

Thermia Online

Online

**Control your heat pump remotely
no matter where you are**

With the Thermia Online accessory, you can control and monitor your heat pump from any smartphone, computer or tablet, wherever you are in the world. For example, you can lower the temperature when you are on holiday, and increase it for when you come back. If you come home earlier than expected; no problem – using Online, you can easily ensure that your house is warm and comfortable whenever you need it to be.

At any time of day, you can use Online to check that your heating system is working properly and what temperature your home is at. If anything unexpected comes up and needs to be fixed, you – or your installation engineer, where agreed – will immediately receive this information via Online. You can also control and monitor several locations if you need to; for example, if you have a holiday cottage with a heat pump or have relatives who need assistance.

Thermia Online connects the heat pump to your existing home broadband. If there is no internet connection available, it is possible to connect using a mobile 3G/4G modem (provided by your local mobile service provider). The Online app is available for both Android and iPhone.

Thermia Online

Feature summary

Total security

- ✓ Monitor the heat pump whenever you want to
- ✓ Alarm function – if a problem occurs, you will automatically receive a notification
- ✓ All data is stored on an external server – if your computer or mobile becomes unavailable, you can log in from any other device
- ✓ Option to control and monitor several locations, for example, if you have a holiday cottage, or relatives who need assistance

Complete control

- ✓ Control the heat pump remotely, wherever you are in the world
- ✓ Option to change temperatures and operating parameters
- ✓ Calendar function – allow Online to lower the temperature when you are away
- ✓ The event log lets you view the activity history

How it works:

Thermia Online is connected to your heat pump through the internet. If you already have an internet connection, your Thermia dealer can connect the heat pump directly. This means that there are no additional ongoing costs for the data traffic. If you do not already have an internet connection (e.g. in a summer cottage), we recommend acquiring an external 3G/4G modem from your local provider.

As all data sent from the heat pump is stored on an external server, you can access Online at any time – log in from any smartphone, computer or tablet, no matter where you are in the world.

Download the app for Thermia Online from the App Store (iPhone) or from Google Play (Android). The system works on all heat pump models in Thermia's current domestic range, as well as Thermia Solid.
