installation is possible as a result of high external static pressure of up to 78.4 Pa. Indoor installation leads to less piping length, lower installation costs, increased efficiency and better visual aesthetics
- > Simplified installation & guaranteed optimal efficiency with automatic charging & testing
- > Easy compliance with F-gas regulation thanks to automated refrigerant containment check
- > Wide piping flexibility: 30m indoor height difference, maximum piping length: 190m, total piping length: 1,000m
- > The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- > Spread your installation cost by phased installation
- > Wide range of indoor units: possibility to combine VRV with stylish indoor units (Daikin Emura, Nexura, ...)
- > Keep your system in top condition via our ACNSS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage
- > Available as heating only by irreversible field setting

**VRV III-S**

RXYSQ-P8V1 RXYSQ-P8Y1

- > For residential and light commercial applications
- > Energy efficient heating system based on air source heat pump technology
- > Low energy bills and low CO<sub>2</sub> emissions
- > Possibility to connect up to 9 indoor units
- > All indoor units can be individually controlled and do not need to be installed in the same room or even at the same time.
- > Wide range of indoor units: either connect VRV or stylish indoor units such as Daikin Emura, Nexura ...
- > Possibility to combine different types of indoor units: wall mounted, floor standing, concealed ceiling, ceiling suspended, round flow or 4-way blow cassettes
- > Small capacities: 4, 5 & 6HP
- > Slim design for flexible installation
- > 3 steps in night quiet mode: step 1: 47dBA, step 2: 44 dBA, step 3: 41 dBA
- > Easy installation thanks to automatic refrigerant charging operation, automatic test operation
- > Possibility to limit peak power consumption between 30 and 80%, for example during periods with high power demand

**VRV III-C**

RTSYQ14-16PA

- > First system in the industry developed for heating operation in low ambient conditions, making it suitable for single source heating
- > Extended operation range down to -25°C in heating

- > High COP values at low ambients thanks to the two stage compression technology (COP values of 3.0 and more at -10°C)
- > Improved comfort thanks to shorter defrost time
- > Shorter heat up time compared to standard VRVIII heat pump
- > Easy installation thanks to automatic refrigerant charging operation, automatic test operation
- > Connectable to all VRV indoor units, ventilation and control systems
- > Keep your system in top condition via our ACNSS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage

**VRV** Classic

RXYCQ10-12A

- > For smaller projects with standard cooling & heating requirements
- > Fits any building as also indoor installation is possible as a result of high external static pressure of up to 78.4 Pa. Indoor installation leads to less piping length, lower installation costs, increased efficiency and better visual aesthetics
- > The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- > Spread your installation cost by phased installation
- > Connectable to all standard VRV indoor units, controls and ventilation

(1) Connection ratio is 50~120%. If only FXFQ20.25 units are connected, maximum connection ratio is 100%

**VRV III**

REYQ8-16P8/P9

- › Increased EER/COP thanks to the redesigned 8 and 12HP stand alone units and 8HP modular unit
- › Wide range of outdoor units: from 8 to 48HP in 2HP increment steps (21 system combinations)
- › No less than 64 indoor units can be connected to a single system
- › Flexible combination of outdoor units: small footprint combination, high COP combination or any other combination of your choice
- › Continuous heating (resulting in a higher integrated heating capacity)
- › 'High sensible mode': allows the VRV system to work with increased sensible capacity in cooling mode, resulting in higher efficiency and improved comfort
- › Easy installation thanks to automatic refrigerant charging operation, automatic test operation
- › Wide piping flexibility: maximum piping length: 165m, total piping length: 1,000m
- › The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- › Only those areas calling for air conditioning need to be cooled or heated; the system can be shut down completely in unoccupied rooms.
- › Quick cool/heat change over
- › Improved refrigerant containment check
- › 2 steps in night quiet mode: step 1: 50 dBA, step 2: 45 dBA
- › Possibility to extend the operation range in cooling down to -20°C
- › Keep your system in top condition via our ACNNS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage

### The Daikin solution to R-22 phase-out

Replace your R-22 / R-407C outdoor unit with R-410A technology, but keep your refrigerant piping and in some cases your indoor units<sup>1</sup>.

### Plan your system replacement now

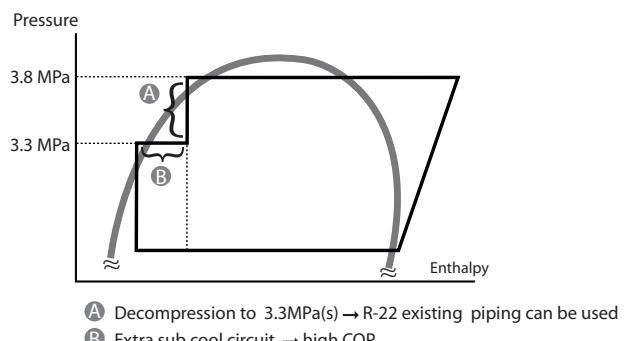

From 01/01/2015 there is a ban on the use of all R-22 for service & maintenance. Daikin advises to replace your system now to prevent unplanned downtime.

### Technologies

#### Reduced pressure

As R-22 VRV systems used to work on a lower pressure than R-410A systems / thus the copper refrigerant piping was also designed for these lower pressures. Therefore the Replacement VRV must operate at lower pressures than the standard VRV series. However thanks to the sub cool circuit a high efficiency level can be kept even with the lower pressures.

#### Customize your VRV for optimal seasonal efficiency

- › Optimise the match of building requirements with comfort and efficiency
- › Automatic adjustment of refrigerant temperature guarantees customer satisfaction

#### VRV configurator software

- › Less time needed for commissioning
- › Manage multiple systems in exactly the same way
- › Retrieve initial system settings

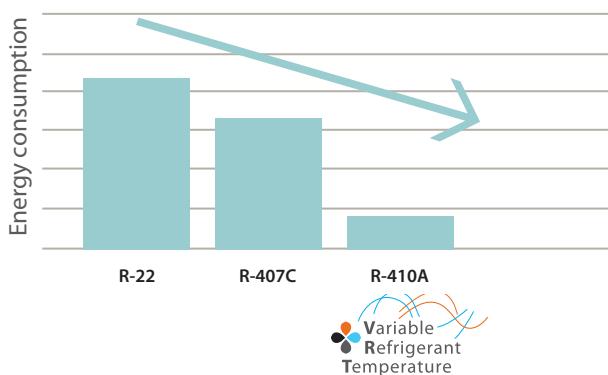

## Increased efficiency

Upgrading an old R-22 system to a Replacement VRV system will result in increased system efficiency. Efficiency gains of more than 70% in cooling can be realized, by virtue of technological developments in current heat pump technology such as variable refrigerant temperature and the more efficient R-410A refrigerant. Increased energy efficiency equals lower energy consumption, subsequent lower energy costs and lower CO<sub>2</sub> emissions.

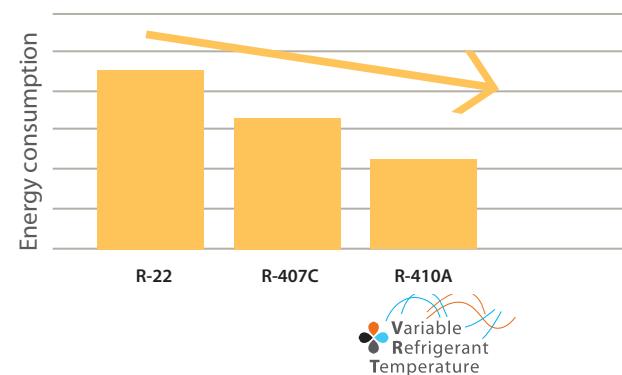

**81%** less consumption in cooling mode

Energy use of a 10HP system in cooling

**48%** less consumption in heating mode

Energy use of a 10HP system in heating

## Environmental awareness

R-410A not only has a zero ozone depletion potential, it is also proven to be more energy efficient than R-22.

## Fast installation

It is not necessary to remove the existing piping and even the indoor units can remain (depending on type of indoor unit). The outdoor unit automatically charges the refrigerant and cleans the refrigerant piping. This unique Daikin feature makes the installation time even shorter.

## Limited and planned-downtime

As the refrigerant piping can be maintained the installation is less intrusive and less time consuming than for a completely new system. Moreover, downtime can be carefully planned: whereas if a problem occurs when not enough reclaimed R-22 is available, a long and unplanned downtime can be the result.

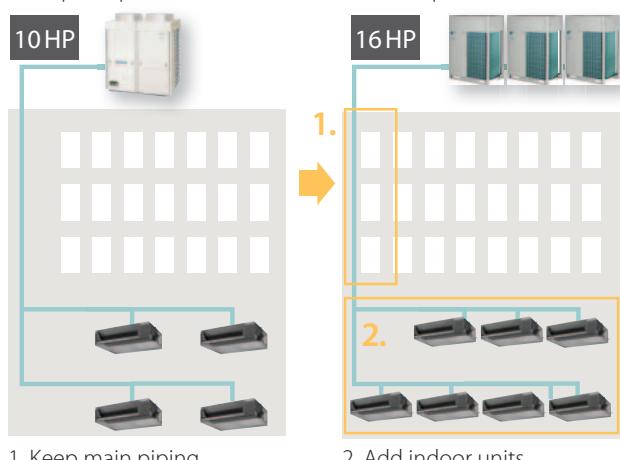

## Limited and phased investment cost

It is possible to spread the various stages of replacement over a certain period of time because the indoor units can remain in most cases. The air conditioning replacement therefore, can be incorporated in the general refurbishment schedule of the building and the investment cost can be spread. A further reduction in installation cost can be achieved by maintaining the old refrigerant copper pipe work.

## Increase capacity

Cooling loads often increase subsequent to the initial installation of the air conditioning system. The Replacement VRV(VRVIII-Q) enables system capacity to be increased without changing the refrigerant piping (depending on system characteristics).

Example: replace a 10HP VRV with a 16HP Replacement VRV unit

## No restrictions on system history

As a result of the combined automatic charging and refrigerant pipe cleaning function, it is possible to ensure a clean piping network, even when a compressor breakdown has previously occurred.

**VRV IV Q-series**

RQCEQ712-848P

- › Cost effective and fast upgrade for R-22 systems as only the outdoor unit needs to be replaced, meaning no work has to be carried out inside your building
- › Efficiency gains of more than 70% can be realized, thanks to technological developments in heat pump technology and the more efficient R-410A refrigerant
- › Possibility to add indoor units and increase capacity without changing the refrigerant piping
- › Less intrusive and time consuming installation compared to installing a new system, as the refrigerant piping can be maintained in most cases
- › Possibility to spread the various stages of replacement thanks to the modular design of the VRV system
- › Keep your system in top condition via our ACNNS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage

(1) Actual number of connectable indoor units depends on the indoor unit type (VRV indoor, Hydrobox, RA indoor, etc.) and the connection ratio restriction for the system (50% <= CR <= 130%) (2) The STANDARD ESEER value corresponds with normal VRV4 Heat Pump operation, not taking into account advanced energy saving operation functionality (3) The AUTOMATIC SEER value corresponds with normal VRV4 Heat Pump operation, taking into account advanced energy saving operation functionality (variable refrigerant temperature control operation)

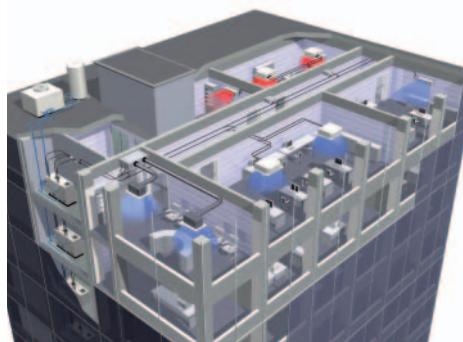

RWEYQ-8-10T

**VRV IV W-series**

- > Reduced CO<sub>2</sub> emissions thanks to the use of geothermal energy as a renewable energy source
- > No need for an external heating or cooling source when used in geothermal mode
- > Suitable for multi-storey and large buildings because of the hardly unlimited possibilities of water piping
- > 2-stage heat recovery: first stage between indoor units, second stage between outdoor units thanks to the storage of energy in the water circuit
- > Customize your VRV for best seasonal efficiency & comfort with the weather dependant Variable Refrigerant Temperature function
- > Increased seasonal efficiency with Variable Refrigerant Temperature when compared to previous series
- > Best comfort, no cold draft by supply of a high outblow air temperature thanks to Variable Refrigerant Temperature and all inverter technology
- > High heating efficiency at low water entering temperatures in geothermal mode
- > Simultaneous cooling and heating from one system
- > VRV configurator software for the fastest and most accurate commissioning, configuration and customisation
- > Accurate temperature control, fresh air provision, air handling units, Biddle air curtains and hot water production, all integrated in a single system requiring only one single point of contact
- > Compact design (stacked configuration possible)
- > The ability to control each conditioned zone individually keeps VRV system running costs to an absolute minimum
- > Spread your installation cost by phased installation
- > Keep your system in top condition via our ACNNS service: 24/7 monitoring for maximum efficiency, extended lifetime, immediate service support thanks to failure prediction and a clear understanding of operability and usage
- > Easy compliance with F-gas regulation thanks to automated refrigerant containment check
- > European-optimised design and manufactured in Europe for short lead-in times
- > Variable Water Flow control option increases flexibility and control

# New Multi branch selector for VRV heat recovery

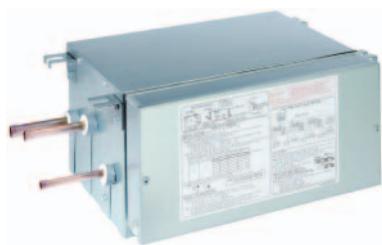

## Multi branch selector for VRV heat recovery

Available spring 2014

### Less is more

- ✓ Smaller
- ✓ Lighter
- ✓ All indoors connectable to one BS box
- ✓ Maximum flexibility  
by free combination of single and multi BS boxes

BSVQ-P9B

- > Allows individual cool / heat switching of 1 group of indoor units
- > Maximum design flexibility because individual and multi boxes can be combined in one system
- > Low built-in height
- > No drain piping needed
- > Allows multi tenant applications (option PCB required)

## Heat recovery

# Products overview - VRV indoor

VRV air conditioning brings summer freshness and winter warmth to offices, hotels, department stores and many other commercial premises. It enhances the indoor environment and creates a basis for increased business prosperity and whatever the air conditioning requirement, a Daikin indoor unit will provide the answer. VRV air conditioning can be supplied via **VRV indoor units or stylish indoor units as Daikin Emura, Nexura, ...**

Type	Model	Product name		Capacity

# Round flow cassette

## Round flow cassette: setting the standard for efficiency and comfort

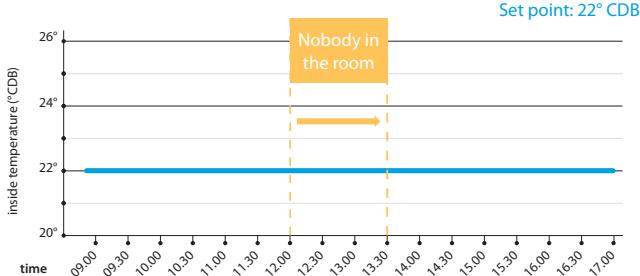

The round flow cassette is designed for use in all forms and sizes of commercial offices & retail environments. Today, Daikin has improved its technology even further to enhance your comfort and provide you better energy efficient models.

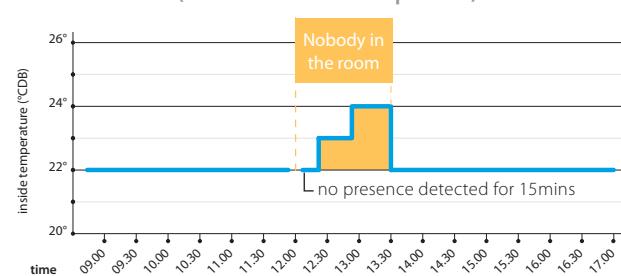

### Even more energy efficient...

- With the optional infrared **presence sensor** the set point can be adjusted or the round flow cassette switched off when there is nobody in the room. Up to **27% energy can be saved** (estimated) with this new function. If no presence is detected in the room for 15mins, the set temperature is changed until a minimum temperature (for heating) or maximum temperature (for cooling) is reached. When selecting the setback function, the unit will maintain the temperature within a preset minimum and maximum temperature, when there is no presence detected in the room for 1 hour.

#### Without sensor

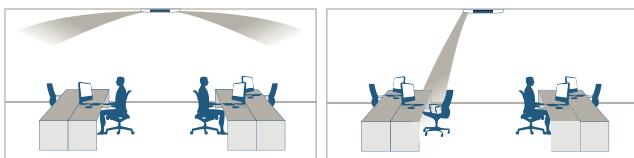

#### With sensor (BRC1E52A/B required)

### ... and improved comfort

- With the optional infrared **floor sensor** having cold feet will become history. This sensor detects the average floor temperature and ensures even temperature distribution between ceiling and floor.
- The **presence sensor** directs air flow away from any person detected in the room, when the air flow control is on.

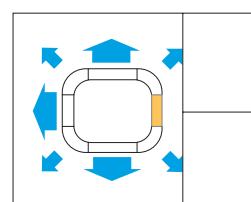

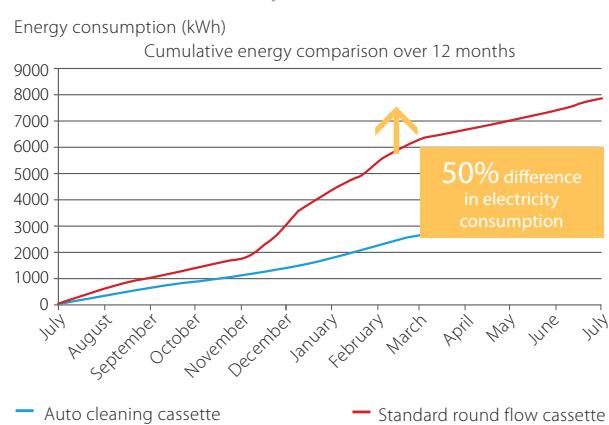

- The **unique 360° airflow** discharge pattern ensures a uniform temperature distribution across the room without dead corners.

### Flexible installation

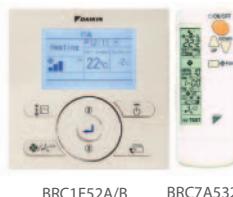

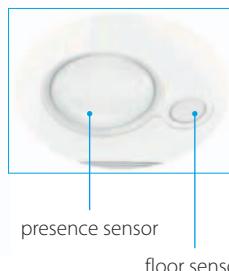

- When refurbishing or rearranging the interior of your office, shop or other area, you no longer need to change the location of your indoor unit. With the round flow cassette one flap can be easily closed via the wired remote controller (BRC1E52A/B – optional). Optional closure kits are available as well.

#### Test site, Wolverhampton, UK

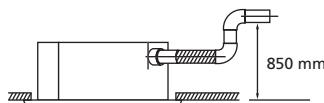

FXFQ20-63A

- > The round flow cassette provides a more comfortable environment and offers greater savings in energy consumption to shop, office and restaurant owners
- > 360° air discharge ensures uniform air flow and temperature distribution
- > Modern style decoration panel is available in 3 different variations: pure white (RAL9010) auto cleaning panel, pure white (RAL9010) standard panel with grey louvers and pure white (RAL9010) standard panel with white louvers
- > Daikin introduces first auto cleaning cassette to European market.
- > Higher efficiency and comfort thanks to daily auto cleaning of the filter.
- > Lower maintenance costs thanks to auto cleaning function.
- > Easy dust removal with vacuum cleaner without opening the unit.
- > The presence sensor (optional) adjusts the set point with standard 1°C if no one is detected in the room, it is possible to adjust the set point with 2, 3 or 4°C (optional). It also automatically directs air flow away from any person to avoid draught.
- > The floor sensor (optional) detects the average floor temperature and ensures even temperature distribution between ceiling and floor. Cold feet will become history.
- > Individual flap control: one flap can be easily closed via the wired remote control (BRC1E52) in case you would refurbish or rearrange your interior
- > Low energy consumption thanks to specially developed small tube heat exchanger, DC fan motor and drain pump
- > Fresh air intake: up to 20 %
- > Low installation height: 214mm for class 20-63
- > Standard drain pump with 850mm lift

BYCQ140D7W1 = pure white panel with grey louvers , BYCQ140D7W1W = pure white standard panel with white louvers, BYCQ140D7GW1 = Pure white auto cleaning panel

The BYCQ140D7W1W has white insulations. Be informed that formations of dirt on white insulation is visibly stronger & that it is consequently not advised to install the decoration panel in environments exposed to concentrations of dirt.

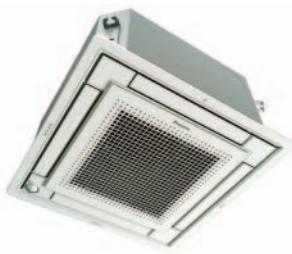

## Fully flat cassette

# Design & Genius in one

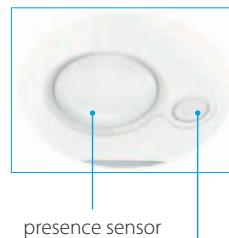

Unique in the market, the fully flat cassette is a remarkable blend of iconic design and engineering excellence with an elegant white or a silver and white finish. Fitting flush within the ceiling modules and fully flat with the ceiling itself, the cassette is both stylish and unobtrusive. Superb efficiency and comfort is delivered through the combined use of floor and presence sensors and, when necessary, the individual flap control via the wired remote controller makes it simple to close one flap.

FXZQ-A (white panel)

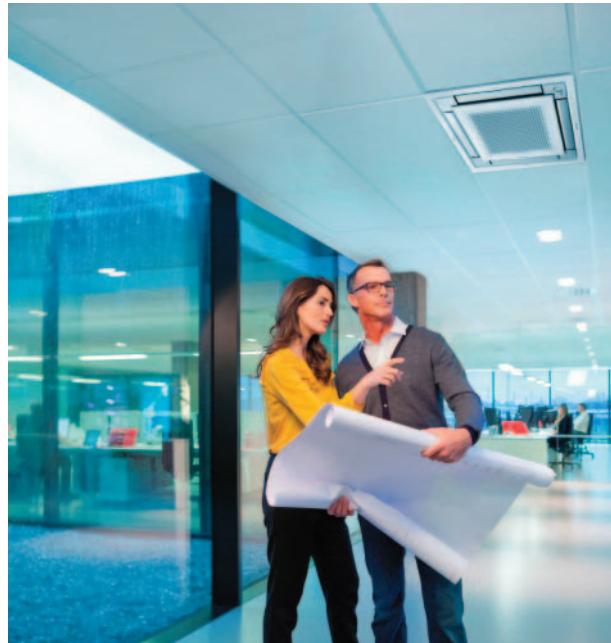

FXZQ-A (silver and white panel)

- > Easy installation thanks to automatic air flow adjustment towards nominal air flow rate
- > Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- > Up to 140Pa external static pressure (ESP) facilitates using flexible ducts of varying lengths: ideal for shops and medium size offices (FXSQ)
- > Up to 200Pa external static pressure allows extensive ductwork runs and flexible application: ideal for use in large areas (FXMQ)
- > Low energy consumption thanks to DC inverter fans
- > Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- > The air suction direction can be altered from rear to bottom suction
- > Standard built-in drain pump increases reliability of the drain system

### Easy installation thanks to automatic air flow adjustment towards nominal air flow: Installation made easier

#### Reduced installation time

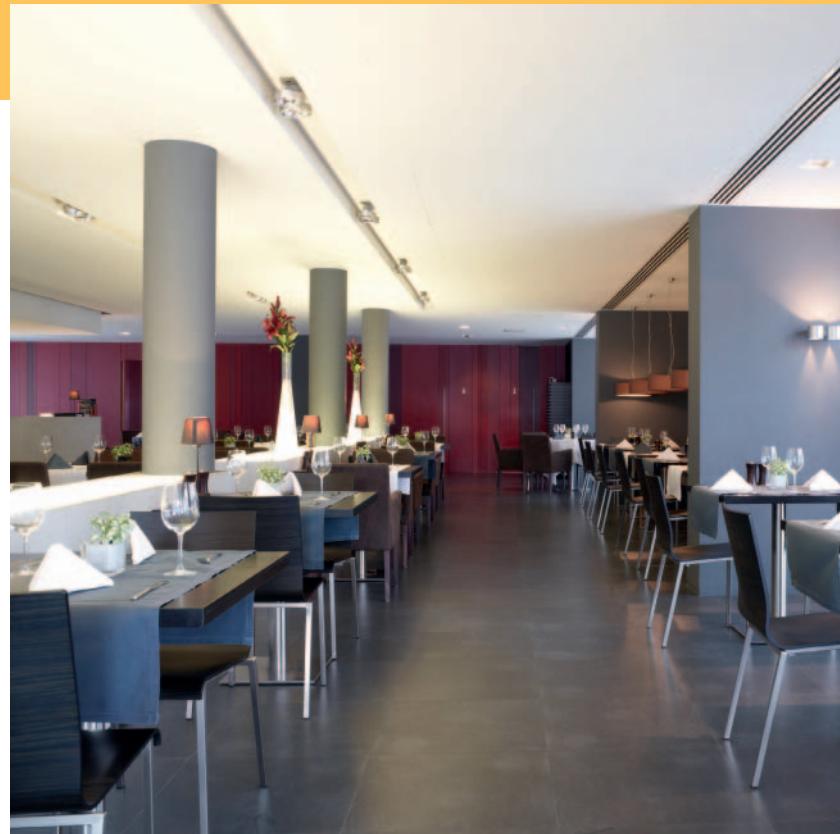

- > After installation, it is possible that the actual duct resistance is lower than expected at time of designing. As a consequence the air flow will be too high.
- > With the automatic air flow adjustment function the unit can adapt its fan speed to a lower curve, so the air flow decreases.
- > The air flow will always be within 10% of the rated air flow because of the amount of possible fan curves (more than 8 fan curves available per model).
- > Alternatively the installer can manually select a fan curve with the wired remote control.

	Fan characteristic curve
	Actual duct resistance curve
	Duct resistance curve at the time of designing
	Rated air flow
	Airflow without air flow automatic adjustment
	Actual airflow

- > Air to water connection to VRV for applications such as bathrooms, sinks, underfloor heating, radiators and air handling units
- > Free heating provided by transferring heat from areas requiring cooling to areas requiring heating or hot water
- > Uses heat pump technology to produce hot water efficiently, providing up to 17% savings compared to a gas boiler
- > Possibility to connect thermal solar collectors to the domestic hot water tank
- > Leaving water temperature range from 25 to 80°C without electric heater

- > Super wide operating range for hot water production from -20 to +43°C ambient outdoor temperature
- > Saves time on system design as all water-side components are fully integrated with direct control over leaving water temperature
- > Various control possibilities with weather dependant set point or thermostat control
- > The indoor unit and domestic hot water tank can be stacked to save space, or installed next to each other, if only limited height is available
- > Requires no gas connection or oil tank
- > Connectable to VRV III heat recovery (REYAQ-P)

## EKS-RPS

Unpressurised Solar connection

EKSRPS3

- > Save energy and reduce CO<sub>2</sub> emissions with a solar system for domestic hot water production
- > Pump station connectable to unpressurised solar system
- > Pump station and control provide the transfer of solar heat to the domestic hot water tank

Indoor unit			<b>EKSRPS3</b>
Mounting			On side of tank
Dimensions	Unit	HeightxWidthxDepth	mm
Thermal performance	Zero loss collector efficiency η0	%	815x230x142
Control	Type		Digital temperature difference controller with plain text display
	Power consumption	W	2
Sensor	Solar panel temperature sensor		Pt1000
	Storage tank sensor		PTC
	Return flow sensor		PTC
	Feed temperature and flow sensor		Voltage signal (3.5V DC)
Power supply	Voltage	V	230

# Powerful selection programs

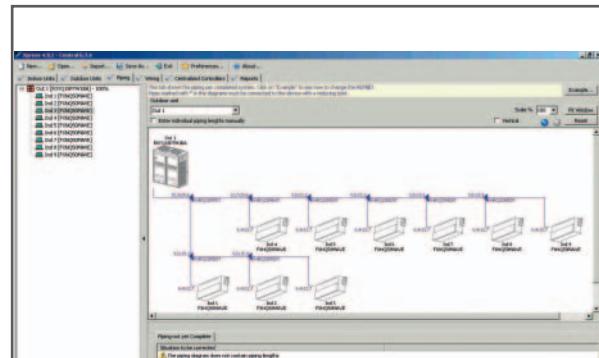

## Solutions seasonal simulator

With this software tool you can simulate and the seasonal efficiency, the annual power consumption and CO<sub>2</sub> emission for a given climate, load profile (cooling, heating, heat recovery, covalent, bivalent...) and (combination of) system(s). With its intuitive and graphical appealing interface, a simulation can be made in a matter of minutes. The solution basket system enables you to compare the results of several system configurations. Optionally, a return on investment calculation can be made. The outcome of the simulation can be exported to a printable report. The tool is available both for Windows PC and Tablet (iPad).

## Xpress, Quick Quotation tool

Xpress is a software tool that allows creating on the spot quotations for a Daikin VRV system. It provides a result in 6 steps to enable a professional budget quotation:

1. Select indoor units
2. Connect outdoor units to indoor units
3. Automatic generation of piping diagram with joints
4. Automatic generation of wiring diagram
5. Select possible centralised control systems
6. Visualise result in MS Word, MS Excel and AutoCAD

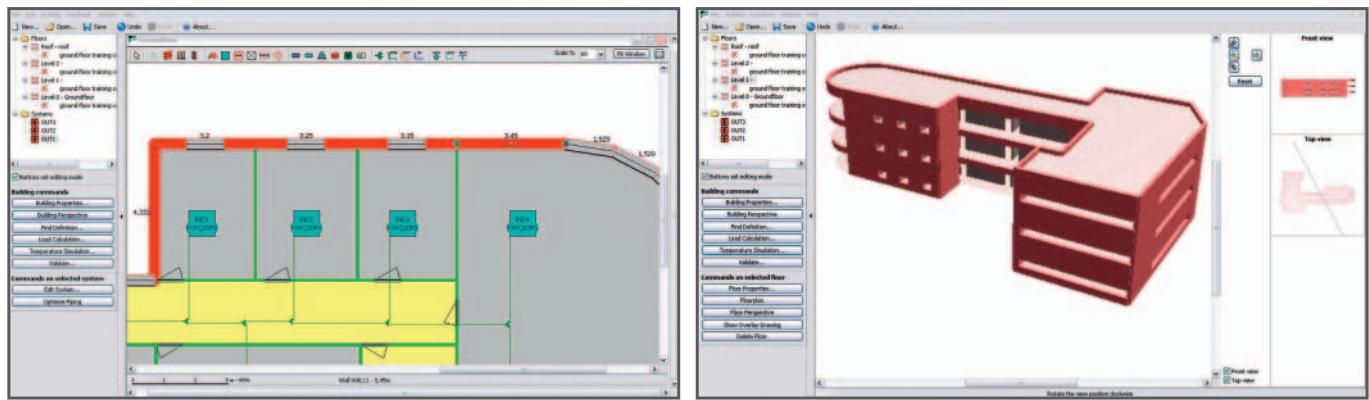

## Ventilation Xpress

Selection tool for ventilation devices (VAM, VKM) The selection is based on given supply/extract airflows (including fresh up), and given ESP of the supply/extract ducting

- Determines size of electrical heaters
- Visualization of psychrometric chart
- Visualization of selected configuration
- Required field settings mentioned in the report

## VRV Pro, Design tool

The VRV Pro selection program is a true VRV design tool. The program enables VRV air conditioning systems to be engineered in a precise and economical way, taking into account the realtime thermal properties of any building. By calculating annual energy consumptions, it gives the designer the possibility to make accurate selections and **get competitive quotations** for each project. Moreover, it ensures optimum operating cycles and maximum energy efficiency.

With the advent of new building regulations, greater awareness of increasing energy costs and a responsibility towards environmental issues, modern commercial spaces are insulated better than ever. Double glazing, thicker roof insulation and draught excluders of course, help considerably towards reducing heating/cooling demand and burdens on the environment. The down-side however, is that these same commercial spaces have now become, in effect, sealed boxes with little or no replenishment of the air. Daikin offers a variety of solutions for the provision of fresh air ventilation to offices, hotels, stores and other commercial outlets – each one complementary to and as flexible as VRV systems themselves.

Total heat exchanged  
clean air

- > Energy saving ventilation using indoor heating, cooling and moisture recovery
- > Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- > Free cooling possible when outdoor temperature is below indoor temperature (eg. during nighttime)
- > Low energy consumption thanks to DC inverter fans
- > Prevent energy losses from over-ventilation while maintaining indoor air quality with optional CO<sub>2</sub> sensor
- > Can be used as stand alone unit or integrated in the VRV system
- > Wide range of units: air flow rate from 150 up to 2,000 m<sup>3</sup>/h
- > High efficiency filters available in F6, F7, F8 grades
- > Shorter installation time thanks to easy adjustment of nominal air flow rate, so less need for dampers compared with traditional installations
- > Specially developed heat exchange element with High Efficiency Paper (HEP)
- > No drain piping needed
- > Can operate in over- and under pressure
- > Total solution for fresh air with Daikin supply of both VAM and electrical heater

### Total solution for fresh air with Daikin supply of both VAM and electrical heaters

- > Increased comfort in low outdoor temperature thanks to the heated outdoor air
- > Integrated electrical heater concept (no additional accessories required)
- > Standard dual flow and temperature sensor
- > Flexible setting with adjustable setpoint
- > Increased safety with 2 cut-outs: manual & automatic
- > BMS integration thanks to:
  - Volt free relay for error indication
  - 0-10V DC input for setpoint control
- > Capacities ranging from 1 to 2.5 kW

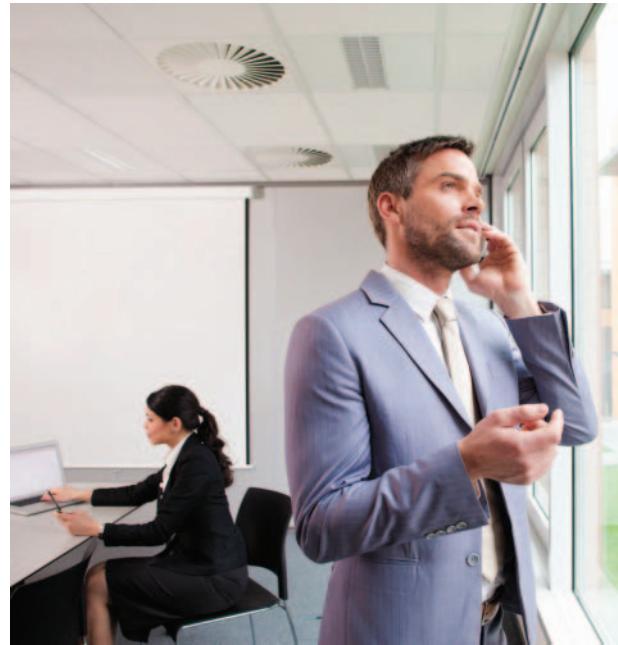

VH Electrical  
heater for VAM

VKM80-100GB(M)

- > Energy saving ventilation using indoor heating, cooling and moisture recovery
- > Creates a high quality indoor environment by pre conditioning incoming fresh air
- > Humidification of the incoming air results in comfortable indoor humidity level, even during heating
- > Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- > Free cooling possible when outdoor temperature is below indoor temperature (eg. during nighttime)
- > Low energy consumption thanks to DC fan motor
- > Prevent energy losses from over-ventilation while maintaining indoor air quality with optional CO<sub>2</sub> sensor
- > Shorter installation time thanks to easy adjustment of nominal air flow rate, so less need for dampers compared with traditional installation.
- > Specially developed heat exchange element with High Efficiency Paper (HEP)
- > Can operate in over- and under pressure

# Daikin Air handling units

## Wide range of air flows

In situations where the Daikin commercial range of ventilation units cannot satisfy the ventilation requirement due to building constraints (large atriums, banquet halls, etc) air handling units represent the ideal solution. Daikin's wide range of air handling systems handle air flow rates from 500 m<sup>3</sup>/h up to 140,000 m<sup>3</sup>/h. The air handler unit can be adapted to deliver whatever air flow you require, via the specific dimensions of flow section available at the installation.

## Daikin fresh air package - plug & play

The D-AHU Professional and Energy series provide a complete solution including unit control (EKEXV, EKEQ, DDC controller) factory mounted and configured, plug & play with our ERQ and VRV condensing units. The easiest solution as you save time and only have one point of contact!

## Return on investment

The air handling unit (AHU) is critical to an effective climate control system and, although the initial investment can appear high, the savings generated by our advanced designs and operating efficiencies guarantee a rapid return on the investment made. Our AHU Energy series has been designed to deliver exceptional performance thus driving down the energy consumed and so lowering energy bills. Taken over the expected 15-year life-span of the equipment, this will result in a substantial saving, especially in a time of ever increasing energy prices.

## Pre-defined sizes

27 fixed sizes are available, optimized to reach the best compromise between competitiveness and manufacturing standardisation. However, Daikin's section by section design means that units can be sized by 1cm increments and assembled on site, without welding, to suit the space constraints of the installation.

## High efficiency components

All Daikin air handlers have been designed for optimum energy efficiency. Polyurethane or Mineral wool panels guarantee excellent thermal insulation performance. Filters are provided with a large choice of efficiency filtration class.

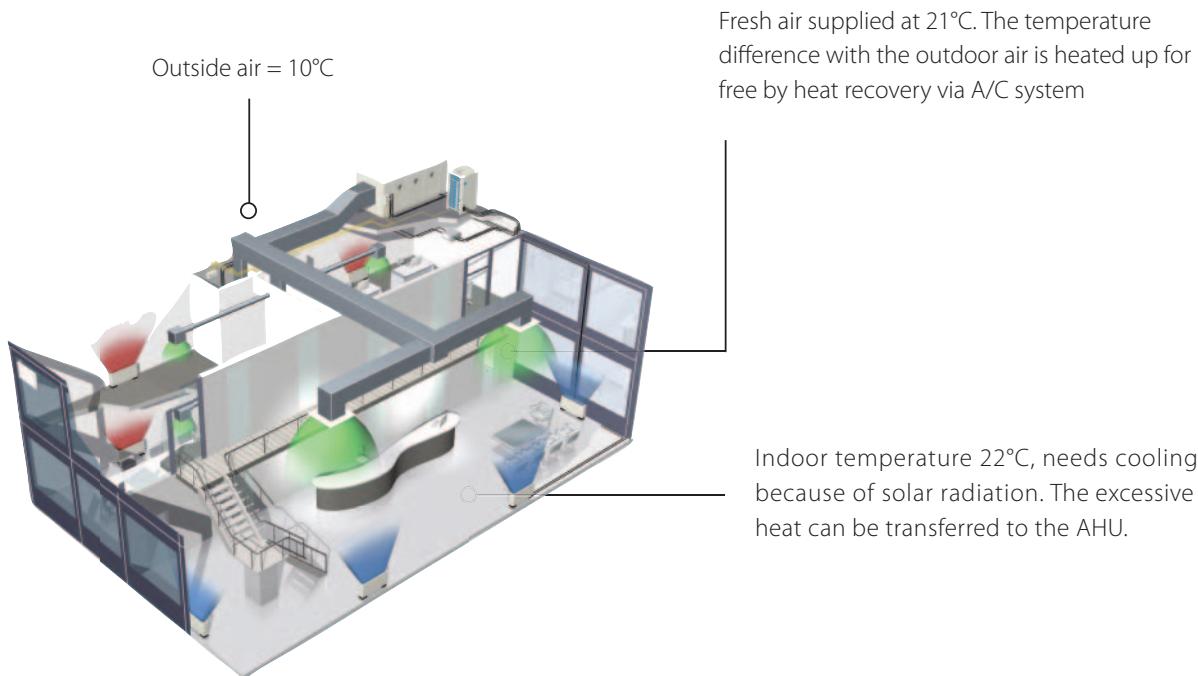

# Air handling unit applications

## Why use ERQ and VRV condensing units for connection to air handling units?

### High Efficiency

Daikin heat pumps are renowned for their high energy efficiency with COPs up to 4.56 in heating<sup>1</sup>. The VRV range offers both heat pump and heat recovery units with part load efficiencies as high as 9.02. Integrating the AHU with a heat recovery system is highly effective since an office system can frequently be in cooling mode while the outdoor air is too cold to be brought inside in an unconditioned state. In this case heat from the offices is merely transferred to heat up the cold incoming fresh air. In the absence of an AHU this 'free heating' the incoming fresh air would not be possible.

1 ERQ100AV1 heat pump  
2 REYQ8P8 50% cooling - 50% heating load. Conditions: outdoor temperature 11°CDB, indoor temperature 18°CWB, 22°CDB

### High comfort levels

Daikin ERQ and VRV units respond rapidly to fluctuations in supply air temperature, resulting in a steady indoor temperature and resultant high comfort levels for the end user. Daikin ERQ and VRV units respond rapidly to fluctuations in the supply air temperature, resulting in a steady indoor temperature, together with the dehumidification this results in high comfort levels for the end user. The ultimate is the VRV range which improves comfort even more by offering continuous heating, also during defrost.

### Easy Design and Installation

The system is easy to design and install since no additional water systems such as boilers, tanks and gas connections etc. are required. This also reduces the total system cost.

# Flexible control possibilities for air handling units

In order to maximize installation flexibility,  
3 types of control systems are offered

**Control x:** Control of air temperature

(discharge temperature, suction temperature, room temperature) via external device (DDC controller)

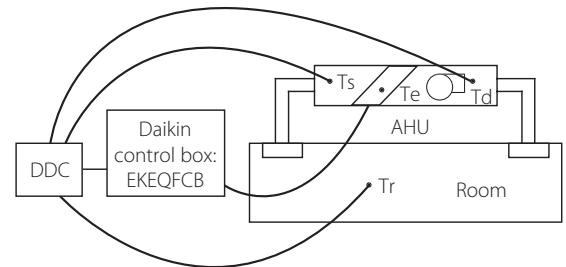

**Control y:** Control of evaporating temperature via Daikin control (no DDC controller needed)

**Control z:** Control of air temperature (suction temperature, room temperature) via Daikin control (no DDC controller needed)

**Possibility X (Td/Tr control):**

Air temperature control via DDC controller

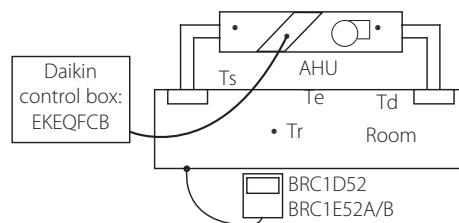

Room temperature is controlled as a function of the air handling unit suction or discharge air (customer selection). The DDC controller is translating the temperature difference between set point and air suction temperature (or air discharge temperature or room temperature) into a reference voltage (0-10V) which is transferred to the Daikin control box (EKEQFCBA). This reference voltage will be used as the main input value for the compressor frequency control.

**Possibility Y (Te/Tc control):**

By fixed evaporating temperature

A fixed target evaporating temperature of between 3°C and 8°C can be set by the customer. In this case, room temperature is only indirectly controlled. The cooling load is determined from the actual evaporating temperature (i.e. load to the heat exchanger). A Daikin infrared remote control (BRC1D52 or BRC1E52A/B - optional) can be connected for error indication.

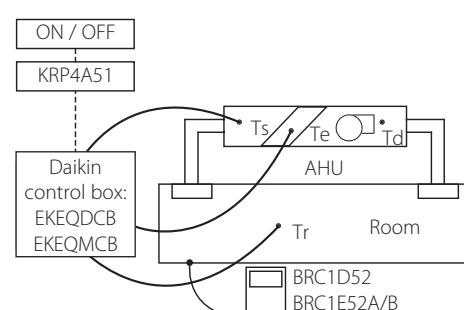

**Possibility Z (Ts/Tr control):**

Using Daikin infrared remote control  
(BRC1D52 or BRC1E52A/B - optional)

Set point can be fixed via standard Daikin infrared remote control. Remote ON/OFF can be achieved by an optional adapter KRP4A51.

No external DDC controller should be connected. The cooling load is determined from the air suction temperature and set point on the Daikin controller.

Ts = Air suction temperature  
Td = Air discharge temperature  
Tr = Room temperature  
Te = Evaporating temperature  
AHU = Air Handling Unit  
DDC = Digital Display Controller

	OPTION KIT	FEATURES
Possibility x	EKEQFCB	DDC controller is required Temperature control using air suction or air discharge temperature
Possibility y		Using fixed evaporating temperature, no set point can be set using remote control
Possibility z	EKEQDCB EKFQMCB*	Using Daikin infrared remote control BRC1D52 or BRC1E52A/B Temperature control using air suction temperature

\* EKEQMCB (for 'multi' application)

## A R-410A inverter condensing units range for multi application with air handling units

- › Inverter controlled units
- › Large capacity range (from 8 to 54HP)
- › Heat recovery, heat pump
- › R-410A
- › Control of room temperature via Daikin control
- › Large range of expansion valve kits available
- › BRC1E52A/B is used to set the set point temperature (connected to the EKEQMCB).
- › Connectable to all VRV heat recovery and heat pump systems

### Different control possibilities

P = pair

M = multi

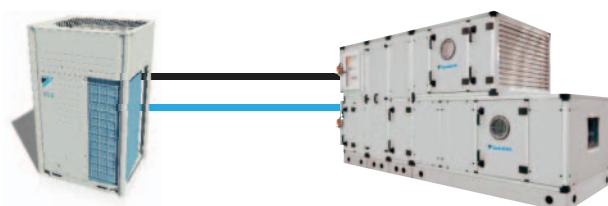

1 By use of split coil (interlaced)

2 Separate coil per outdoor unit

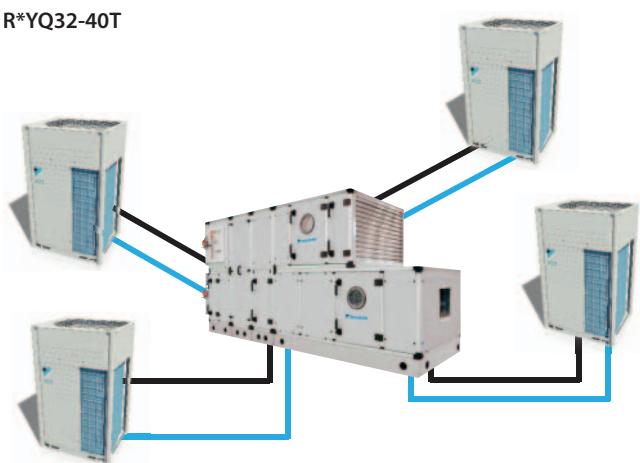

## X,Y control for VRV IV

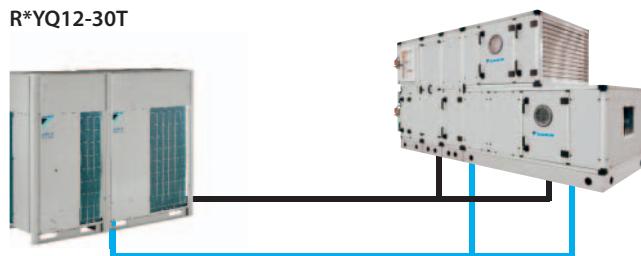

R\*YQ8-10T

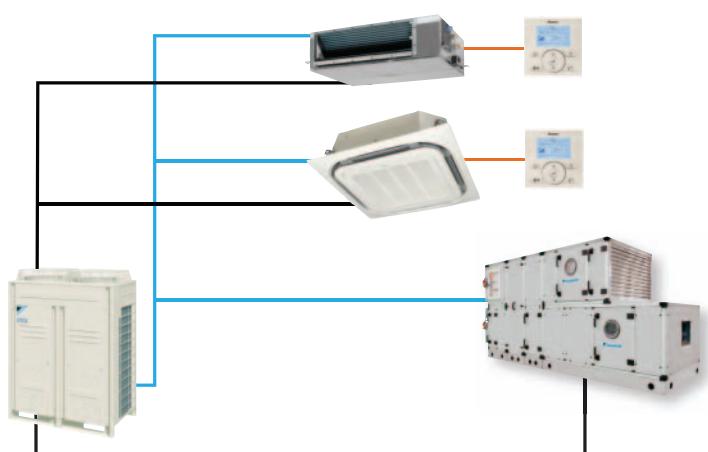

R\*YQ32-40T

R\*YQ12-30T

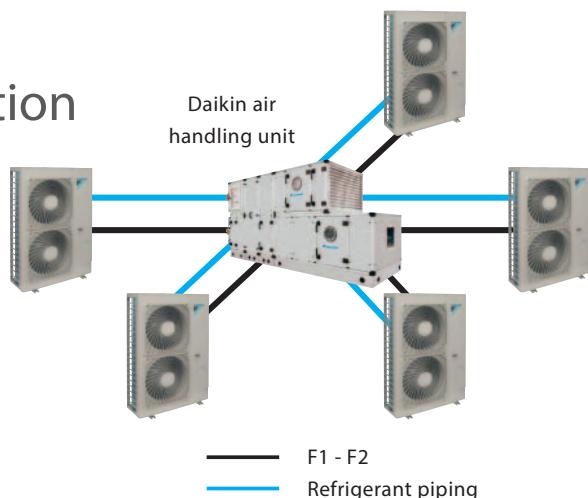

## Z control for all VRV outdoor units

— Refrigerant piping  
— F1-F2  
— other communication

## A range of R-410A inverter condensing units for pair application with air handling units

- › Inverter controlled units
- › Large capacity range (from 100 to 250 class)
- › Heat pump
- › R-410A
- › Wide range of expansion valve kits available
- › Up to 5 ERQ units can be connected to an interlaced coil in one air handling unit

The "Daikin Fresh Air Package" provides a complete Plug & Play Solution including AHU, ERQ or VRV Condensing Unit and all unit control (EKEQ, EKEX, DDC controller) factory mounted and configured. The easiest solution with only one point of contact.

## EKEXV - Expansion valve kit for air handling applications

VENTILATION	EKEXV50	EKEXV63	EKEXV80	EKEXV100	EKEXV125	EKEXV140	EKEXV200	EKEXV250
Dimensions	Unit	HeightxWidthxDepth	mm	401x215x78				
Weight	Unit		kg	2.9				
Sound pressure level	Nom.		dBA	45				
Operation range	On coil temperature	Heating Cooling	Min. Max. °CDB	10 (1) 35 (2)				
Refrigerant	Type			R-410A				
Piping connections	Liquid Gas	OD OD	mm mm	6.35 6.35	9.52 9.52			

(1) The temperature of the air entering the coil in heating mode can be reduced to -5°CDB. Contact your local dealer for more information. (2) 45% Relative humidity.

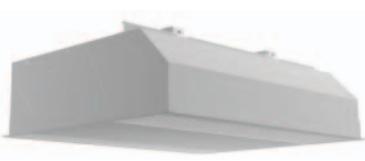

## EKEQ - Control box for air handling applications

VENTILATION	EKEQFCB	EKEQDCB	EKEQMCB
Application	Pair		Multi
Outdoor unit	ERQ		VRV
Dimensions	Unit	HeightxWidthxDepth	mm
Weight	Unit	kg	3.9
Power supply	Phase/Frequency/Voltage	Hz/V	1~/50/230

CYQM150DK80FSN

CYQM150DK80CSN

CYQM150DK80RSN

- › Connectable to ERQ heat pump
- › ERQ is among the first DX systems suitable for connection to air curtains
- › Free-hanging model (F): easy wall mounted installation
- › Cassette model (C): mounted into a false ceiling leaving only the decoration panel visible
- › Recessed model (R): neatly concealed in the ceiling
- › A payback period of less than 1.5 years compared to installing an electric air curtain
- › Easy and quick to install at reduced costs since no additional water systems, boilers and gas connections are required
- › Maximum energy efficiency stemming from almost zero down flow turbulence, optimised air flow and the application of advanced discharge rectifier technology
- › Around 85% air separation efficiency, greatly reducing both heat loss and required indoor unit heating capacity

## MARINE TYPES

The marine branch office of Daikin Europe N.V., named Daikin Europe N.V. Hamburg Marine Office is located in the heart of one of the biggest harbour towns in the entire Europe. Through this decision, Daikin Europe N.V. aims to establish a firm basis to further increase its presence in the European Marine A/C market. The portfolio of products are focused on Marine application, such as Daikin - Packaged Marine Air conditioners, Chillers and DX- units in accordance to most of the well known classification societies for which Daikin Europe Hamburg Marine Office is your competent partner.

- > Energy saving
- > Compact design
- > Refrigerants R-404A - R-407C
- > Economical maintenance
- > Easy installation
- > Hermetic scroll compressor
- > Minimum piping and field work required
- > High performance reliability
- > Lesser refrigerant volum with leak proof hermetic structure
- > High static pressure fan facilitates the use of long ducts
- > Quiet, less vibration operation makes it suitable for installation in accomodation areas

#### Optional customized modifications:

- > Remote controls
- > Electrical heater
- > Data bus interfaces
- > Air plenum or duct connection
- > Higher external static pressure
- > Cooling water regulating valve
- > Higher air volume

## USP~HR1 / USP~H

### Daikin Marine Type Packaged Series

- > Excellent durability
- > Hermetic scroll compressor
- > Light weight design
- > Refrigerants: R-404A - R-407C
- > Resilient structure specially designed for marine applications
- > Abundant modification parts assures various applications
- > Wide operation range
- > Easy transportation and installation
- > Energy-saving
- > Complete set of spare parts provided for certain models

#### Optional customized modifications:

- > Remote controls
- > Electrical heater
- > Data bus interfaces
- > Air plenum or duct connection
- > Higher external static pressure
- > Cooling water regulating valve
- > Higher air volume

## USF\*J(A)

### Daikin Marine Type Galley Series

- > Respond to a wide temperature range
- > High efficient operation
- > Outstanding durable design
- > Easy transportation and installation
- > Excellent performance reliability
- > Spare parts are provided as standard accessories
- > Hermetic scroll compressor
- > High static pressure system
- > R-404A

#### Optional customized modifications:

- > Remote controls
- > Electrical heater
- > Data bus interfaces
- > Air plenum or duct connection
- > Higher external static pressure
- > Cooling water regulating valve
- > Higher air volume

## RHSD~A / RKS~FR

### Daikin Marine Type Small Size Condensing Unit

#### RHSD-A (R-134a):

- > A semi-hermetic reciprocating compressor with proven reliability
- > Saved maintenance work around compressor (without V belts & shaft seal)

#### RKS-FR (R-404A):

- > An open type reciprocating compressor of optimum design for R-404A
- > Equal installation & maintenance as R-22

EUWA(N-P-B)-KBZW1

- > Daikin scroll compressor
- > Reduced installation time thanks to integrated pump and/or buffer tank
- > Possibility for a 200l buffer tank
- > Low operating sound level
- > Easy maintenance
- > Main switch
- > Water flow switch
- > 3 different design options available:
  - EUWAN chiller without integrated hydraulic module;
  - EUWAP chiller with integrated hydraulic module (pump, expansion vessel, hydraulic components);
  - EUWAB chiller with integrated hydraulic module (buffer tank, pump, expansion vessel, hydraulic components)

EWAQ-DAYN

PCASO

- > Optimised for use with R-410A
- > Reliable and efficient scroll compressors with high EER values
- > Anti-corrosion treated aluminium coils
- > Low operating sound level
- > Easy 'plug and play' installation
- > Unit dimensions allow easy transportation
- > Fans protected against abnormal operation
- > Safety valves in each circuit
- > Electronic circuit breakers
- > Electronic expansion valve
- > True dual plate brazed plate heat exchanger
- > Sight glass
- > All hydraulics can be accessed easily from 3 sides (no surrounding cabinet)
- > Separate switchbox for easy access
- > Compressors and controls at unit side
- > Increased reliability via 2 independent refrigerant circuits
- > Double circuit heat exchanger (from 100kW onwards)
- > Non hermetic filter/dryer
- > Daikin Pcaso controller with user friendly interface

MicroTech III

- › Reliable and efficient scroll compressors with high EER values
- › A series of advantages thanks to the use of large-capacity scroll compressors: increased competitiveness, reduced weight, clearances around the unit
- › 1-2 truly independent refrigerant circuits
- › Reduced footprint thanks to the V-shaped frame
- › Large operation range: ambient temperatures up to 52°C and down to -18°C
- › The unit can be equipped with a hydraulic module optimizing installation time, space and cost
- › Ideal solution for a broad range of comfort and process applications
- › MicroTech III controller with superior control logic and easy interface

## No compromises, only the best!

The new Daikin Inverter Screw chiller is suitable to comfort or process applications where the load variation during the year is not negligible and high part load efficiency is a must! The new chiller represents a great opportunity to new or retrofit projects, easy to install and highly serviceable.

### Energy savings

- › The EWAD-TZ delivers an ESEER of up to 6.0\* giving it a CLASS A energy efficiency rating with exceptional part-load efficiency, one of the highest in the market and so helping you save money
- › Further cost savings come from an impressive reduction in energy consumption compared to a traditional non-inverter chiller making this a great solution for retrofit projects

### Comfort level

- › To deliver the perfect comfort solution, the system has an infinitely variable load regulation without pre-set steps
- › Highly accurate precision leaving water temperature control helps ensure optimal comfort as well as saving you money

### Rapid payback

- › Why tie up your capital for long periods? 1-year payback time in typical process cooling application compared to a non-inverter unit thanks to top-efficiency

### Compact design

- › The compact design of our EWAD-TZ means you get the equivalent cooling capacity of a non-inverter unit but with better efficiency and the same physical footprint leading to the optimal use of space

### Extensive option list

- › Rapid restart after power failure
- › Variable speed water pumps
- › EC brushless condenser fans

### Silent operations

- › Nothing is more disturbing to our comfort than the sound of machinery but the EWAD-TZ uses a compressor with a variable frequency that ensures it operates at the lowest possible sound levels

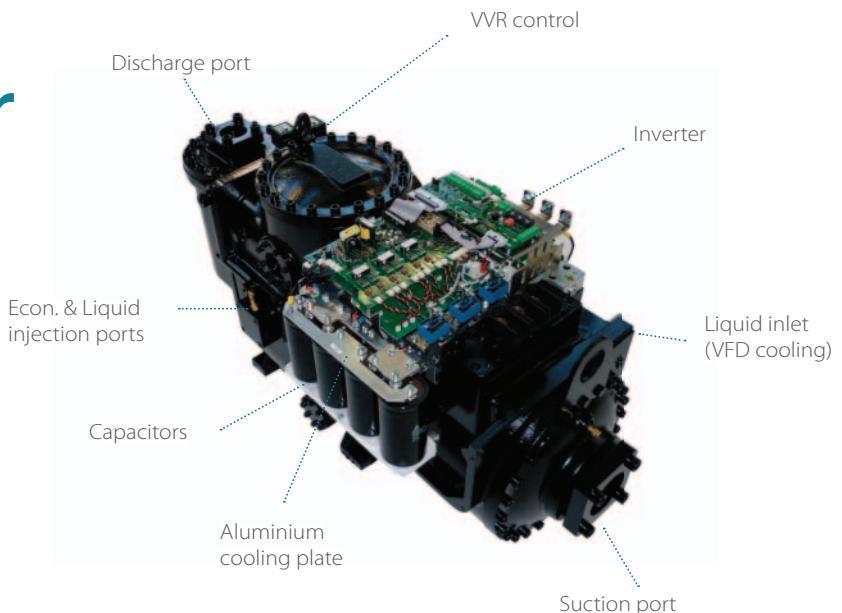

### Green heart

- › The EWAD-TZ helps you deliver a low ecological footprint by reducing energy demand without compromising on reliability and performance

\* gross value; 5.8 in accordance with EN14511:2011

# New inverter compressor technology

- ✓ Compressor and inverter fully designed by Daikin
- ✓ Inverter integral to the compressor body
- ✓ Inverter refrigerant cooled
- ✓ VVR = Variable Volume Ratio for optimized efficiency
- ✓ Enlarged discharge port and suction side for reduced refrigerant pressure drop
- ✓ New optimized compressor motors

EWAD-C-

MicroTech III

- > Stepless single-screw compressor
- > Large operation range (ambient temperature down to -18°C and up to 52°C)
- > All models are PED pressure vessel approved
- > Optimised for use with R-134a
- > 2-3 truly independent refrigerant circuits
- > Standard electronic expansion valve
- > DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- > Partial and total heat recovery option available
- > MicroTech III controller with superior control logic and easy interface

EWAD-CZ

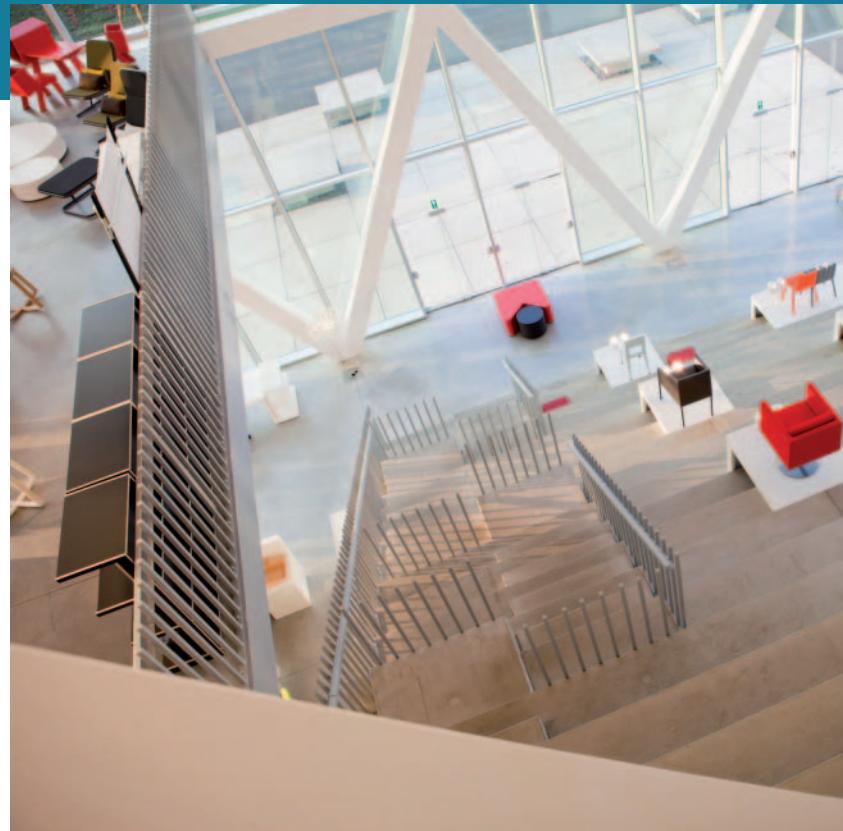

MicroTech III

- > Excellent part load efficiency
- > Stepless single-screw compressor
- > Large operation range (ambient temperature down to -18°C and up to 52°C)
- > All models are PED pressure vessel approved
- > Optimised for use with R-134a
- > 2 truly independent refrigerant circuits
- > Standard electronic expansion valve
- > DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- > Partial and total heat recovery option available
- > MicroTech III controller with superior control logic and easy interface

EUWY(N-P-B)-KBZW1

- > Daikin scroll compressor
- > Reduced installation time thanks to integrated pump and/or buffer tank
- > Possibility for a 200l buffer tank
- > Low operating sound level
- > Easy maintenance
- > Main switch
- > Water flow switch
- > 3 different design options available:
  - EUWYN chiller without integrated hydraulic module;
  - EUWYP chiller with integrated hydraulic module (pump, expansion vessel, hydraulic components);
  - EUWYB chiller with integrated hydraulic module (buffertank, pump, expansion vessel, hydraulic components)

EWYQ-DAYN

PCASO

- > Optimised for use with R-410A
- > Reliable and efficient scroll compressors with high EER values
- > Anti-corrosion treated aluminium coils
- > Low operating sound level
- > Easy 'plug and play' installation
- > Unit dimensions allow easy transportation
- > Fans protected against abnormal operation
- > Safety valves in each circuit
- > Electronic circuit breakers
- > Electronic expansion valve
- > True dual plate brazed plate heat exchanger
- > Sight glass
- > All hydraulics can be accessed easily from 3 sides (no surrounding cabinet)
- > Separate switchbox for easy access
- > Compressors and controls at unit side
- > Non hermetic filter/dryer
- > Daikin PCASO controller with user friendly LCD interface

EWYQ-F-XS/XL

EWYQ-F-XS/XL

MicroTech III

- > Class A efficiency in heating mode
- > Extended operation range: ambient temperatures from -10°C up to +46°C in cooling mode and down to -17°C in heating mode
- > 2 truly independent refrigerant circuits
- > Reduced footprint thanks to the V-shaped frame
- > Reliable and efficient scroll compressors with high EER values
- > Chiller series design entirely based on new European directives (EN14511, EN14825)
- > Top serviceability level thanks to reduced weight, compact footprint and optimized components accessibility
- > The unit can be equipped with a hydraulic module optimizing installation time, space and cost
- > Wide range of available options and accessories
- > Inverter fans management for enhanced part load efficiencies
- > MicroTech III controller with superior control logic and easy interface
- > Nordic kit option to improve the chiller working conditions in heating mode

**INVERTER**

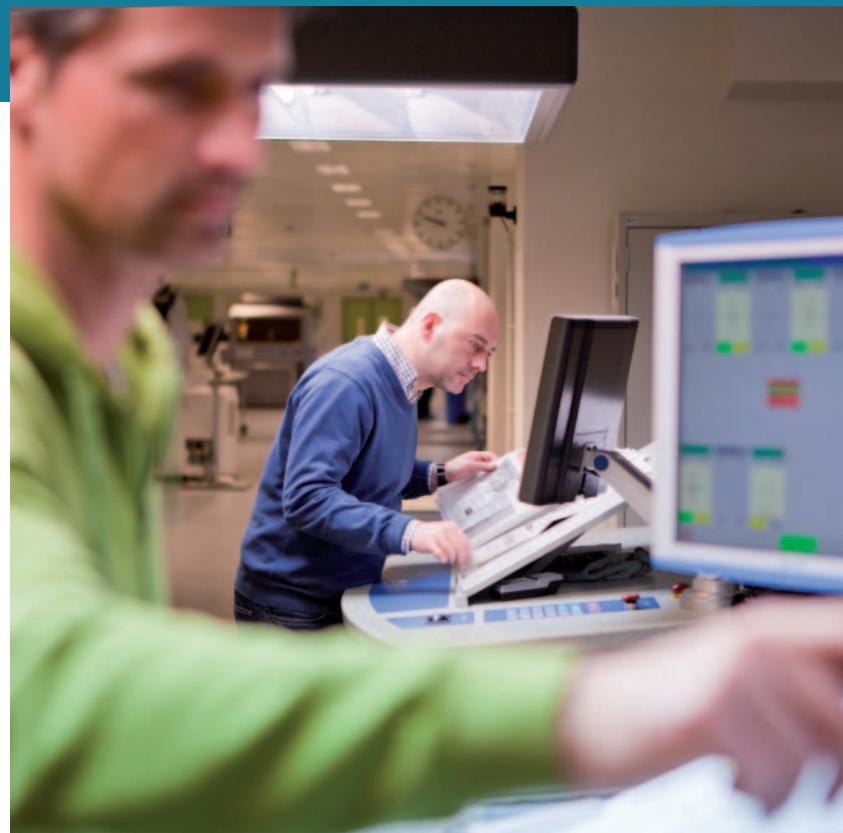

PCO2

- > Optimised for use with R-134a
- > Ideal solution for commercial comfort cooling and/or heating applications
- > Standard electronic expansion valve
- > DX shell and tube evaporator – one pass refrigerant side to minimize pressure drops
- > Low starting current
- > No gas boiler required
- > Optimised defrost cycles
- > Optimum ESEER values
- > Partial and total heat recovery option available
- > PID microprocessor control
- > Power factor up to 0.95
- > 2-3 truly independent refrigerant circuits
- > Standard operation range down to -12°C

EWWP014-035KBW1N

μC<sup>2</sup>SE

- > Standard integrated: main switch, water filter, flow switch, air purge, pressure ports
- > Daikin scroll compressor
- > Low operating sound level
- > Low energy consumption
- > Extension possible up to 195 kW
- > Compact dimensions and low refrigerant volume
- > Easy installation and maintenance
- > Stainless steel plate heat exchanger
- > Remote cooling or heating selection
- > Water/water heat pump, with water reversibility
- > Compatible with hydraulic module
- > μC<sup>2</sup>SE controller featuring top-of-the-range performance and user friendliness

EWWD-G-SS/XS

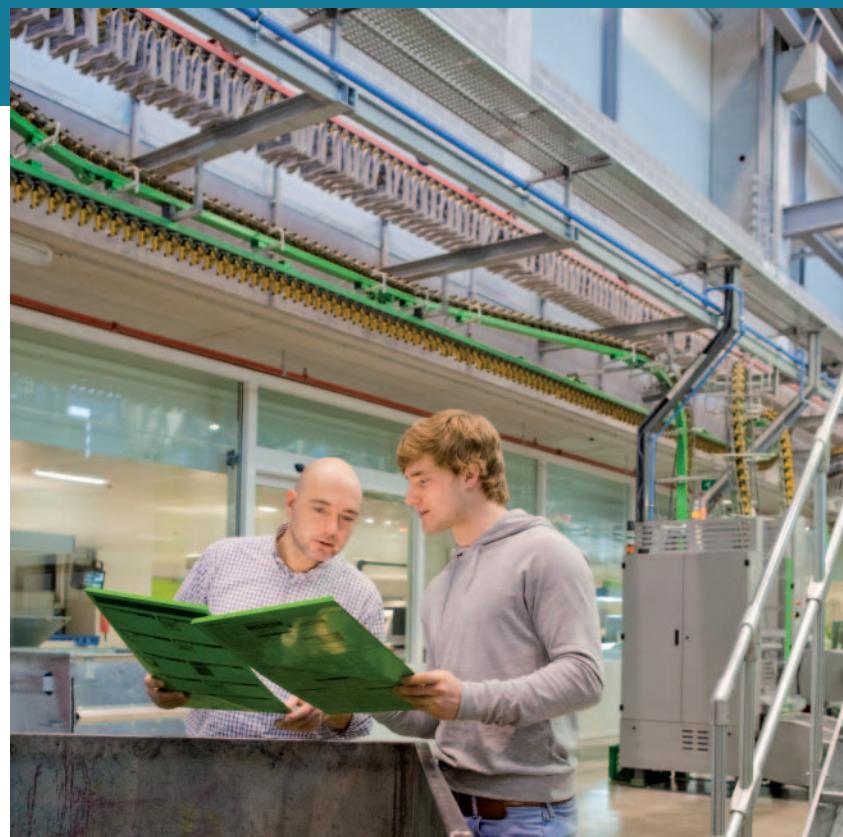

MicroTech III

- > All models are PED pressure vessel approved
- > Stepless single-screw compressor
- > Optimised for use with R-134a
- > 1-2 truly independent refrigerant circuits
- > Standard electronic expansion valve
- > DX shell and tube evaporator – one pass refrigerant side for easy oil circulation and return
- > Partial and total heat recovery option available
- > MicroTech III controller with superior control logic and easy interface

- › Single compressor unit up to 4.5MW
- › Dual compressor unit on single circuit up to 9MW
- › Optional variable speed drives (VFD) for superior partload performance
- › Compressor unloading down to 5% for dual compressor units and 10% for single compressor units without hot gas bypass
- › Control flexibility for easy integration into BMS

#### WIDE CHOICE OF CAPACITIES AND EFFICIENCIES

##### **Single compressor**

- › DWSC: 300 kW - 4,500 kW - Approximately 1.1 million possible chiller offerings with combination options of motors, impellers, gears and vessels

##### **Dual compressor**

- › DWDC: 600 kW - 9,000 kW - Approximately 0.75 million possible chiller offerings with combination options of motors, impellers, gears and vessels

#### VARIABLE FREQUENCY DRIVE OPTION (VFD)

- › Inverter technology greatly improving part load efficiency
- › Reducing annual energy costs

#### HIGH EFFICIENCY

- › COP up to 7 at full load
- › COP up to 12 at partial load (when coupled with inverter VFD)

#### POWER LOSS DAMAGE PROTECTION

Power failures do not allow chillers to proceed through their normal shutdown sequence. Poor lubrication at this point can damage the bearings and reduce compressor life. The compressors are equipped with a lubricant reservoir and a piston with a compressed spring that provides pressurized lubricant to the bearings during the coast-down period. Also, the compressors decelerate quickly due to the low inertia.

#### REFRIGERANT STORAGE CAPABILITY

The condensers are sized to hold the entire chiller refrigerant charge and are provided with the necessary valves to isolate this charge. This feature eliminates the need for separate storage vessels in most applications.

## UNMATCHED UNLOADING

Unloading to 10% of full load for a DWSC single compressor chiller and 5% for a DWDC dual compressor unit, without using inefficient hot gas bypass. This unloading capability provides improved stability of the chilled water temperature and less harmful cycling of compressors.

Movable discharge diffuser increases stability and reduces vibrations.

Moveable diffuser closing off impeller discharge area

## LOW OPERATIONAL SOUND LEVEL

### Liquid Injection

A small amount of liquid refrigerant is taken from the condenser and injected into the compressor discharge area. The liquid droplets absorb sound energy and reduce the compressor's overall operational sound level. The droplets evaporate and reduce discharge superheat.

### Quieter as chiller unloads

Daikin's design results in a reduction in sound levels at lower loads, where most chillers spend most of their operating hours.

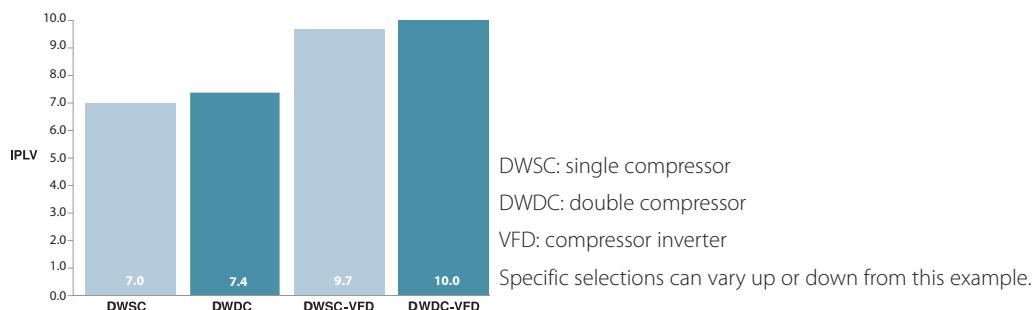

## ONE DWDC DUAL COMPRESSOR CHILLER VERSUS TWO SINGLE COMPRESSOR CHILLERS

- › Lower equipment costs than two separate chillers
- › Lower installation cost than two separate chillers
- › Lower annual operating cost than either one large or two small chillers
- › Less equipment room space required than for two separate chillers  
(smaller footprint)
- › Capacity reduction to 5% of design value
- › Standby redundancy for most of the cooling season options of motors, impellers, gears and vessels

## EXCELLENT PART LOAD EFFICIENCY

When one compressor is running, it is able to utilize the heat transfer area of the entire chiller, twice the amount found on a single compressor chiller. This huge amount of surface provides exceptional part load efficiency. The addition of VFDs to the dual compressor chiller produces a very high ARI certified Integrated Part Load Value (IPLV).

### PARTIAL LOADS EFFICIENCY FOR 2,000 kW CENTRIFUGAL UNIT

**R-134a**

centrifugal

**INVERTER****Reduced life cycle cost**

- › Payback periods as low as 1 to 2 years

**Centrifugal compressor**

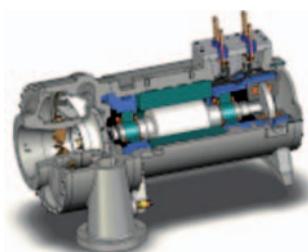

- › Industry's highest full load efficiency
- › Best part load efficiency when coupled with a variable frequency drive
- › One moving part (rotor - shaft assembly)

**Unit mounted Variable Frequency Drive (VFD)**

- › Very high part load efficiency
- › Great unloading capability
- › Automatic speed adjustment
- › Soft start

**Magnetic bearing technology**

- › No friction loss
- › No oil contamination
- › No additional oil management systems
- › Increased equipment life

**WIDE CHOICE OF CAPACITIES AND EFFICIENCIES**

DWME chillers can be selected with different combination of the main components such as the compressor size, the exchangers, the electrical motor, etc. A selected unit, at fixed evaporator and condenser conditions, will provide cooling capacity, power input, EER, etc. depending on the compressor speed of rotation. A dedicated selection tool is available to perform the unit selection at the real working conditions. DWME boast outstanding energy efficiencies, at both full and part load.

SIZE	COOLING CAPACITY
500S	1,400 - 1,900 kW
EER *	up to 6.50
ESEER	up to 10.0

\* at Eurovent conditions:  
Evaporator water In/Out 12/7°C, Condenser water In/Out 30/35°C

## QUIET OPERATION

- › 76~82dB(A) of sound level at 1 meter (according to AHRI standard 575)
- › DWME chillers are ideal for sound sensitive environments such as libraries, schools, etc

## SMART CONTROL

- › On-board advanced electronics allow smart control also in case of power failure
- › User friendly touch screen operator interface

## EXTENSIVE PORTFOLIO OF OPTIONS

### Standard options

- › Water-side vessel construction of 150psi
- › Copper evaporator and condenser tubes
- › 0.025 inches tube thickness
- › Victaulic connections
- › 2 pass heat exchangers
- › Single insulation  $\frac{3}{4}$  inches on evaporator, suction and discharge piping
- › Water differential pressure switches
- › Sound insulation
- › EMI filter

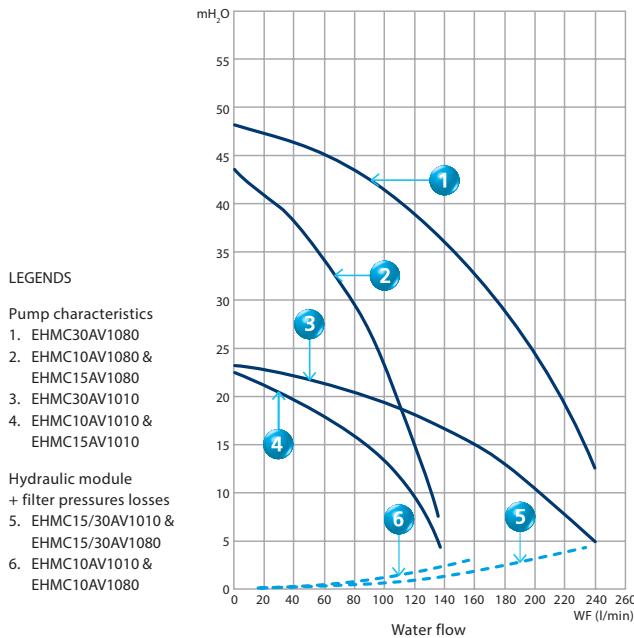

### Options (on request)

- › Water-side vessel construction of 300psi
- › 0.028/0.035 inches tube thickness
- › 90/10 Cu-Ni condenser tubes (only with 0.028/0.035 tube thickness)
- › Flanged connections
- › Marine water boxes
- › 1 or 3 pass heat exchangers
- › Double insulation  $1\frac{1}{2}$  inches on evaporator
- › Pumpout unit
- › Refrigerant monitor
- › Low THD (Harmonics)
- › High short circuit current rating
- › Ground fault protection
- › Input power meter

- > 4 way air discharge and air swing
- > Compact casing (570mm in width and depth) enables unit to fit flush into ceilings and match standard architectural modules, without cutting ceiling tiles
- > Wide operating range
- > Air suction from underneath
- > Easy installation and maintenance
- > Built-in high pressure drain pump with 700mm lift
- > Double-intake centrifugal fans
- > High power air flow
- > 3-speed fan motor
- > Infrared remote control as standard with decoration panel kit

Daikin air handling units, with their plug-and-play design and inherent flexibility, can be configured and combined specifically to meet the exact requirements of any building, no matter what it is used for or who is to work there. Our systems are designed to be the most environmentally friendly and the most energy efficient on the market, thus reducing their ecological impact, while, at the same time, keeping costs down through the minimisation of energy consumption. When combined with the small physical footprint of the system, these features make our air handling units ideal for all markets.

## Overview

\* optional - for Professional and Energy series

\*\* optional

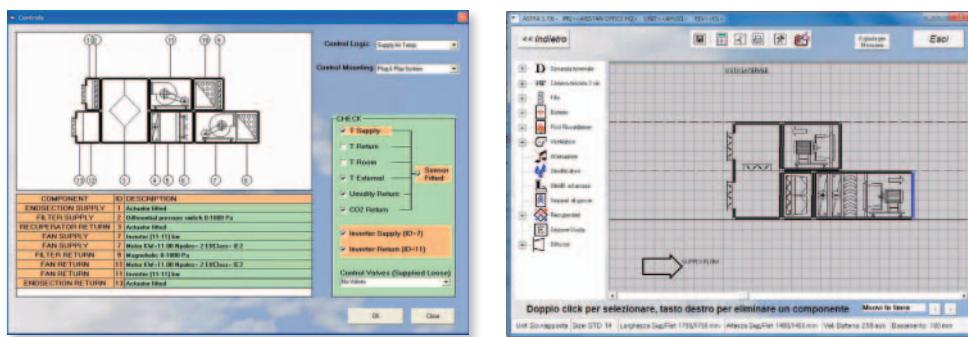

# Daikin Air handling units

## Software

ASTRA is the powerful software that Daikin has developed to offer a quick and comprehensive service for the customer in order to make the technical choice and the economic valorization of each air handling unit. It is a complete tool that can configure any type of product and respond exactly to the strictest design needs. The result is a comprehensive economic offer including all the technical data and drawings, the psychrometric diagram with the relative air treatment and the fans' performance curves. However, Daikin didn't stop there, they went further.

MECCANO is the other powerful software developed and designed to quickly convert the offer in the executive order. Technical drawings to be sent and approved by the client, executive drawings for the production, bill of material, code generation for each component used are just a few of the many functions of the instrument.

The ASTRA-MECCANO integration has therefore made possible the complete automated management of the process by reducing the time of the offer and of the delivery and improving the service to our customers.

## Eurovent certification

Daikin is participating in the Eurovent Certification Programme for Air Handling Units. They are certified under the number 11.05.003 and presented on [www.eurovent-certification.com](http://www.eurovent-certification.com)

DAIKIN AIR HANDLING UNITS		RESULT SP65					EUROVENT CLASSIFICATION ACCORDING TO EN1886				
							CASING MECHANICAL STRENGTH				
Casing mechanical strength	D1	Casing Class		D1		D2		D3		EXCEEDING10	
		Maximum relative deflection mm x m <sup>-1</sup>		4.00		10.00					
							CASING AIR LEAKAGE NEGATIVE PRESSURE -400 PA				
Casing air leakage Negative pressure -400 Pa	L1	Leakage Class		L1		L2		L3			
		Maximum leakage rate ( $f_{400}$ ) l x s <sup>-1</sup> x m <sup>-2</sup>		0.15		0.44		1.32			
							CASING AIR LEAKAGE POSITIVE PRESSURE +700 PA				
Casing air leakage Positive pressure +700 Pa	L1	Leakage Class		L1		L2		L3			
		Maximum leakage rate ( $f_{700}$ ) l x s <sup>-1</sup> x m <sup>-2</sup>		0.22		0.63		1.90			
							FILTER BYPASS LEAKAGE				
Filter bypass leakage	F9	Filter Class		F9		F8		F7		F6	G1 TO F5

# Daikin Air handling units

## The working principle at a glance

Typical configurations for Daikin air handling units provide a versatile range of functions. Our system offers numerous options for customisation through an extensive range of variations and added functionality.

### Supply side

- 1 Damper section including ventilation grilles, factory-mounted actuators
- 2 Bag filter with factory-mounted differential pressure manometer and hinged door
- 3 Heat recovery system (plate heat exchanger or rotation heat exchanger)
- 4 Mixing box with damper and factory-mounted actuators
- 5 R-410A with heat recovery system with galvanised condensate tray and drip protection
- 6 Supply air fan (with hinged door, opening, drive monitoring, mounted and cabled lighting and ON/OFF switch)

### Fans

- > Forward curved fan
- > Backward curved fan
- > Backward airfoil blades fan
- > Plug fan
- > EC plug fan

### Exchangers

- > Water coils
- > Steam coils
- > Direct expansion coil
- > Superheated water coils
- > Electric coils

### Humidifiers

- > Evaporative humidifier without pump (loss water)
- > Evaporative humidifier with re-circulating pump
- > Air washer without pump (loss water)
- > Air washer with re-circulating pump
- > Steam humidifier with direct steam production
- > Steam humidifier with local distributor
- > Atomized water spray humidifier

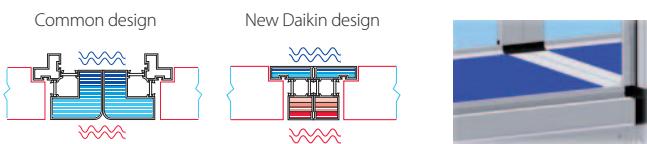

# Daikin Air handling units

Control system on plug and play solution basis

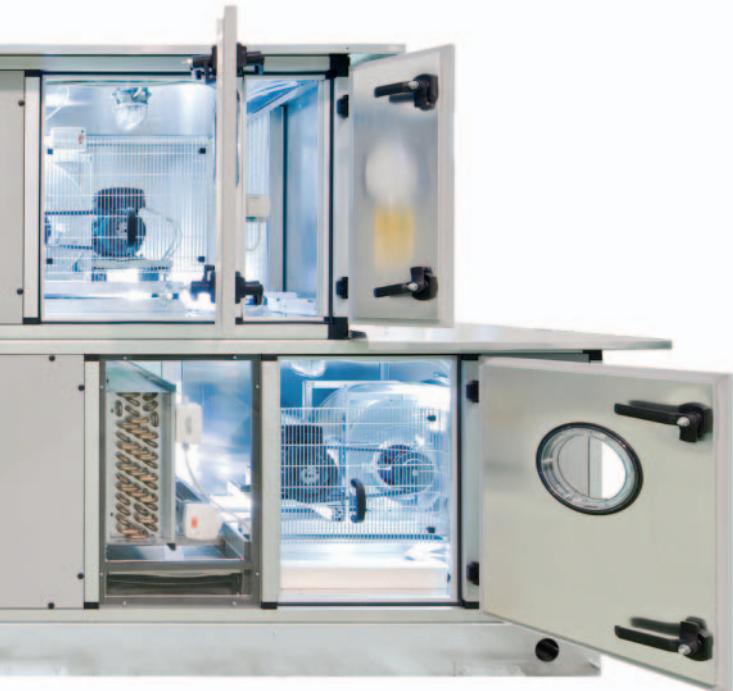

- Air temperature control
- Chilled water and DX cooling system control
- Free cooling
- CO<sub>2</sub> automatic control

Unique section to section thermal break profile

- Thermal bridge free for the entire AHU
- Smooth interior surface with improved IAQ (Indoor Air Quality)

— 8 — 7 —

Return air

Supply air

Return side

- 7 Bag filter with factory-mounted differential pressure manometer and hinged door.
- 8 Exhaust air fan (with hinged door, opening, drive monitoring, mounted and cabled lighting and ON/OFF switch)
- 9 Mixing box with damper and factory-mounted actuators
- 10 Heat recovery system (plate heat exchanger or rotation exchanger)
- 11 Damper section including ventilation grilles, factory-mounted actuators

— 5 — 6 —

## Heat recovery systems

- > Heat wheel, sensible or sorption
- > Plate heat exchanger (optional bypass)
- > Run-around coils

## Other section

- > Attenuator section
- > Mixing box section with actuators or manual controlled dampers
- > Empty section

## Filters

- > Synthetic pleated filter
- > Flat filter aluminium mesh
- > Rigid bag filter
- > Soft bag filter
- > High efficiency filter
- > Carbon absorption filter
- > Carbon deodorizing filter

## Accessories

- > Control features
- > Frost protection
- > Manometers
- > Drive guard
- > Roof
- ...

# Daikin Air handling units

## D-AHU Professional. The most flexible solution

### Pre-defined family of size

Twenty-seven (27) fixed sizes optimized for the most cost effective selection and manufacturing standardization.

### Infinite variable sizing

- Designed for special applications all over the world. It is possible to tailor the unit to customers' needs by very small 1cm increments.
- Air flow from 500 m<sup>3</sup>/h up to 140,000 m<sup>3</sup>/h
- All the sizes are modular manufactured to facilitate the transport and the assembly on site.

### Pre-defined sizes - Overall dimensions

Size	Air Flow (m <sup>3</sup> /h)	Height - mm	Width - mm
1	1.105	550	850
2	1.550	600	900
3	1.980	650	950
4	2.600	780	1.100
5	3.170	780	1.150
6	3.550	800	1.150
7	4.000	800	1.250
8	4.800	850	1.300
9	5.560	900	1.350
10	6.600	900	1.550
11	7.950	1.100	1.550
12	9.320	1.100	1.650
13	10.050	1.150	1.650

Size	Air Flow (m <sup>3</sup> /h)	Height - mm	Width - mm
14	13.200	1.400	1.850
15	19.200	1.500	2.100
16	25.300	1.580	2.650
17	31.500	1.750	2.750
18	37.000	1.800	3.240
19	43.400	2.100	3.090
20	51.300	2.250	3.340
21	58.000	2.250	3.820
22	67.500	2.400	4.040
23	78.000	2.450	4.490
24	84.700	2.700	4.490
25	98.000	2.850	4.890
26	111.000	2.850	5.490
27	124.000	3.000	5.990

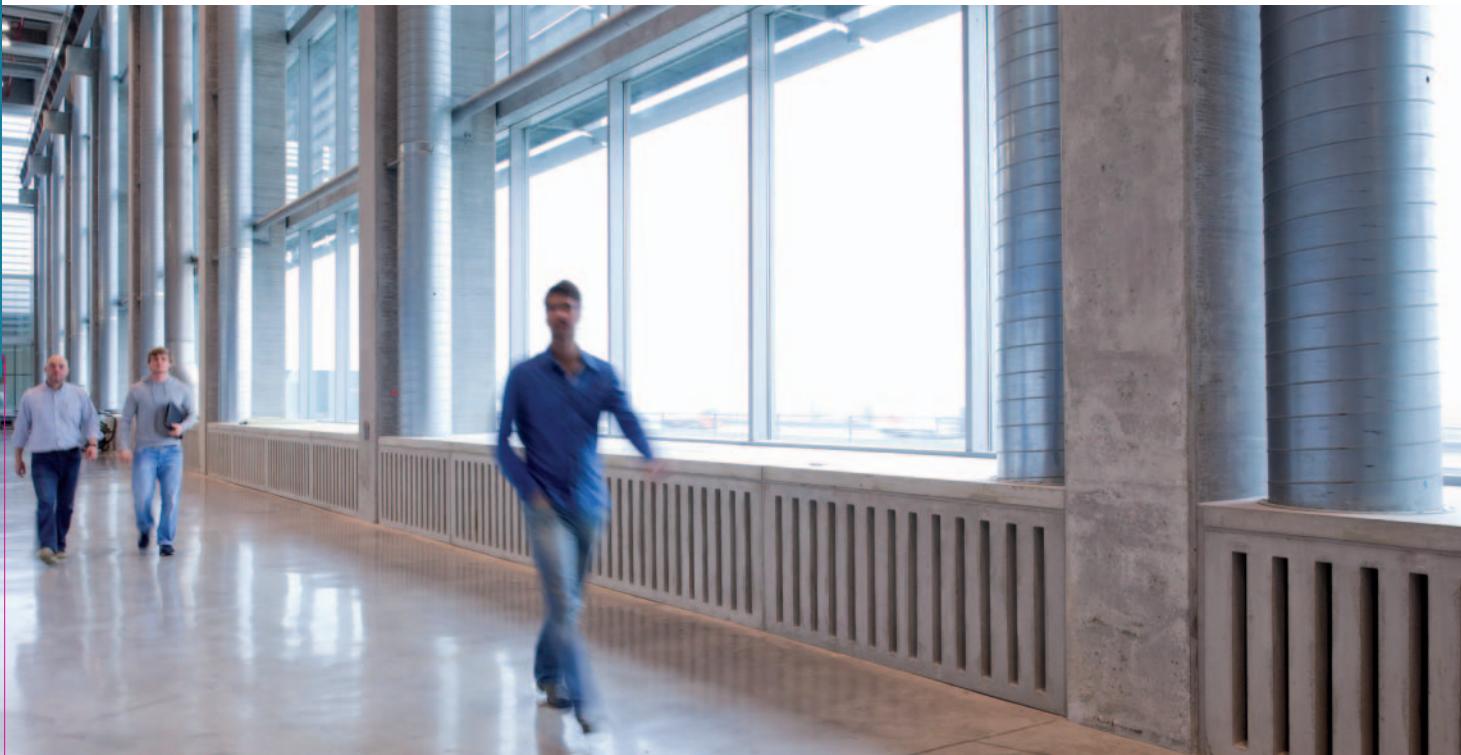

### Infinitely variable sizes

#### Flexible sizing for AHU optimization

- 1 cm increment for width & height dimensions
- No additional cost for customized unit size
- No additional lead time

### Example

Air Flow (m <sup>3</sup> /h)	Unit Size	Height - mm	Width - mm	Face Velocity m/s
15.000	STD 15	1.500	2.100	1.95
	1.500x1.750	1.500	1.750	2.46

# Daikin Air handling units

D-AHU Energy. Best seasonal performance and return on investment

Daikin leads the way in energy efficiency and the Energy series represents the ultimate in air handling units. The D-AHU Energy has been designed to optimize the energy consumption and thus minimize the running cost. When compared with standard AHUs, this means lower seasonal (year-round) power consumption and a reduction in the overall energy bill.

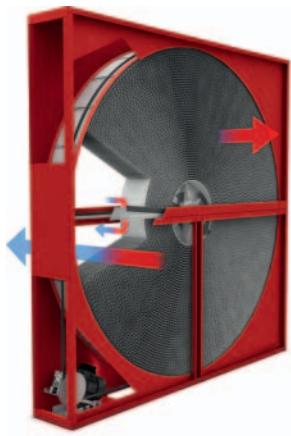

# Daikin Air handling units

## High efficient selected components

### High efficiency heat recovery

The D-AHU Energy series is equipped with high efficiency heat recovery equipment that delivers a minimum of 65% of heat recovered and could go up to the exceptional value of 90% heat recovery. The customer can choose between different equipment and in particular the heat recovery section could be arranged with:

Condensation wheel  
Enthalpy wheel  
Sorption wheel

### Premium efficiency motor

Premium efficiency motors in line with EU regulation (EC) no. 640/2009 are available for the Energy series in order to further reduce electrical power consumption.

### High efficiency fan

Fans with double-width, double-inlet and backward curved airfoil blades are available with efficiency of up to 85% as well as reinforced bearings for longer lifespan.

### Plug and play controls

Daikin has developed a control system to efficiently manage all components selected either independently or through an external supervision system. The control package includes the control panel, advanced microprocessor and in-built sensors for temperature, humidity and air quality.

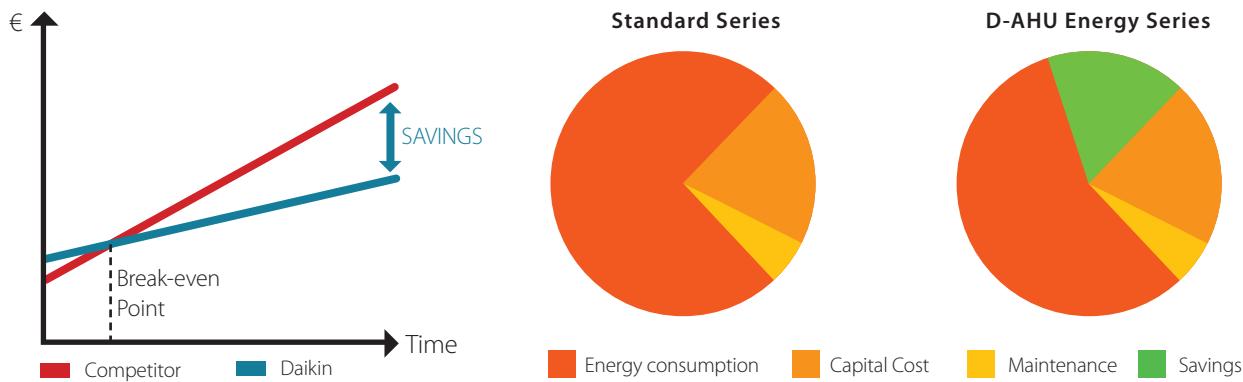

# Daikin Air handling units

## Return On Investment

An air handling unit is critical to an effective climate control system and, although the initial investment can appear high, the savings generated by our advanced designs and operating efficiencies guarantee a rapid return on the investment made. Our D-AHU Energy series has been designed to deliver exceptional performance thus driving down the energy consumed and so lowering energy bills. Taken over the expected 15-year life-span of the equipment, this will result in an enormous saving, especially in a time of ever increasing energy prices.

### AHU Life Cycle Cost (LCC)

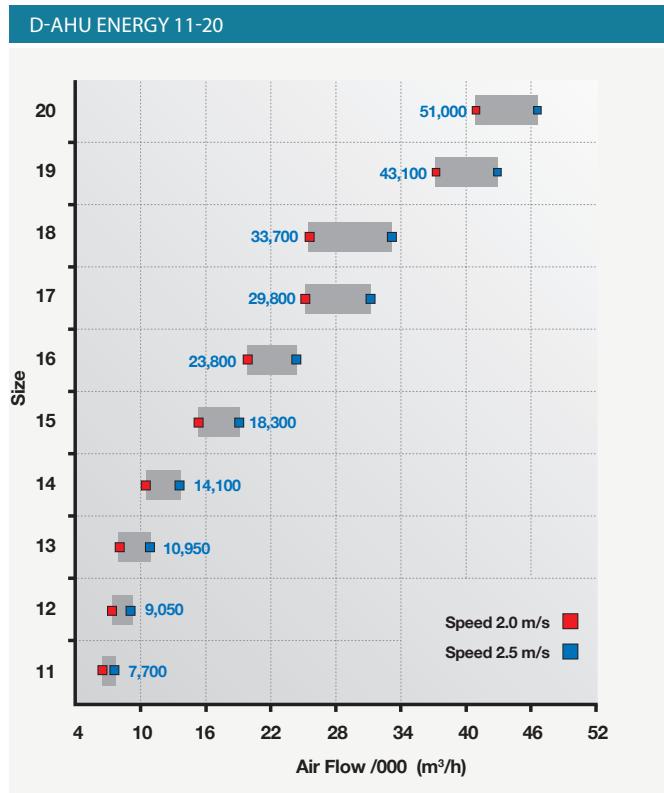

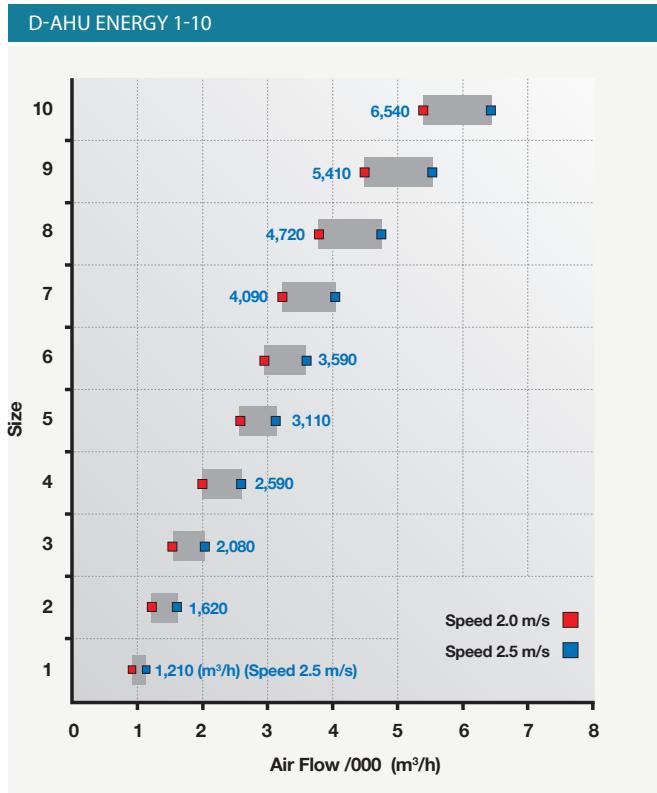

Specific Fan Power (SFP) is a measure used in the evaluation of the energy consumed by an air handling unit. As defined in EN 13053 and EN 13779, the lower the SFP, the lower the power consumption of the entire air handling unit. The D-AHU Energy has been designed to deliver the lowest possible SFP by using the most efficient components designed to provide the perfect solution series to your needs. It is an optimized answer to the European directive on the energy performance of buildings (EPBD) that seeks to reduce the impact on global warming.

# Daikin Air handling units

## D-AHU Energy

### Technical data

**D-AHU ENERGY 1-20**

Size	Air Flow (m³/h) Speed 2.5 m/s	Height - mm	Width - mm
1	1,210	580	720
2	1,620	610	770
3	2,080	680	820
4	2,590	750	870
5	3,110	750	990
6	3,590	750	1,100
7	4,090	800	1,110
8	4,720	810	1,240
9	5,410	870	1,270
10	6,540	970	1,370
11	7,700	1,050	1,370
12	9,050	1,110	1,470
13	10,950	1,180	1,620
14	14,100	1,360	1,720
15	18,300	1,480	1,970
16	23,800	1,610	2,270
17	29,800	1,740	2,570
18	33,700	1,900	2,710
19	43,100	2,090	3,060
20	51,000	2,220	3,360

### Infinitely variable sizes

#### Flexible sizing for AHU optimization

- 1 cm increment for width & height dimensions
- No additional cost for customized unit size
- No additional lead time

#### Example

Air Flow (m³/h)	Unit Size	Height - mm	Width - mm	Face Velocity m/s
		Size 15	1,480	
15,000		1,480 x 1,660	1,480	2.50

# Daikin Air handling units

D-AHU Easy. Ideal to cover your simple AHU needs

The range covers an area of air flow rates from 500 m<sup>3</sup>/h up to 30,000 m<sup>3</sup>/h\*, with the possibility to choose the more appropriate face velocity, depending on the treatment required.

## Pre defined sizes

Fifteen fixed sizes optimized to reach the best compromise between competitiveness and manufacturing standardization.

## Pre defined sizes - Overall dimension

Size	Air Flow (m <sup>3</sup> /h) Speed 2.5 m/s	Height - mm	Width - mm
Std 1	1,105	550	850
Std 2	1,550	600	900
Std 3	1,980	650	950
Std 4	2,600	780	1,100
Std 5	3,170	780	1,150
Std 6	3,550	800	1,150
Std 7	4,000	800	1,250
Std 8	4,800	850	1,300
Std 9	5,560	900	1,350
Std 10	6,600	900	1,550
Std 12	9,320	1,100	1,650
Std 14	13,200	1,400	1,850

## Variable Dimensioning

Designed to overcome installation constraints where space requirements of the section "height x width" must be adapted to the available space. The system gives the possibility to tailor the unit sizes through increments of 1 cm average.

## Example

Air Flow (m <sup>3</sup> /h)	Unit Size	Height - mm	Width - mm	Face Velocity m/s
15.000	STD 15	1,500	2,100	1.95
	1.500x1.700	1,500	1,700	2.48

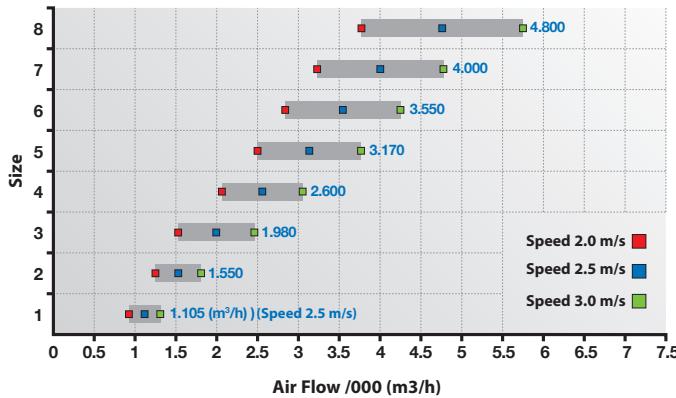

## Infinitely variable sizes

### Flexible sizing for AHU optimization

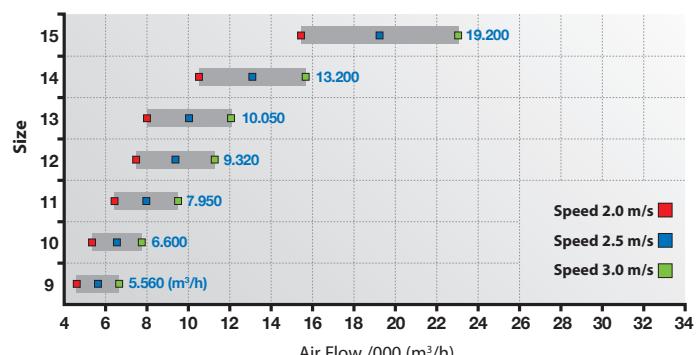

- 1 cm increment for width & height dimensions
- No additional cost for non-standard unit size
- No additional lead time

\*Air Flow limits of 500 m<sup>3</sup>/h and 30,000 m<sup>3</sup>/h are calculated using non standard sizes (max dimensions 2,150x2,150) and considering 2.5 m/s coil face velocity

## D-AHU Easy 1-8

## D-AHU Easy 9-15

# Daikin Air handling units

## Plug and play: More control, more flexibility

The new plug and play control system gives end-users a higher degree of control than ever before, allowing the user to determine a wide range of settings, resulting in excellent operational flexibility.

The factory-fitted electrical control panel, complete with Direct Digital Control (DDC) controller, is combined with in-built temperature, humidity and CO<sub>2</sub> sensors to control mixing dampers, heat recovery wheels, water valves, pressure switches for filters and fans, fan motors and inverters.

All these components are wired internally and individual AHU modules are linked by fast connectors.

The AHU control system can manage the chilled water coil, hot water coil, DX cooling and/or heating coil(s) (in conjunction with ERQ/VRV) of single or multiple refrigerant circuits (up to a maximum of four circuits per DX coil).

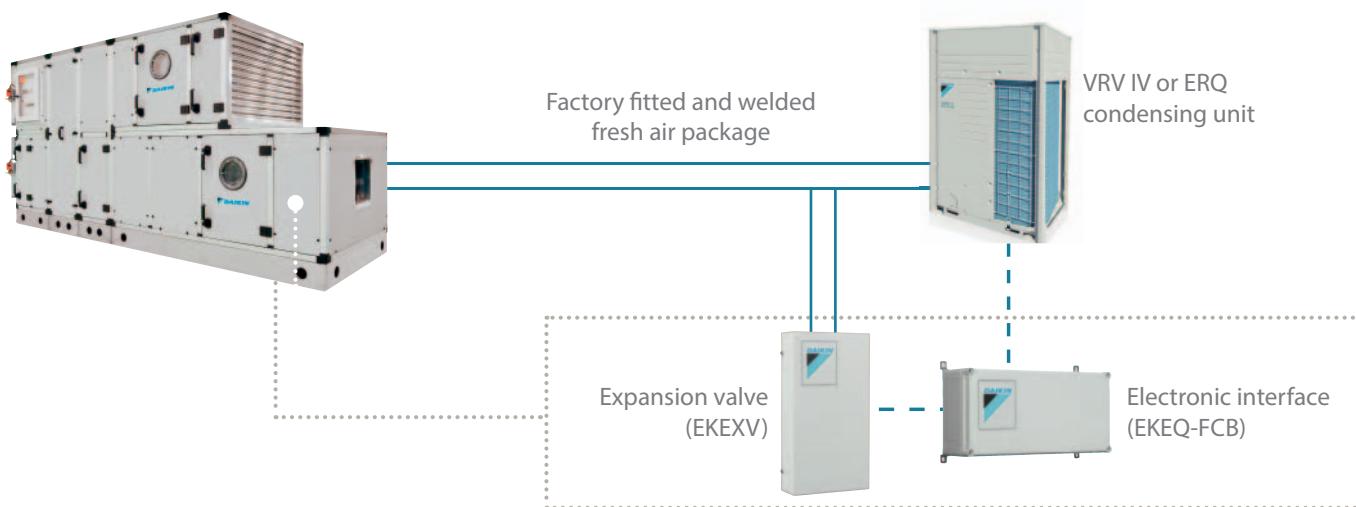

## Daikin Fresh Air package

### High Efficiency

Daikin heat pumps are renowned for their high energy efficiency. The VRV range offers both heat pump and heat recovery units with part load efficiencies as high as 9.02. Integrating the AHU with a heat recovery system is highly effective since an office system can frequently be in cooling mode while the outdoor air is too cold to be brought inside in an unconditioned state. In this case heat from the offices is merely transferred to heat up the cold incoming fresh air. In the absence of an AHU this 'free heating' of incoming fresh air would not be possible.

### High Comfort Levels

Daikin ERQ and VRV units respond rapidly to fluctuations in supply air temperature, resulting in a steady indoor temperature and resultant high comfort levels for the end user. The ultimate is the VRV range which improves comfort even more by offering continuous heating, also during defrost.

Daikin offers a wide range of condensing units for cooling and freezing applications. Daikin refrigeration units combine efficiency and reliability with easy installation and maintenance.

# ZEAS condensing units

The ZEAS condensing units are the perfect solution for applications with fluctuating loads and high energy efficiency needs, including supermarkets, blast coolers and freezers, cold storage, butchers, bakeries, restaurants and petrol station retail outlets.

On top of that, the small footprint and small sound emissions allow installations in narrow spaces and urban surroundings.

# ZEAS condensing units

## High energy efficiency

### Market-leading energy efficiency for reduced costs and lower environmental impact.

The combination of Daikin's renowned VRV and DC brushless inverter technology - unique within the refrigeration business - means that the ZEAS delivers high energy efficiency even under partial load conditions. This results in reduced energy consumption which has a positive impact on costs and the environment. The ZEAS condenser is ideal for chilled display units, blast coolers, freezers and cold storage in a variety of business situations.

## Fully packaged unit

The ZEAS units are factory-assembled to ensure that all the correct components are installed and work together in an optimal manner thus reducing the installation time. The units are then subjected to a range of tests to ensure the correct performance and that there are no leaks of the pre-loaded refrigerant. This, together with the advanced, built-in controls that are pre-charged for automated optimisation and safety regulation, mean that the ZEAS is truly a plug-and-play installation.

## Small footprint and low weight

### The best things come in small packages

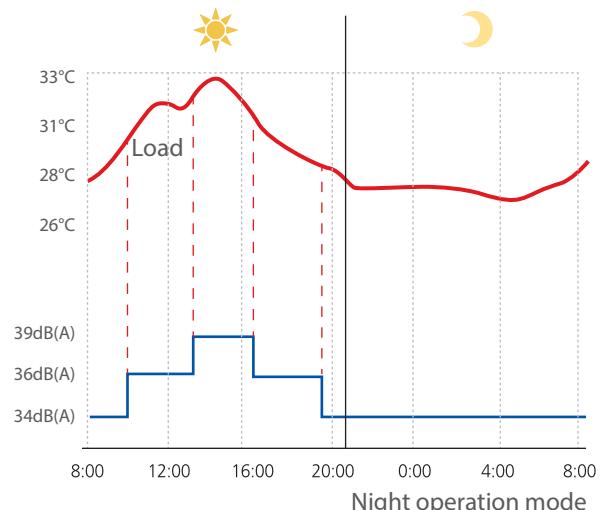

The small physical size of the ZEAS condensing units belie their power. The low overall dimensions of these units, the smallest 10hp condensing units on the market, means that they can be installed close to where they are required. This eliminates the need for a dedicated technical room, providing enormous savings in term of space, a critical economic benefit in applications such as supermarkets. All in all, the ZEAS provides the best surface-to-capacity ratio in the market.

## Low sound level

### A neighbourhood-friendly choice

ZEAS condensing units are far quieter than traditional units, because the inverter control allows fan speeds to be kept low while still meeting cooling demand. Sound levels can be further adjusted to match environmental requirements or the time of day. At night, for example, maximum fan speeds can be lowered to reduce noise from 39 dB(A) to 32 dB(A), with only a limited loss of refrigeration capacity. The fans have blades and grills specially designed to reduce turbulence and thus noise level.

LREQ8-12BY1

- > One model for all applications from -45°C to 10°C evaporating temperature
- > Perfect solution for all cooling and freezing applications with variable load conditions and high energy efficiency requirements. In particular used in supermarkets, cold storage, blast coolers and freezers etc.
- > DC inverter scroll compressor with economiser function results in high energy efficiency and reliable performance
- > Reduced CO<sub>2</sub> emissions thanks to the use of R-410A refrigerant and low energy consumption
- > Factory tested and pre-programmed for quick and easy installation and commissioning
- > VRV (Variable Refrigerant Volume) technology for flexible application range
- > Increased installation flexibility thanks to limited dimensions
- > Low sound level including "night mode" operation
- > Possibility to connect to booster unit for small LT applications

CONVENI-PACK IS A COMPACT, LOW NOISE SYSTEM WHICH INTEGRATES MEDIUM AND LOW TEMPERATURE REFRIGERATION AND AIR CONDITIONING (INCLUDING HEATING) INTO ONE SYSTEM.

## Helping retailers save energy and the environment

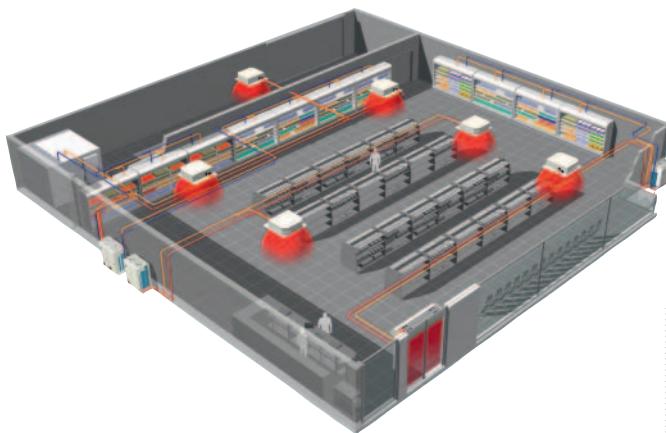

Retailers are faced with a growing need for fresh goods, prepared meals and chilled drinks. At the same time, environmental and zoning requirements are stricter than ever, and energy costs must be kept under control. Conveni-Pack minimises total energy demand due to its unique, integrated approach to refrigeration and air conditioning.

## A total solution for small applications

Conveni-Pack is unique in combining refrigeration and air conditioning equipment in one total solution using the latest controls and inverter technology in order to maximize energy efficiency. The system can be connected to basically all refrigeration applications and is supplied with a wide range of air conditioning indoor units to respond to all shop requirements. An optional booster unit is available for low temperature refrigeration.

- › Inverter driven outdoor units match system output to actual demand in order to reach optimum efficiency under all conditions
- › Conveni-Pack supports a wide variety of refrigeration and cooling units
- › By recovering the heat extracted from the connected refrigeration appliances, and by using sophisticated controls, energy savings of up to 50% or more can be reached.
- › Small footprint, reduced piping, quiet operation: ideal for densely populated urban areas

## A flexible system for larger applications

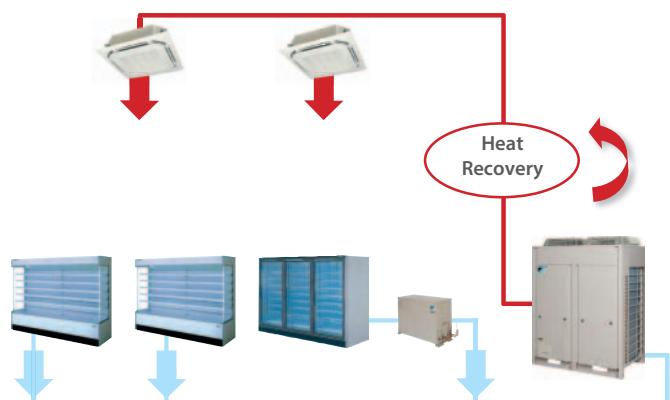

Conveni-Pack's modular design allows it to be used for smaller as well as larger shops. One or more outdoor units can be installed throughout the building, inside or outside.

## Capacity range

By combining Conveni-Pack and ZEAS condensing units the optimum integrated solution for freezing, chilling, space heating and cooling can be provided for virtually any shop concept.

## Heat Recovery

The heat extracted from the refrigeration showcases and/or evaporators can be re-used for comfort heating of the shop... at no extra cost!

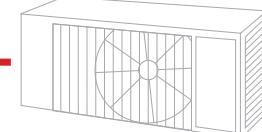

## Reduced footprint

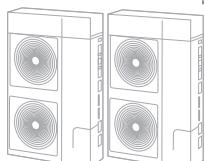

The Conveni-Pack outdoor unit is compact when compared to conventional systems. Its footprint is 60% smaller, allowing it to be used in applications where space is restricted.

# Indoor units for connection to Conveni-Pack

To respond to all shop requirements for comfort cooling and heating, a wide range of VRV indoor units and Biddle air curtains are available.

Model	Product name		Capacity								
			50	63	71	80	100	125	140	200	250
Round flow cassette	FXFQ-A

Biddle air curtain recessed	CYVL-DK					

LRYEQ16AY1

- > Integrates high and low temperature refrigeration and air conditioning (including heating) into one system
- > By using heat recovery, optimised controls and state of the art compressor technology, Conveni-Pack can reduce annual energy consumption up to 60%, compared to conventional systems
- > Lower associated CO<sub>2</sub> emissions thanks to the heat pump technology
- > Conveni-pack's modular design allows it to be used for smaller as well as larger shops
- > The modularity of the Conveni-Pack system maximises installation flexibility. Outdoor units can be grouped into blocks or rows, or distributed around the building, to meet individual installation constraints
- > The heat extracted from the refrigeration showcases or evaporators can be re-used for comfort heating of the shop at no extra cost
- > Low sound level including "night mode" operation

	Charged volume	l		0.85 / 0.5
Power supply	Phase/Frequency/Voltage	Hz/V		1~/50/220-240

Designed for outdoor use, the condensing units are a perfect commercial refrigeration solution for cold stores or freezer rooms, small food retails, restaurants, petrol station shops, etc in low and medium temperature applications.

### Main benefits

- › Low operation sound level
- › Easy to install - fully equipped - packaged
- › Energy efficiency and performance
- › Robust and reliable design

### Installer benefits

- › Small, compact and robust for easy handling and installation in limited space
- › Fully factory tested and pre-wired electrical box for quick and easy installation and commissioning
- › Easy service thanks to very accessible components behind removable robust panels

### End-user benefits

- › Very quiet operation
- › Strong anti-corrosion housing for long life, even in harsh environmental conditions
- › Trustworthy units, with proven component reliability and fully qualified for the most demanding applications
- › Reduced energy consumption, thanks to efficient compressors and condenser fan speed control (except series 1)
- › Fully packaged unit at a competitive price

Designed for outdoor use, the large condensing units are a perfect medium to high capacity refrigeration solution for cold stores, distribution platforms, supermarkets, food processing, etc in low and medium temperature applications

These industrial condensing units are real workhorses designed for maximum performance in minimum space.

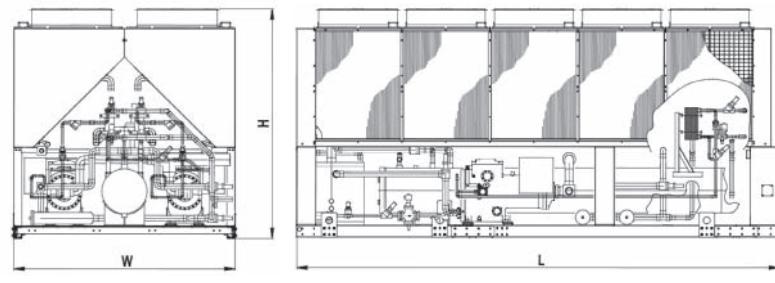

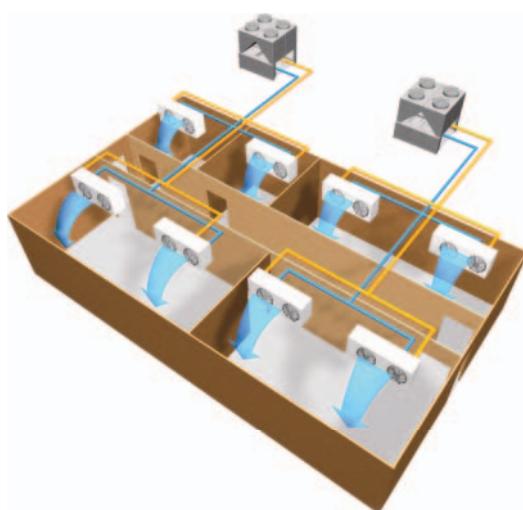

- › High energy efficiency: inverter controlled compressor, economizer, high performance condenser
- › Possibility of having a stand-by compressor
- › Easy installation, ready to connect evaporators
- › Integrated starter and control panel with electronic controller
- › Space saving construction due to the compact design of the condenser coils arranged in a 'W' configuration
- › Low sound operation
- › Approved according to EN 378: 2008 (Safety and environmental requirements)
- › Refrigerants: R-404A, R-134a, R-407C, R-507A

A comprehensive product range with 1 or 2 compressors and 4, 6, 8 or 10 condenser fans

- › Chilled application: 113 - 417 kW  
(at T<sub>0</sub> = -10°C / Tamb = +32°C / R-404A)
- › Frozen application: 37 - 159 kW  
(at T<sub>0</sub> = -35°C / Tamb = +32°C / R-404A)

### Wired remote control

- › Schedule timer:
  - Five day actions can be set as follows:
    - set point: unit is switched ON and normal operation is maintained
    - OFF: unit is switched OFF<sup>1</sup>
    - limits: unit is switched ON and min./max. control (cf. limit operation for more details)
- › Home leave (frost protection): during absence, the indoor temperature can be maintained at a certain level.  
This function can also switch the unit ON/OFF
- › User friendly HRV function, thanks to the introduction of a button for ventilation mode and fan speed
- › Constantly monitoring of the system for malfunctions in a total of 80 components
- › Immediate display of fault location and condition
- › Reduction of maintenance time and costs

### Display

- › Operating mode<sup>1</sup>
- › Heat Recovery Ventilation (HRV) in operation
- › Cool / heat changeover control
- › Centralised control indication
- › Group control indication
- › Set temperature<sup>1</sup>
- › Air flow direction<sup>1</sup>
- › Programmed time
- › Inspection test / operation
- › Fan speed<sup>1</sup>
- › Clean air filter
- › Defrost / hot start
- › Malfunction

<sup>1</sup> Only functions marked with '1' are available on BRC944B2

## ARC4\*/BRC4\*/BRC7\*

### Infrared remote control

Operation buttons: ON/OFF, timer mode start/stop, timer mode on / off, programme time, temperature setting, air flow direction (1), operating mode, fan speed control, filter sign reset (2), inspection (2)/test indication (2)  
Display: Operating mode, battery change, set temperature, air flow direction (1), programmed time, fan speed, inspection/test operation (2)

1. Not applicable for FXDQ, FXSQ, FXNQ, FBDQ, FDQS, FBQ
2. For FX\*\* units only
3. For all features of the remote control, refer to the operation manual

## BRC3A61

### Simplified built-in remote control for hotel applications

Compact, user friendly unit, ideal for use in hotel bedrooms

Operation buttons: ON/OFF, fan speed control, temperature setting

Display: Heat Recovery Ventilation (HRV) in operation, set temperature, operating mode, centralised control indication, fan speed, defrost/hot start, malfunction

## BRC2C51

### Simplified remote control

Simple, compact and easy to operate unit, suitable for use in hotel bedrooms

Operation buttons: ON/OFF, operating mode selection, fan speed control, temperature setting

Display: Cool/heat changeover control, Heat Recovery Ventilation (HRV) in operation, set temperature, operating mode, centralised control indication, fan speed, defrost/hot start, malfunction adjustment, operating mode selection, fan speed control, filter sign reset, inspection test/operation

NEW

## Simplified wired remote control developed for hotel applications

- › Symbol driven interface for intuitive control
- › Functions restricted to basic customer needs
- › Contemporary design
- › Energy saving thanks to set point limitation
- › Flat backpanel for easy installation
- › 2 versions available:
  - Heat pump type: temperature, fan speed, ON/OFF
  - Heat recovery type: temperature, mode, fan speed, ON/OFF
- › Replaces existing BRC2C51 & BRC3A61
- › Available spring 2014

# Save energy

A series of energy saving functions that can be individually selected

- > Temperature range limit
- > Setback function
- > Presence & floor sensor connection (available on new round flow cassette)
- > kWh indication
- > Set temperature auto reset
- > Off timer

Temperature range limit avoids excessive heating or cooling

Save energy by constraining the lower temperature limit in cooling and upper temperature limit in heating mode.

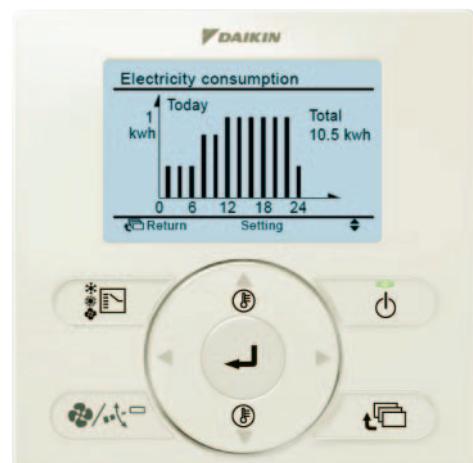

note : Also available in auto cooling/heating change over mode.

kWh indication keeps track of your consumption

The kWh indication shows an indicative electricity consumption of the last day/month/year.

## Other functions

- > Up to 3 independent schedules can be set, so the user can easily change the schedule himself throughout the year (e.g. Summer, winter, mid-season)
- > Possibility to individually restrict menu functions
- > Easy to use: all main functions directly accessible
- > Easy setup: clear graphical user interface for advanced menu settings
- > Real time clock with auto update to daylight saving time
- > Built-in backup power: when a power failure occurs all settings remain stored up to 48 hours
- > Supports multiple languages
  - English, German, Dutch, Spanish, Italian, Portuguese, French, Greek, Russian, Turkish, Polish (BRCAE52A)
  - English, German, Czech, Croatian, Hungarian, Romanian, Slovenian, Bulgarian, Slovak, Serbian, Albanian (BRCAE52B)

Graphical display of indicative electricity consumption

## Daikin Altherma low temperature wired remote control

The Daikin Altherma low temperature is equipped with a new user interface. Commissioning, servicing and day-to-day operation become straightforward. The multi-lingual and graphical interface provides full-text representation, easy menu navigation and intelligent control features

- > Self-explanatory controller for easy and quick commissioning
- > Possibility of preparing and uploading field settings via a PC
- > Feedback on operation conditions and energy consumption

## Overview controllers for Siesta Sky Air

Siesta Sky Air indoor units	Controllers
ACQ-C 4-way blow, ceiling mounted cassette	- Standard infrared remote control in box of decoration panel ADP125A - Optional wired remote control ARCWB - Optional group controller
AHQ-C ceiling suspended	- Standard infrared remote control in box of indoor unit - Optional wired remote control ARCWB - Optional group controller
ABQ-C concealed ceiling	- Standard wired remote control (ARCWA) in box of indoor unit - Optional group controller

## Overview of features

Feature	ARCWA	ARCWB
	Standard with ABQ-C	Option for AHQ-C and ACQ-C
		
1 ON/OFF switch	Standard	Standard
2 Temperature setting	Default range 16-30°C Optional range 20-30°C Switch between °C and °F	By dipswitch selection Standard
3 Room temperature display	Standard	Not available
4 Room temperature sensor on remote control	Standard	Standard
5 Cool / Fan dry / Heat / Auto	Standard	Standard
6 Sleep mode	Standard	Standard
7 Fan Speed selection	Standard	Standard
8 Delay timer	1, 2 & 4 hours delay	1, 2 & 4 hours delay
9 7-days programmable timer	Standard	Standard
10 Real time clock display	Standard	Standard
11 Air swing selection	ON/OFF swing mode Change swing option (draft/soil prevention or standard)	Standard Not available
12 LCD display without backlight	Standard	Standard
13 Key lock	Standard	Standard
14 Error code indication	Standard	Standard
15 IR receiver to enable compatibility with infrared remote control (disabled when lock function is activated)	Standard	Standard
16 Last state memory from indoor PCB	Standard	Standard
17 Silent mode	Not available	By dipswitch selection
18 Turbo mode	Not available	By dipswitch selection
19 Compressor test model (compressor force ON)	Standard	Standard
20 Daikin inverter error code	Not available	Standard
21 UART communication port (for Daikin protocol)	Not available	Standard
22 Backup battery	Standard	Standard

## Specifications

**Dimensions** (length x width x height) ARCWB: 0.15 m x 0.21 m x 0.04 m.

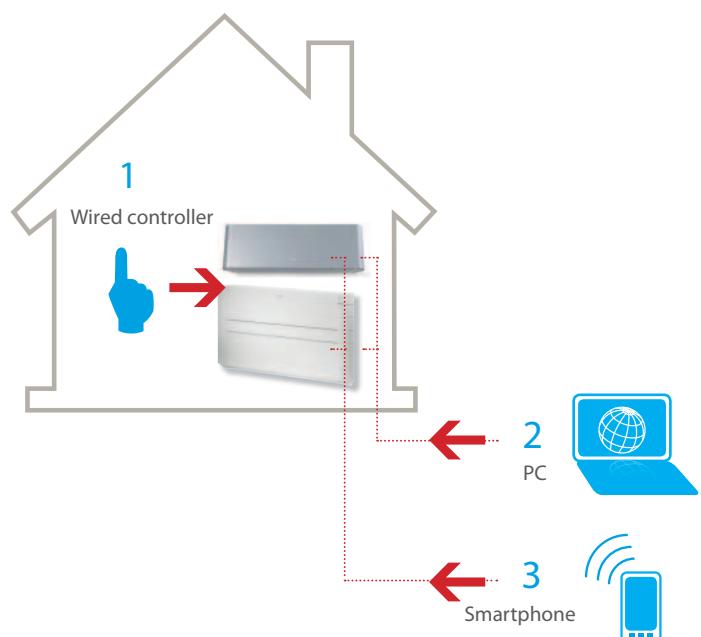

ARCWB comes standard with a 10 meter wire, which can be extended to maximum wire length of 15 meter. For reference: ARCWA comes standard with a 10 meter wire, which cannot be extended.

ARCWB & ARCWA can only control **one indoor unit** at a time; group control is only possible when using option R04084124324.

# Always in control, no matter where you are

Daikin provides a new control solution to monitor and control the main functions of the residential indoor units. The system is working in an end-user friendly way and can be used from any location via your smartphone, laptop, PC, tablet or touch screen.

## Residential use:

Optimal home comfort / holiday home surveillance

- › Create a comfortable home climate  
at any time and at any place
- › Remote detection of failures

## Light commercial use:

Flexible office solution

- › Dynamic group control in open space
- › Fault manager / event logger
- › Easily create a yearly schedule (iPlanner)
- › Back-up configuration of air conditioning

## Available software features

	Residential*	Light commercial **	Extended light commercial **

## Possible indoor units:

- > FTXG20-50LW/S
- > FTXZ25-50N
- > FTXS35-50K
- > FTXS60-71G
- > FTX50-71GV
- > FVXS25-50F
- > FVXG25-50K
- > FLXS25-60B

## App

Daikin gives you a whole new way to control & monitor your residential indoor units. Ask your Daikin installer to equip your unit with an Online Controller (KKRP01A) and now you have the option to manage your unit on your iPhone/iPad, no matter where you are! Personalize your device by name and a unique icon. Create groups to set individual parameters for multiple devices in one tap. Or check weather conditions and forecasts at unit location.

Install the app with below QR code

## Specifications

### Online controller KKRPO1A

COMMUNICATION INTERFACES	
Ethernet LAN 10/100 Mbit/s	for connection intro LAN network
MODBUS	for connection of accessories
serial S21 cable 1,3m	for connection with A/C indoor unit
Power supply	directly from IU - 5 V DC for Online Controller, 12 V DC for accessories
Power consumption	120 mA, 0,6 W
IP code	IP10 / IP44 - inside A/C unit
OTHERS	
Mounting	inside of A/C IU or intro External Mounteing Kit
Weight	50g
Dimensions (W X h X d)	64 X67 X 17 mm (without cable)

## Options

MATERIAL NAME	DESCRIPTION	EXPLANATION
KKRPM01A	External mounting kit	To install online controller outside the indoor unit or to extend the length of the cable between indoor unit and KKRPO1A. It can easily be mounted on the wall of hidden in false ceilings.
KKRPW01A	Wifi Cable Pack	To enable wireless internet connection. Wifi module to be purchased locally.
KBRCS01	Easy wall controller	Wired controller to be installed on the wall. Designed to easily control one indoor unit or a group of indoor units.
KBRC01A	Touch LCD wall controller	

# Centralised control systems

DCS302C51

DCS301B51

DST301B51

Centralised control of the Sky Air and VRV system can be achieved via 3 user friendly compact controls: centralised remote control, unified on/off control and schedule timer. These controls may be used independently or in combination where 1 group = several (up to 16) indoor units in combination and 1 zone = several groups in combination.

A centralised remote control is ideal for use in tenanted commercial buildings subject to random occupation, enabling indoor units to be classified in groups per tenant (zoning).

The schedule timer programmes the schedule and operation conditions for each tenant and the control can easily be reset according to varying requirements.

## DCS302C51

### Centralised remote control

Providing individual control of 64 groups (zones) of indoor units.

- a maximum of 64 groups (128 indoor units, max. 10 outdoor units) can be controlled
- a maximum of 128 groups (128 indoor units, max. 10 outdoor units) can be controlled via 2 centralised remote controls in separate locations
- zone control
- group control
- malfunction code display
- maximum wiring length of 1,000m (total: 2,000m)
- air flow direction and air flow rate of HRV can be controlled
- expanded timer function

## DCS301B51

### Unified ON/OFF control

Providing simultaneous and individual control of 16 groups of indoor units.

- a maximum of 16 groups (128 indoor units) can be controlled
- 2 remote controls in separate locations can be used
- operating status indication (normal operation, alarm)
- centralised control indication
- maximum wiring length of 1,000m (total: 2,000m)

## DST301B51

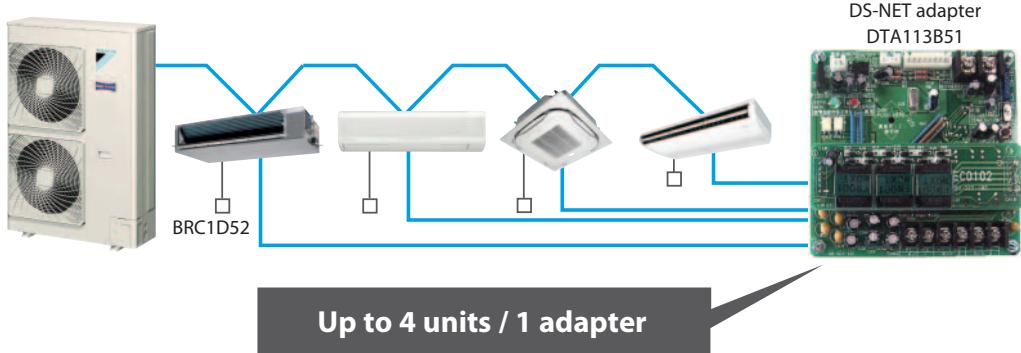

### Schedule timer

Enabling 64 groups to be programmed.

- a maximum of 128 indoor units can be controlled
- 8 types of weekly schedule
- a maximum of 48 hours back up power supply
- a maximum wiring length of 1,000m (total: 2,000m)

# Basic solution for control of Sky Air and VRV

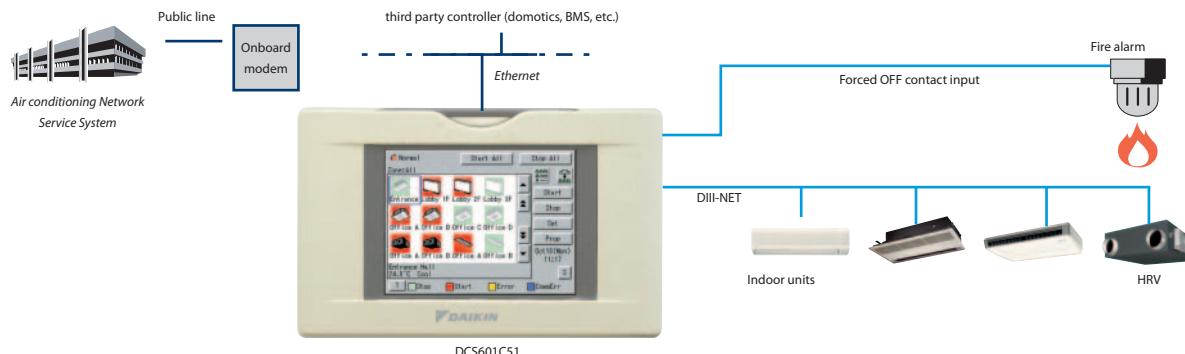

- > Rotation function
- > Backup operation function.

## DCS601C51

**intelligent touch Controller**

Detailed & easy monitoring and operation of VRV systems (max. 64 indoor units groups).

### Languages

- > English
- > French
- > German
- > Italian
- > Spanish
- > Dutch
- > Portuguese

### System layout

- > Up to 64 indoor units can be controlled
- > Touch panel (full colour LCD via icon display)

### Management

- > Easy management of electricity consumption
- > Enhanced history function

### Control

- > Individual control (set point, start/stop, fan speed) (max. 64 groups/indoor units)
- > Set back schedule
- > Enhanced scheduling function (8 schedules, 17 patterns)
- > Flexible grouping in zones
- > Yearly schedule
- > Fire emergency stop control
- > Interlocking control
- > Increased HRV monitoring and control function
- > Automatic cooling / heating change-over
- > Heating optimization
- > Temperature limit
- > Password security: 3 levels (general, administration & service)
- > Quick selection and full control
- > Simple navigation

### Monitoring

- > Visualisation via Graphical User Interface (GUI)
- > Icon colour display change function
- > Indoor units operation mode
- > Indication filter replacement
- > Multi PC

### Cost performance

- > Free cooling function
- > Labour saving
- > Easy installation
- > Compact design: limited installation space
- > Overall energy saving

### Open interface

- > Communication to any third party controller (domotics, BMS, etc.) is possible via open interface (http option)

### Connectable to

- > VRV
- > HRV
- > Sky Air
- > Split (via interface adapter)

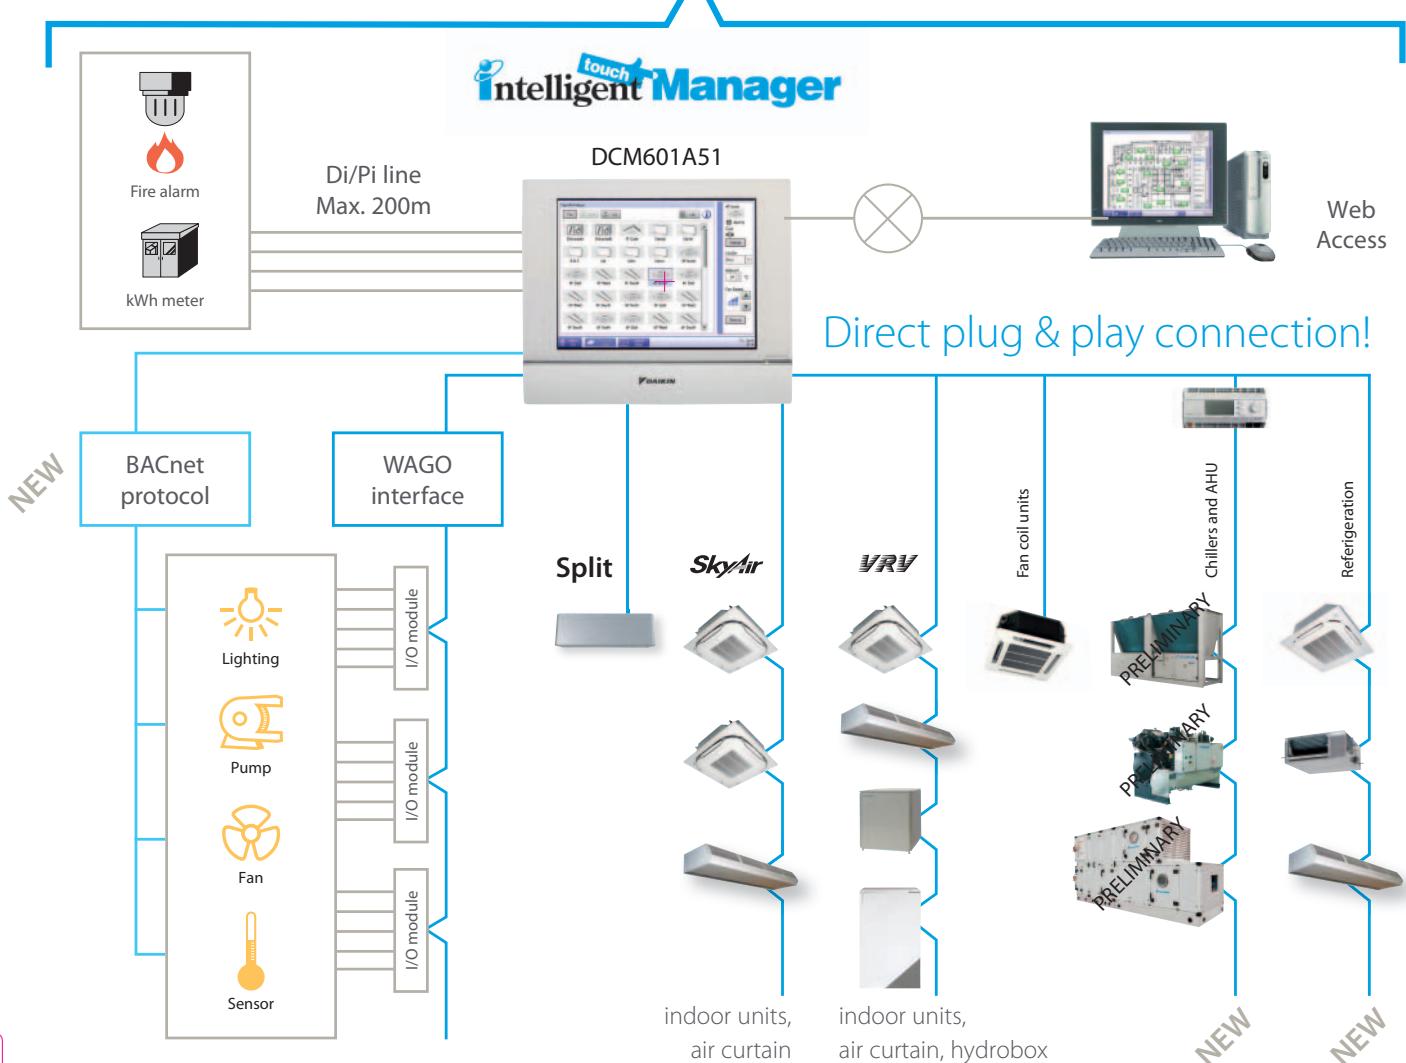

# New Management control

# Full integration across all product pillars

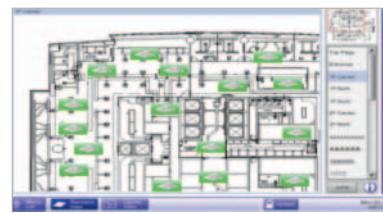

- ✓ Cost competitive mini BMS
  - ✓ Cross-pillar integration of Daikin products
  - ✓ Integration of third party equipment

## System overview

## User friendliness

- › Intuitive user interface
- › Visual lay out view and direct access to indoor unit main funtions
- › All functions direct accessible via touch screen or via web interface

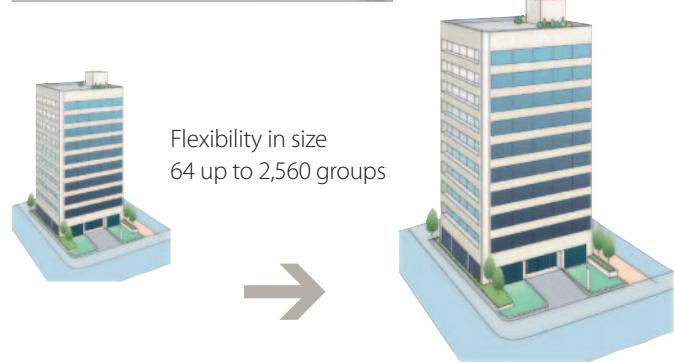

## Smart energy management

- › Monitoring if energy use is according to plan
- › Helps to detect origins of energy waste
- › Powerful schedules guarantee correct operation throughout the year
- › Save energy by interlocking A/C operation with other equiment such as heating

## Flexibility

- › BACnet protocol for 3rd party products integration
- › I/O for integration of equipment such as lights, pumps... on WAGO modules
- › Modular concept for small to large applications
- › Control up to 2,560 indoor unit groups

## Easy servicing and commissioning

- › Remote refrigerant containment check preventing on site visit
- › Simplified troubleshooting
- › Save time on commissioning thanks to the pre-commissioning tool
- › Auto registration of indoor units

## Functions overview

DCM601A51

### Languages

- › English
- › French
- › German
- › Italian
- › Spanish
- › Dutch
- › Portuguese

### System layout

- › Up to 2,560 unit groups can be controlled (iTM plus Integrator + 7 iPU (incl. iTM adaptor))
- › Ethernet TCP/IP

### Management

- › Web access
- › Power Proportional Distribution (option)
- › Operational history (malfunctions, operation hours, ...)
- › Smart energy management
  - monitor if energy use is according to plan
  - detect origins of energy waste
- › Setback function
- › Sliding temperature

### Control

- › Individual control (2,560 groups)
- › Schedule setting (Weekly schedule, yearly calender, seasonal schedule)
- › Interlock control
- › Setpoint limitation
- › Temperature limit

### WAGO Interface

- › Modular integration of 3rd party equipment
  - WAGO coupler (interface between WAGO and Modbus)
  - Di module
  - Do module
  - Ai module
  - Thermistor module

### Connectable to

- DX Split, Sky Air, VRV
- Chillers (with Microtech controller)
- Daikin AHU
- Fan coils
- Daikin Altherma Flex type
- LT and HT hydroboxes
- Air curtains
- WAGO I/O
- BACnet protocol

# Integration of RA, Sky Air, VRV, Daikin Altherma Flex and AHU in BMS or home automation systems

## RTD-RA

- › Modbus interface for monitoring and control of residential indoor units

## RTD-NET

- › Modbus interface for monitoring and control of Sky Air, VRV, VAM and VKM

## RTD-10

- › Advanced integration into BMS of Sky Air, VRV, VAM and VKM through either:
  - Modbus
  - Voltage (0-10V)
  - Resistance
- › Duty/standby function for server rooms

## RTD-LT

- › Modbus interface for monitoring and control of Daikin Altherma low temperature (EHVH(X)-C / EHBH(X)-C)
- › Voltage and resistance control
- › Photovoltaic operation signal for energy saving

## RTD-20

- › Advanced control of Sky Air, VRV, VAM/VKM and air curtains
- › Clone or independent zone control
- › Increased comfort with integration of CO<sub>2</sub> sensor for fresh air volume control
- › Save on running costs via
  - pre/post and trade mode
  - set point limitation
  - overall shut down
  - PIR sensor for adaptive deadband

## RTD-HO

- › Modbus interface for monitoring and control of Sky Air, VRV, VAM and VKM
- › Intelligent hotel room controller

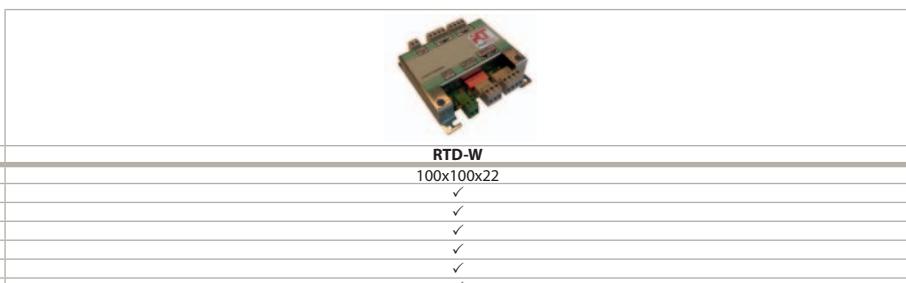

## RTD-W

- › Modbus interface for monitoring and control of Daikin Altherma Flex Type, VRV HT hydrobox and small inverter chiller

### Integrate chillers, fan coils units and air handling units in BMS systems via modbus protocol

### Integrate Refrigeration units in BMS systems via modbus protocol

\* For all connectable indoor units and Biddle air curtains please refer to the Conveni-pack page in this catalogue

### Integrate VRV in BMS via modbus protocol using F1 F2

Expected in 2014

# Integration of Split, Sky Air and VRV in HA/BMS systems

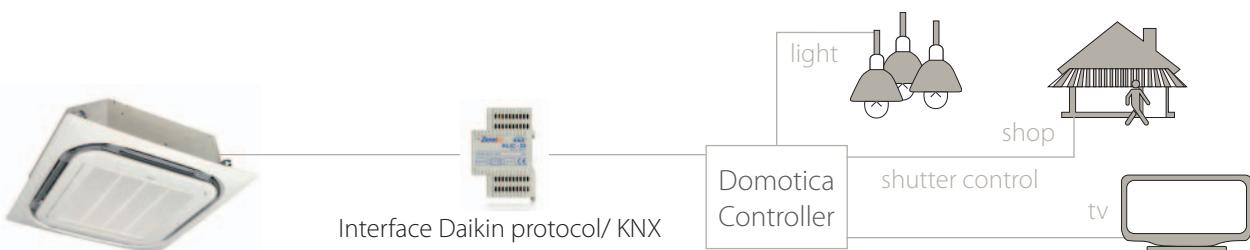

Connect split indoor units to KNX interface for Home Automation system

Concept

Connect Sky Air / VRV indoor units to KNX interface for BMS integration

Concept

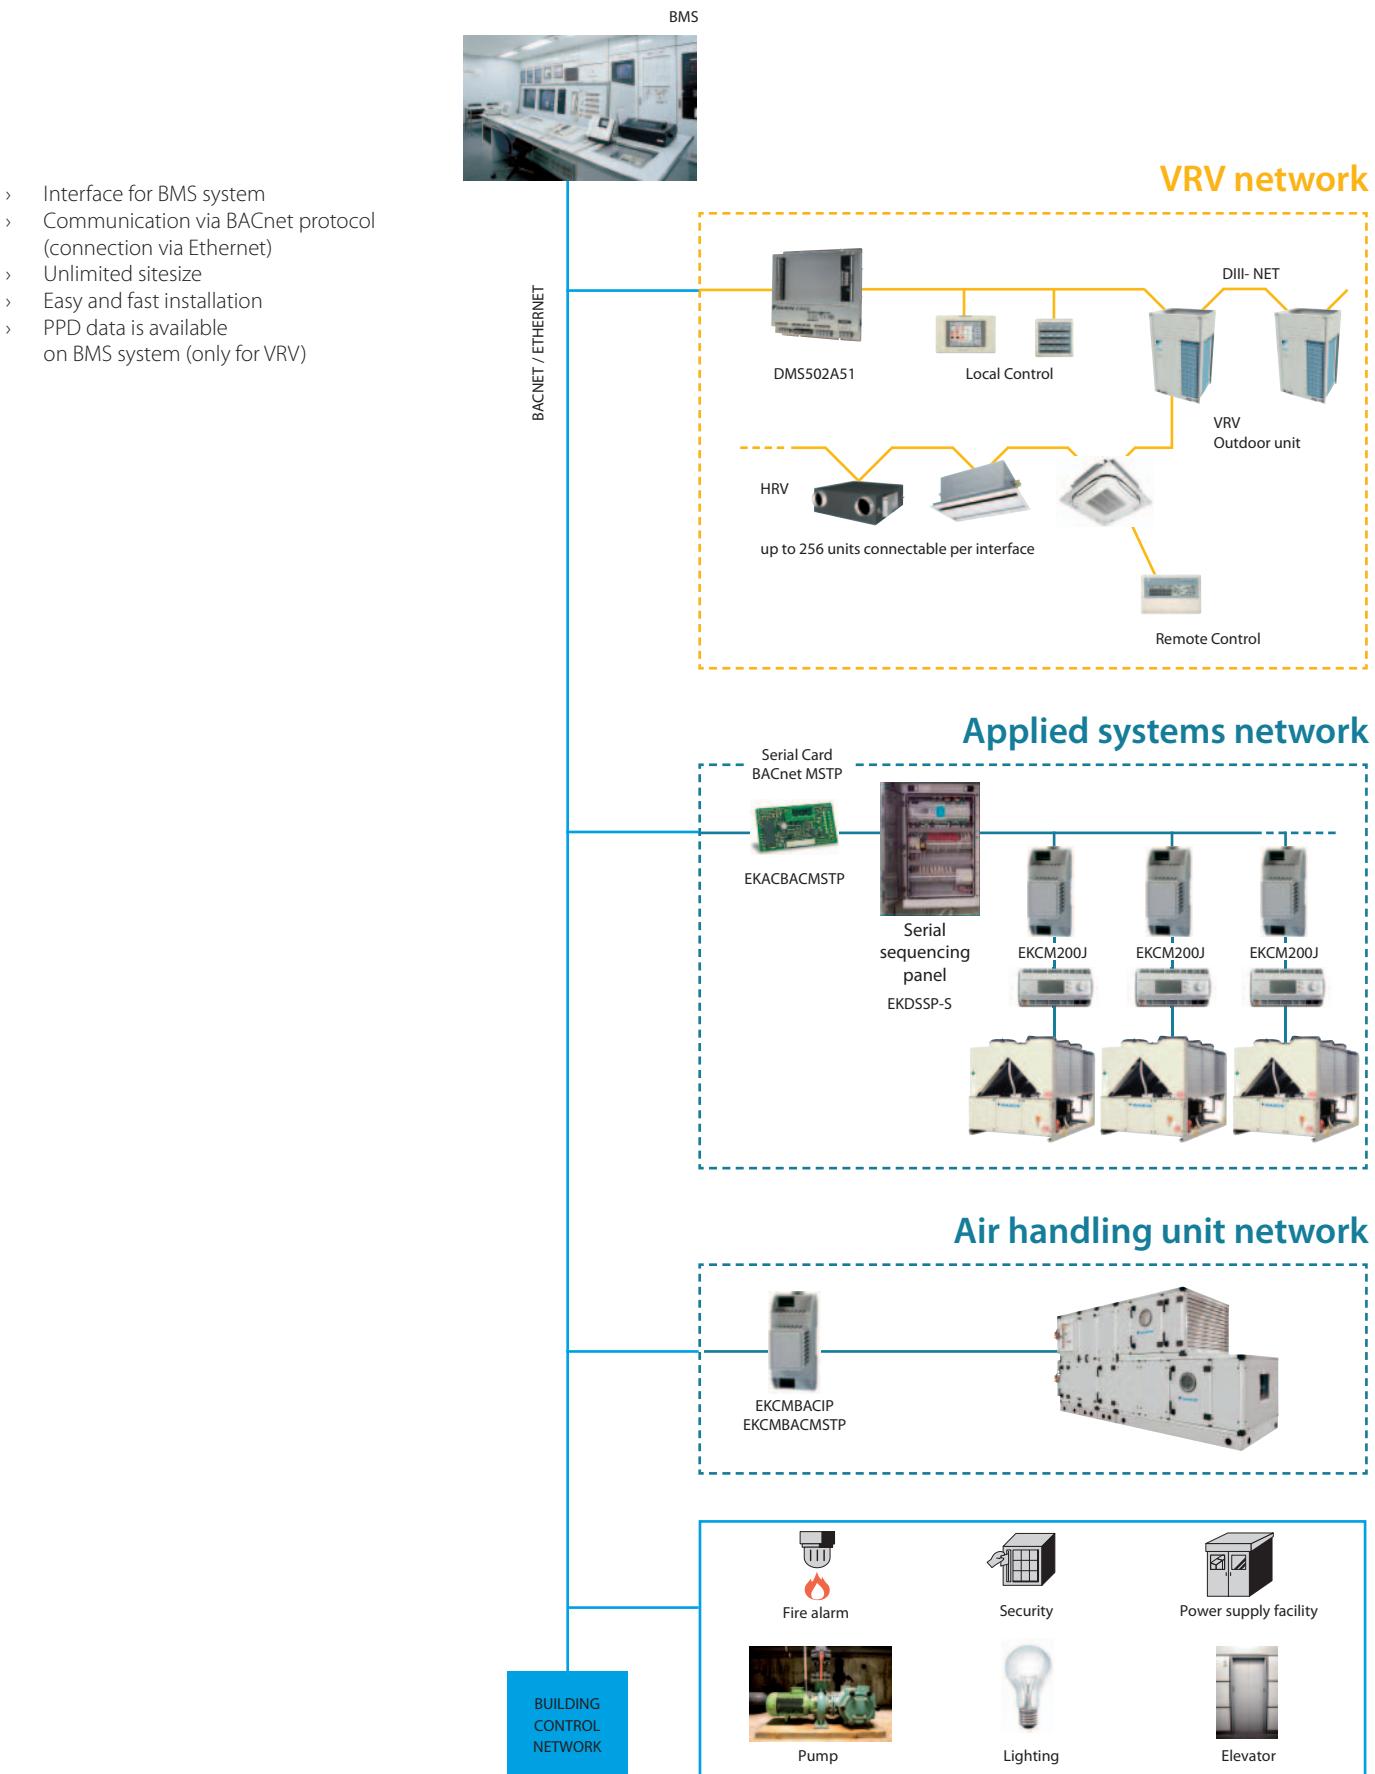

## KNX interface line-up

The integration of Daikin indoor units through the KNX interface allows monitoring and control of several devices, such as lights and shutters, from one central controller. One particularly important feature is the ability to programme a 'scenario' - such as "Home leave" - in which the end-user selects a range of commands to be executed simultaneously once the scenario is selected. For instance in "Home leave", the air conditioner is off, the lights are turned off, the shutters are closed and the alarm is on.

## KNX interface for

Integrated control system for **seamless connection** between VRV, applied Systems, air handling units and BMS systems

# Open network integration

of VRV and applied systems monitoring and control functions into LonWorks networks

- > Interface for Lon connection to LonWorks networks
- > Communication via Lon protocol (twisted pair wire)
- > Unlimited sitesize
- > Quick and easy installation

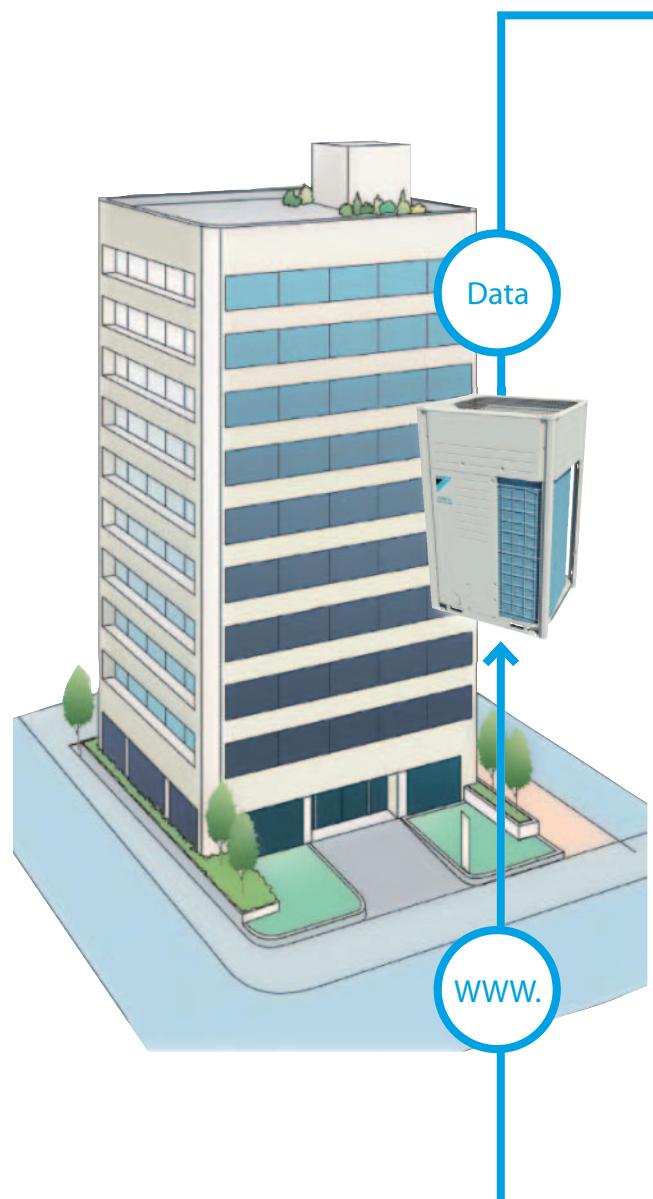

## Air Conditioning Network Service System (ACNSS)

The challenge of your technical management is safeguarding in the long term optimal operation of your air conditioning system without incurring huge costs along the way. Daikin's Air Conditioning Network Service System improves the effectiveness of your management.

The network service system is a link via the internet, between the air conditioning system and Daikin's Remote Monitoring Centre. In so doing, expert service engineers monitor the operating status of the entire system nonstop all through the year. The 'ACNSS monitoring service' prevents troubles and prolongs the life of your equipment.

Thanks to the prediction of malfunctions and the technical advise following from data analysis, you not only maximise equipment availability, but also control cost without sacrificing comfort levels.

Daikin's ACNSS is also supported by the optional 'ACNSS energy saving service' as energy use is one of the largest operating expenses of any business. This service enables you to optimise on power consumption without failing to keep the customer's amenity.

## ACNSS monitoring service

## ACNSS energy saving service

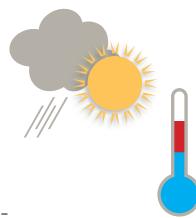

### COMFORT MAINTAINED

#### 1 Data transmission

Air conditioners's running information and other necessary data are collected and compiled, and sent to the centre. Advance failure forecasts and monitoring data for accidental problems are transmitted.

**OPTION:**  
energy-saving control determination

Weather information

Operating information is analyzed, and the optimum energy-saving control settings are calculated according to weather data for the region.

#### 2 Daikin Remote Monitoring Centre

Daikin's control implemented

#### 3 data analysis & system monitoring

Reporting data is reviewed and system is monitored 24/7 for any occurrences.

**Intelligent Controller**

**Intelligent Manager**

# Daikin Configurator Software

## Simplified commissioning: graphical interface to configure, commission and upload system settings

### Simplified commissioning

The Daikin configurator for Daikin Altherma and VRV is an advanced software solution that allows for easy system configuration and commissioning:

- › Less time is required on the roof configuring the outdoor unit
- › Multiple systems at different sites can be managed in exactly the same way, thus offering simplified commissioning for key accounts
- › Initial settings on the outdoor unit can be easily retrieved

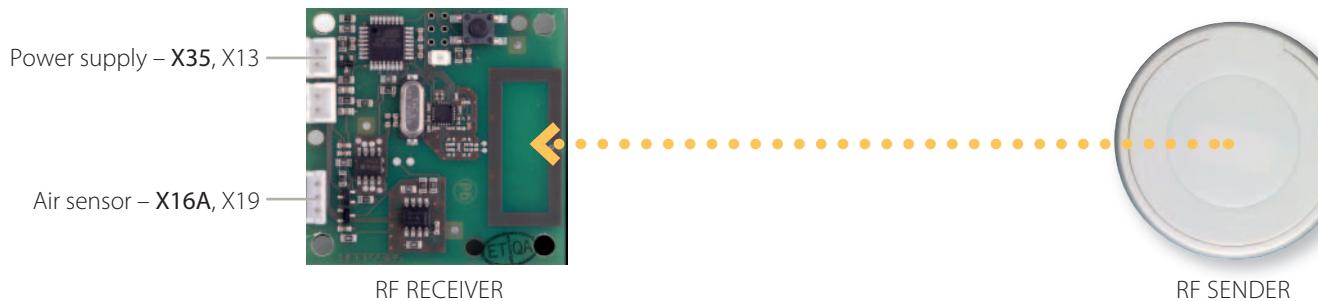

# Flexible and easy installation

- › Accurate temperature measurement thanks to flexible placement of the sensor
- › No need for wiring
- › No need to drill holes
- › Ideal for refurbishment

## Connection diagram Daikin indoor unit PCB (FXSQ-P example)

	KRP928* Interface adapter for DIII-net	<ul style="list-style-type: none"><li>Allows integration of split units to Daikin central controls</li></ul>
	KRP413* Wiring adapter normal open contact / normal open pulse contact	<ul style="list-style-type: none"><li>Switch off auto restart after power failure</li><li>Indication of operation mode / error</li><li>Remotely start /stop</li><li>Remotely change operation mode</li><li>Remotely change fan speed</li></ul>
	KRP980* Adapter for split units without an S21 port	<ul style="list-style-type: none"><li>Connect a wired remote control</li><li>Connect to Daikin central controls</li><li>Allow external contact</li></ul>

## Concept and benefits

- Low cost option to satisfy simple control requirements
- Deployed on single or multiple units

# OPTION LISTS

---

Split	378
Sky Air	380
VRV outdoor	384
VRV indoor	386
Ventilation and hot water	390
Chillers	392
Fan coil units	398
Air handling units	400
Refrigeration	402
Control Systems	403
Heating	404

# Options & accessories - Split

Options PCB for external electrical heater, humidifier and/or hour meter		-						-			
Option PCB for group control (NIM03)		-						-			

Notes

- (1) Installation box for adapter PCB is necessary
- (2) Interface adapter for Sky Air series (DTA112B51) is necessary
- (3) Including following languages: English, German, French, Italian, Spanish, Dutch, Greek, Russian, Turkish, Portuguese, Polish
- (4) Including following languages: English, German, Czech, Croatian, Hungarian, Romanian, Slovenian, Bulgarian, Slovak, Serbian, Albanian.
- (5) Option not available in combination with BYCQ140\*G
- (6) Installation box for adapter PCB (KRP1B101) is necessary
- (7) Electrical heater, humidifier and hour meter are field supply. These parts should not be installed inside the equipment.
- (8) Sensing function is not available
- (9) Independently controllable flaps function is not available

INDOOR UNITS	FCQHG71F	FCQHG100F	FCQHG125F	FCQHG140F	FCQG35F	FCQG50F	FCQG60F	FCQG71F	FCQG100F	FCQG125F	FCQG140F

Sealing member of air discharge outlet		KDBHQ55B140 (4)						KDBHQ55B140 (4)			
Decoration panel		BYCQ140D + BYCQ140DW(1) + BYCQ140DG (2)(3)						BYCQ140D + BYCQ140DW(1) + BYCQ140DG (2)(3)			
Decoration panel + infrared remote control		-						-			
Fresh air intake kit (direct installation type)		KDDQ55B140-1 (4)+ KDDQ55B140-2 (6)						KDDQ55B140-1 (4)+ KDDQ55B140-2 (6)			
Panel spacer		-						-			
Sensor kit		BRYQ140A (5)						BRYQ140A (5)			

Notes

- (1) The BYCQ140DW has white insulations. Be informed that dirt is more visible on white insulation and that it is consequently not advised to install the BYCQ140DW decoration panel in environments exposed to concentrations of dirt.
- (2) To be able to control the BYCQ140DG, the controller BRC1E\* is needed
- (3) The BYCQ140DG is only compatible with Sky Air RZQ(G), RZQS(G); All VRV outdoors; Split RKS, RXS
- (4) Option not available in combination with BYCQ140DG
- (5) Sensor kit can only be operated with BRC1E52A/B
- (6) BYFQ60B2 = basic, BYFQ60CW = White , BYFQ60CS = Grey
- (7) BRYQ60AW = White, BRYQ60AS = Grey
- (8) Both parts of the fresh air intake kit are needed for each unit.

<b>Multi-module connection kit (obligatory)</b> - Connects multiple modules into a single refrigerant system	-	-	-	-	BHFQ22P1007	BHFQ22P1517	-	-
<b>Extended level difference kit</b> - Allows outdoor unit to be more than 50m above indoor units	-	-	-	-	-	-	-	-
<b>Central drain pan kit</b> - Installs onto the underside of the outdoor unit and collects drain water from all bottom plate outlets into a single outlet. In cold areas should be heated by a field-supplied heater to prevent drain water from freezing in the drain pan.	-	-	-	-	-	-	-	-
<b>Heater tape kit</b> - Optional electrical heater to guarantee trouble-free operation in extremely cold and humid climates	EKBPH012T* + EKBPHPCBT*	EKBPH020T* + EKBPHPCBT*	EKBPH012T* + EKBPHPCBT*	EKBPH020T* + EKBPHPCBT*	-	-	EKBPH012T* + EKBPHPCBT*	EKBPH020T* + EKBPHPCBT*
<b>External control adapter for outdoor unit</b> - Allows to activate Low Noise Operation and three levels of Demand Limiting via external dry contacts. Connects to the F1/F2 communication line and requires power supply from an indoor unit*, BSVQ box, or VRV-WIII outdoor unit.	For installation into an indoor unit: exact adapter type depends on type of indoor unit. See Options & Accessories of indoor units						-	-
<b>BHGP26A1</b> - Digital pressure gauge kit – displays current condensing and evaporating pressures in the system as standard, or expansion valve positions and temperature sensor data in a special service mode. Connect to the outdoor unit PCB, for installation in the outdoor unit.	✓	✓	✓	✓	1 kit per system	1 kit per system	✓	✓
<b>KRC19-26A</b> - Mechanical cool/heat selector – allows to switch an entire Heat Pump system, or one BS-box of a Heat Recovery system between cooling, heating and fan only. Connects to the A-B-C terminals of the outdoor unit / BS-box.	✓	✓	✓	✓	✓	✓	✓	✓
<b>BRP2A81</b> - Cool/heat selector PCB (required for VRV IV)	✓	✓	✓	✓	✓	✓	✓	✓
<b>KKSA26A560*</b> - Cool/heat selector PCB mounting plate (only required when cool/heat selector PCB and Heater tape kit are combined)	✓	✓	✓	✓	✓	✓	✓	✓
<b>KJB111A</b> - Installation box for remote cool/heat selector KRC19-26A	✓	✓	✓	✓	✓	✓	✓	✓
<b>EKPCCAB1</b> - VRV configurator	✓	✓	✓	✓	✓	✓	✓	✓
<b>BPMKS967B2B/B3B</b> - Branch provider (for connection of 2/3 RA indoor units)	✓	✓	-	-	-	-	✓	✓
<b>KKPJ5F180</b> - Central drain plug	-	-	-	-	-	-	-	-
<b>DTA104A61/62*</b> - Demand PCB allowing external input to limit power consumption	✓	✓	✓	✓	✓	✓	✓	✓
<b>KKS82B61*</b> - Demand PCB mounted plate. Needed to mount Demand PCB for some outdoor units.	-	✓	-	✓	-	-	-	✓

Notes

- (1) Cool/heat selector required for operation
- (2) Do not connect the system to DIII-net devices (Intelligent controller, Intelligent Manager, LonWorks interface, BACnet interface...).
- (3) Installation box KRP1BA101 needed.
- (4) Fixing plate EKMPVAM additionally needed for VAM150-2000FB.
- (5) 3rd party heater and 3rd party humidifier cannot be combined
- (6) For external control and monitoring (ON/OFF control, operation signal, error indication)

VH ELECTRICAL HEATER FOR VAM	
Supply voltage	220/250V ac 50/60 Hz. +/-10%
Output current (maximum)	19A at 40°C (ambient)
Temperature sensor	5k ohms at 25°C (table 502 1T)
Temperature control range	0 to 40°C / (0-10V 0-100%)
Run on timer	Adjustable from 1 to 2 minutes (factory set at 1.5 minutes)
Control fuse	20 X5 mm 250 m A
LED indicators	Power ON - Yellow Heater ON - Red (solid or flashing, indicating pulsed control) Airflow fault - Red
Mounting holes	98mm X 181mm centres 5 mm ø holes
Maximum ambient adjacent to terminal box	35°C (during operation)
Auto high temp. cutout	100°C Pre-set
Man. reset high temp. cutout	125°C Pre-set
Run relay	1A 120V AC or 1A 24V DC
BMS setpoint input	0-10VDC

(1) Option 08 includes option 29 - (2) Option 99(a) includes 'Fan overload protection' - (3) Piping between the inertial tank and the unit is not included. Electric heater power supply has to be provided from external source - (4) The order of soft starter will have an impact on the delivery time: please contact the factory - (5) Unit performance will be affected; contact factory for information. It is mandatory to order the option 26 when selecting CU-Ni 90-10 condenser tubes - (6) Sound proof system - compressor enclosure - (7) Compressor enclosure - (8) Soundproof cabinet will be supplied in a separate kit and not assembled. For better performance the cabinet will be integral kind (around the whole chiller, not only around compressors). Cabinet assembly is not included in the supply. (9) Special transport is required (flat rack truck and open top when option 01 is selected) for model sizes as follows: EWWDC12i-SS - EWWDC18i-SS

(10) Forklift loading-unloading operations are not allowed when option 01 is selected for model sizes as follows: EWWDC121-SS - EWWDC181-SS - (11) Special Transport is required (flat rack truck and open top) for model sizes as follows: EWLDCL101-SS - EWLDCL171-SS or EWWQC11B-SS - EWWQC20B-SS or EWWQC10B-XS, EWWQC12B-XS - EWLC101-SS - EWLDCL171-SS or EWWQC11B-SS - EWWQC20B-SS or EWWQC10B-XS, EWWQC12B-XS - EWWQC21B-XS - (12) Forklift loading-unloading operations are not allowed for model sizes as follows: EWLDCL101-SS - EWLDCL171-SS or EWWQC11B-SS - EWWQC20B-SS or EWWQC10B-XS, EWWQC12B-XS - EWWQC21B-XS - (13) F = Contact the factory - STD = Standard - SO = Specify at Order entry - NC = No additional cost

Demand PCB	EKRPIAHTA
Remote user interface	EKRUAHTB
Individual billing - connection kit	EKMBl1
Back up heater kit	EKBUHAA6V3
Back up heater kit	EKBUHAA6W1

## **Daikin Altherma high temperature split**

Bottom plate heater	EKBPTH16A
Digital I/O PCB	EKRP1HBAA
Demand PCB	EKRPIAHTA
Remote user interface	EKRUAHTB
Back up heater for HT	EKBUHAA6V3
Back up heater for HT	EKBUHAA6W1
Refrigerant stop valves	EKRSHVTA
UK tank kit	EKUHWHTA
Compatibility kit 1	EKMKT1A
Compatibility kit 2	EKMKT2A

Tanks	EKHWS	EKHWP	EKHTS
Wall bracket	EKWBSSWW150		
Connection kit EKHWP300 for low temperature (heating only / heating and cooling)	EKDVCPLT3HX		
Connection kit EKHWP500 for low temperature (heating only)	EKDVCPLT5H		
Connection kit EKHWP500 for low temperature (heating and cooling)	EKDVCPLT5X		
Connection kit for high temperature and VRV indoor HXHD125 (EKHWP300/EKHWP500)	EKEPHT3H / EKEPHT5H		
Connection kit for Daikin Altherma Flex Type (heating only)	EKEPHT3H		
Connection kit for Daikin Altherma Flex Type (heating and cooling)	EKEPHT3H + 156034		
3 way valve	3-W-UV2		
Booster heater with melting fuse (900mm)	EKBH3S		
Option kit (EKHTS / EKHTS)			EKFMALTA / EKUHWHTA
Heat pump convector			
Valve kit	EVKHPC		
Solar collectors			
Mounting kit on roof (antracite)	EKSRCAP		
Mounting kit on roof (red)	EKSRCRP		
Mounting kit on roof (excl. Roof tile)	EKSRCP		
Gravity brake	16 50 70		
Flow sensor	FLS12		
Flow regulating valve with flow rate indicator	FLG		
Connection set for additional heat source	EWS		
Hot water recirculation kit	ZKL		
Thermostatic antiscald mixing valve + 1" screw connection set	VTA32 + 156016		
Solar Expansion vessel 12l	MAGS12		
Solar Expansion vessel 25l	MAGS25		
Solar Expansion vessel 35l	MAGS35		
Pressureless Connection piping between solar panel & pump station: 15 meter	CON 15		
Pressureless Connection piping between solar panel & pump station: 20 meter	CON 20		
Unpressurised elongation pipe 2.5 m including couplings	CON X 25		
Unpressurised elongation pipe 5 m including couplings	CON X 50		
Unpressurised elongation pipe 10 m including couplings	CON X 100		
Unpressurised elongation for inlet pipe 8 meter	CON XV 80		
Pressure solar pipe DN16 - 15m	CON15P16		
Connectors DN16	CONXP16		
Pressure solar pipe DN20 - 15m	CON15P20		
Connectors DN20	CONXP20		
Connectors DN20	CON CP16		
Connectors DN20	CON CP20		
Mounting kit IN-ROOF	RCIP		
Mounting kit FLAT ROOF	RCFP		
Additional roof breakthrough for opposite side connection	CON FE		
Connection kit between 2 solar panels	FIX VBP		
Connection kit between 2 rows of Collectors	CON RVP		
Connection kit between 2 rows of Collectors	CON LCP		
Mounting support for V26P	FIX MP 130		
Mounting support for H26P	FIX MP 200		
Mounting support for V21P	FIX MP 100		
Supporting shell for pressureless connection pipe	TS		
Standard mounting set for on-roof mounting suitable for roof tiles	FIX AD		
Variable height mounting set for on-roof mounting suitable for roof tiles	FIX ADP		
Mounting set for on-roof mounting	FIX ADD		
Mounting set for on-roof mounting suitable for flat tiles e.g. shingles	FIX ADS		
Mounting set for on-roof mounting suitable for corrugated plates	FIX - WD		
Mounting set for on-roof mounting suitable for metal roofs	FIX BD		
Basic IN ROOF installation kit for 2 EKS21P	IBV21P		
Extension IN ROOF installation kit for 1 additional EKS21P	IEV21P		
Basic IN ROOF installation kit for 2 EKS26P	IBV26P		
Extension IN ROOF installation kit for 1 additional EKS26P	IEV26P		
IN ROOF covering slate complementing kit	FIX-IES		
Basic FLAT ROOF support frame for 2 EKS26P	FB V26P		
Extension FLAT ROOF support frame for additional EKS26P	FE V26P		
Basic FLAT ROOF support frame for 1 EKSH26P	FB H26P		
Extension FLAT ROOF support frame for additional EKSH26P	FE H26P		
Release tool	FIX LP		
Glycol fluid 20 l	GFL		

# POWER SUPPLY

T1 = 3~, 220V, 50Hz

V1 = 1~, 220-240V, 50Hz

VE = 1~, 220-240V/220V, 50Hz/60Hz\*

V3 = 1~, 230V, 50Hz

VM = 1~, 220~240V/220~230V, 50Hz/60Hz

W1 = 3N~, 400V, 50Hz

Y1 = 3~, 400V, 50Hz

\* For VE power supply only 1~, 220-240V, 50Hz data is displayed in this catalogue.

# MEASURING CONDITIONS

## AIR CONDITIONING

1) nominal cooling capacities are based on:	
Indoor temperature	27°CDB/19°CWB
Outdoor temperature	35°CDB
Refrigerant piping length	7.5m - 8/5m VRV
Level difference	0m
2) nominal heating capacities are based on:	
Indoor temperature	20°CDB
Outdoor temperature	7°CDB/6°CWB
Refrigerant piping length	7.5m - 8/5m VRV
Level difference	0m

## APPLIED SYSTEMS

Air cooled	Cooling only	Evaporator: 12°C/7°C	Ambient: 35°CDB
	Heat pump	Evaporator: 12°C/7°C Condenser: 40°C/45°C	Ambient: 35°C Ambient: 7°CDB/6°CWB
Water cooled	Cooling only	Evaporator: 12°C/7°C Condenser: 30°C/35°C	
	Heating only	Evaporator: 12°C/7°C Condenser: 40°C/45°C	
Condenserless chiller		Evaporator: 12°C/7°C Condensing temperature: 45°C / liquid temperature: 40°C	
Fan coil units	Cooling	Room temperature: 27°CDB / 19°CWB Water inlet/outlet temperature: 7°C/12°C	
	Heating	Room temperature: 20°C 2 pipe: Water inlet temperature: 50°C (same water flow as in cooling mode) 4 pipe: Water inlet/outlet temperature: 70°C/60°C	

The sound pressure level is measured via a microphone at a certain distance from the unit. It is a relative value, depending on the distance and acoustic environment (for measuring conditions: please refer to the technical databooks).

The sound power level is an absolute value indicating the "power" which a sound source generates.

For more detailed information please consult our technical databooks.

Daikin Altherma hybrid heat pump

# The natural combination

Heat pump and gas condensing boiler in one,  
the best of two technologies!

The Daikin Altherma hybrid heat pump is the ideal solution for the replacement of a gas boiler. Depending on the outdoor temperature, energy prices and the internal heat load, the Daikin Altherma hybrid heat pump smartly chooses between the heat pump and/or the gas boiler, always selecting the most economical mode to operate.
