# Midea CAC

Midea CAC is a key division of the Midea Group, a leading producer of consumer appliances and provider of heating, ventilation and air conditioning solutions. Midea CAC has continued with the tradition of innovation upon which it was founded, and emerged as a global leader in the HVAC industry. A strong drive for advancement has created a groundbreaking R&D department that has placed Midea CAC at the forefront of a competitive field. Through these independent efforts and joint cooperation with other global enterprises, Midea has supplied thousands of innovative solutions to customers worldwide.

There are three production bases: Shunde, Chongqing and Hefei.

MCAC Shunde: 38 product lines focusing on VRF, Split Products, Heat Pump Water Heaters, and AHU/FCU.

MCAC Chongqing: 14 product lines focusing on Water Cooled Centrifugal/Screw/Scroll Chillers, Air Cooled Screw/Scroll Chillers, and AHU/FCU.

MCAC Hefei: 11 product lines focusing on VRF, Chillers, and Heat Pump Water Heaters.

[Midea Company  
Introduction](#)

[Midea CAC  
Introduction](#)

- 2016 » Strategic alliance between Midea and Italy's Clivet
- 2015 » JV with Carrier in China in chiller field, launched the unitary all DC inverter type Aqua Mini Chiller
- 2014 » Launched the DC Inverter Fan Coil Units
- 2013 » Launched the super high efficiency centrifugal chiller with full falling film technology
- 2012 » Formed Midea-Carrier JV Company in India and HK
- 2010 » Built the 3rd manufacturing base in Hefei
- 2009 » Launched the unitary fixed type Aqua Mini Chiller
- 2008 » Launched the split digital type Aqua Mini Chiller
- 2006 » Launched the first VSD centrifugal chiller
- 2004 » Acquired MGRE entered the chiller industry
- 2001 » Cooperated with Copeland to develop the digital scroll VRF system
- 2000 » Developed the first inverter VRF with Toshiba
- 1999 » Entered the CAC field

Technology Inspires Possibilities

Aqua Mini Chiller

Aqua Mini Chiller

## Aqua Mini Chiller

Midea DC Inverter Air-cooled Mini Chiller has unitary structure design and hydraulic module is built in the outdoor unit. It is air-cooled water heat pump chiller so there is no need of cooling water tower at the condensing side.

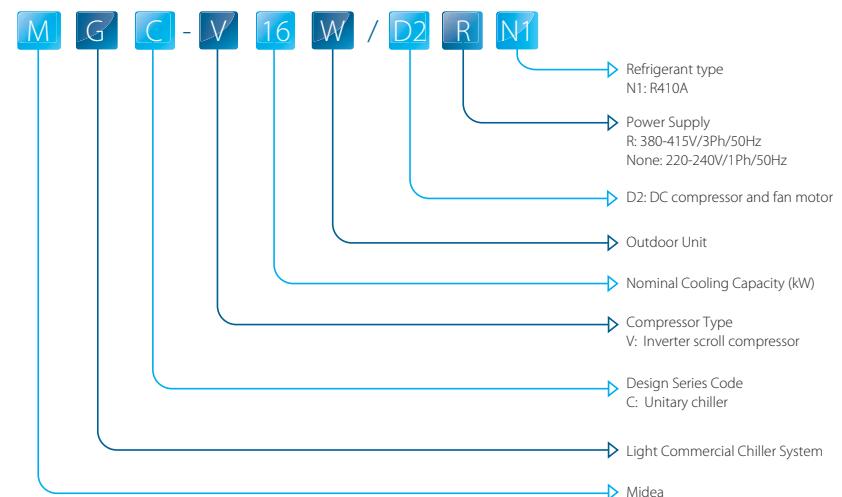

DC inverter Mini chillers' cooling capacity range is from 5kW to 18kW and it can freely combine with fan coil units and floor heating. These units are designed for residential applications or light commercial applications that require cold or hot water.

They are silent and compact units, easy to install and maintain. All units' energy efficiency at part load is A+ rated. Their high energy efficiency and high reliability ensure low running cost. So they are widely applied in apartments, villas, small business office buildings as well as restaurants, etc.

## Aqua Mini Chiller

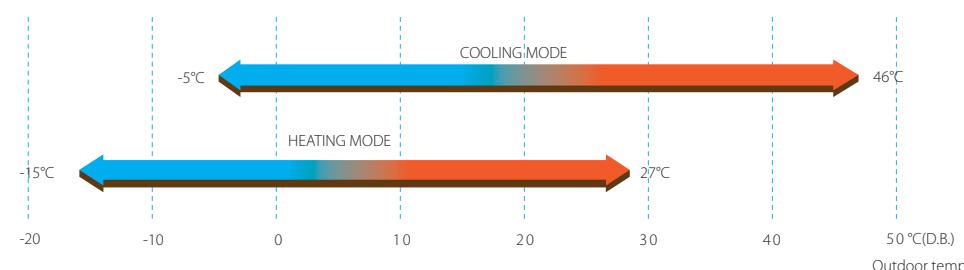

# Features

### Wide application range ➤

- ❖ Nine models with cooling capacities from 5kW to 18kW and heating capacities from 5.5kW to 18.5kW.
- ❖ Multiple power supply options.
- ❖ Freely combine with fan coil units and floor coils. Home owners may choose the best types according to their design taste (for interior) or functional needs.

### Wide operation temperature range

- ❖ Wide range of outlet water temperature  
The water outlet temperature is 4-55°C.

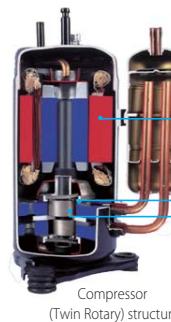

### A+ rated energy efficiency at part load ➤

The DC inverter chiller integrates the latest technological innovations and ensures precise temperature regulation and highly efficient energy usage, making a significant contribution to the limiting the impact on the environment.

### DC inverter compressor

Twin rotary DC inverter compressor is used. The output of the outdoor unit can be adjusted precisely according to the energy demanded.

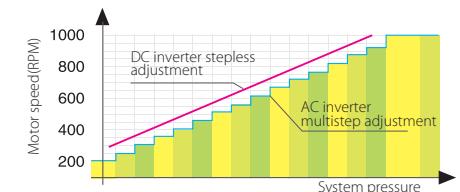

- High efficiency DC motor:
  - Creative motor core design
  - High density neodymium magnet
  - Concentrated type stator
  - Wider operating frequency range

- Better balance and Extremely Low Vibration:
  - Twin eccentric cams
  - 2 balance weights

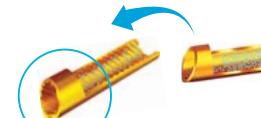

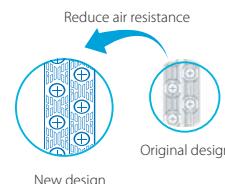

- Highly Stable Moving Parts:
  - Optimal material matching rollers and vanes
  - Optimize compressor drive technology
  - Highly robust bearings
  - Compact structure

### DC fan motor

High efficiency DC fan motor saved power up to 50%.

### High performance heat exchanger

High efficiency inner-threaded pipe, enhance heat transfer.

Hydrophilic fins + inner-threaded pipes

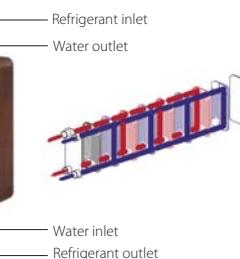

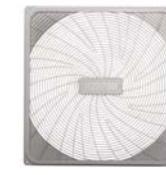

The new designed window fins enlarge the heat-exchanging area, decrease the air resistance, save more power and enhance heat exchange performance.

Hydrophilic film fins and inner-threaded copper pipes optimize heat exchange efficiency.

The specially coated blue fins enhance durability and protect against corrosion from air, water and other corrosive agents, assures a longer coil service life.

## Advanced technology »

- ❖ DC inverter technology, optimally designed fan shape and air discharge grille ensure low sound values.

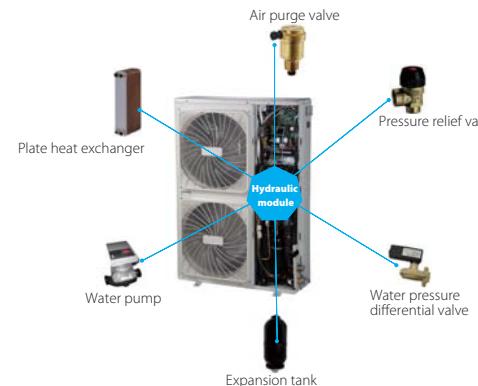

❖ EXV is used for stable and accurate gas flow control.  
❖ High efficiency plate heat exchanger  
Plate heat exchanger uses metal plates to transfer heat between refrigerant and water. The fluids are exposed to a much larger surface area because the fluids spread out over the plates, so both heat transfer efficiency and heat exchanger speed are greatly improved.  
Multi protections including voltage protection, current protection, anti-freezing protection and water flow protection ensure system safety running.

- ❖ High efficiency water pump

The water pump used is compliance with Erp directive, which is A degrade efficiency standard.

## Easy installation »

- ❖ Compact structure design and leak-tight refrigerant circuit save you much installation labor.
- ❖ The chillers are equipped with a hydronic module integrated into the unit chassis, limiting the installation to straight-forward operations like connection of the power supply, the water supply and the air distribution FCUs.
- ❖ The units are equipped with axial fans so they can be installed directly outdoors.

## Easy control »

- ❖ Remote ON/OFF and remote cool/heat functions.

- ❖ Controller built-in in unit panel used to perform all related operations as the user interface as well as fast diagnosis of possible incidents and their history.

- ON/OFF & Mode selection
- Temperature adjust
- Timer setting
- Fast diagnosis

- ❖ Optional wired controller for easy operation.

- Touch key operation
- LCD displays operation parameters
- Multiple timers
- Real-time clock

Note: When the wired controller is connected, the built-in controller is only for display, check and diagnosis functions.

# Specifications

## DC Inverter Air-cooled Chiller Aqua Tempo Super II Series

The Aqua Tempo Super II Series is Midea's latest DC inverter air-cooled chiller. Its compact design and excellent performance make it suitable for a wide range of applications. There are two models (MC-SU30-RN1L and MC-SU60-RN1L) both of which can operate in cooling mode with ambient temperatures of up to 52°C and with outlet water temperature as low as 0°C. The water flow switch and wired controller are both built-in, making installation more convenient. A hydraulic module with water pump and expansion tank can be added as a customization option to meet special installation situation requirements.

- ❖ High Efficiency
- ❖ Wide Application Range
- ❖ Advanced Technology
- ❖ Enhanced Comfort
- ❖ Easy Control
- ❖ Easy Installation and Service

## Nomenclature

## Product lineup

Model	MC-SU30-RN1L	MC-SU60-RN1L
Appearance		
Power supply		380-415V/3Ph/50Hz

## High Efficiency

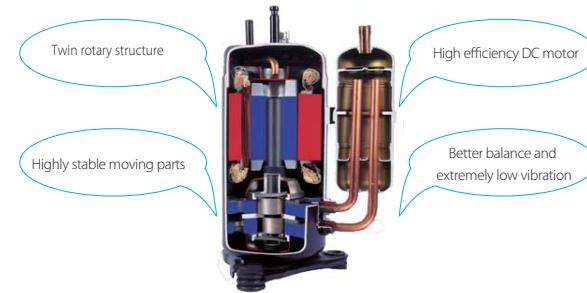

### A++ rated energy efficiency »

The Aqua Tempo Super II Series DC inverter air-cooled chillers are compliant with the EU's Energy-Related Products Directive (2009/125/EC) and both have A++ seasonal space heating energy efficiency ratings.

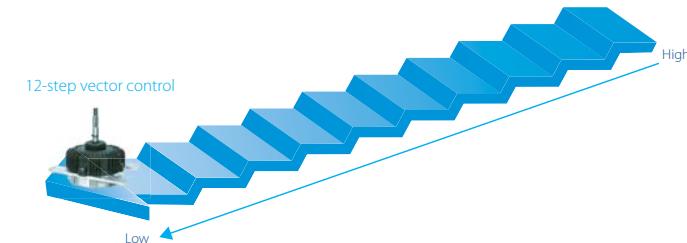

### Compressor »

At the heart of the chiller lies a world-leading DC inverter twin rotary compressor. The compressor's innovative design and numerous high performance features reduce power consumption by 25%.

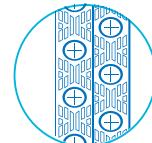

### DC fan motors »

Fan speed is controlled according to the system pressure and system load, reducing power consumption by 30%.

## High performance heat exchanger »

Large inner grooved copper tube and hydrophilic aluminum fins greatly improve air side heat exchange efficiency.

New design, reduces air resistance

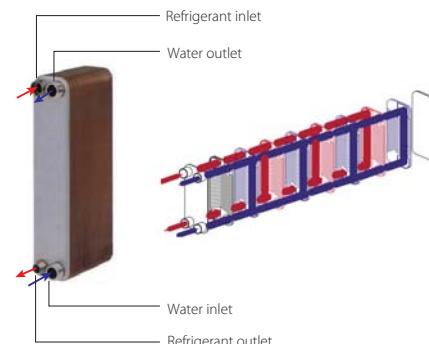

High efficiency inner grooved tube,  
enhances heat transfer.

Hydrophilic aluminum fins + inner grooved tubes

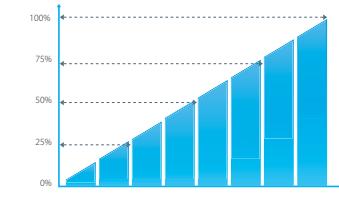

## High efficiency plate heat exchanger »

Water side heat exchanger uses multiple metal plates to achieve efficient heat transfer between refrigerant and water.

## Precisely flow control »

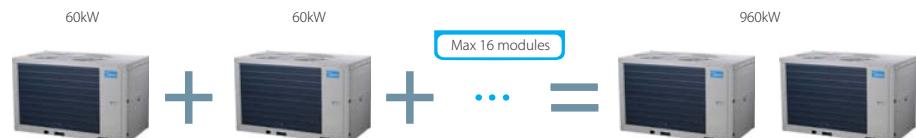

Patented liquid distribution components maximize performance and minimize impact of defrosting operation. 480-step EXV with capillary tube allows stable and accurate gas flow control. Fast response results in higher efficiency and improved reliability.

# Wide Application Range

## Flexibility »

Modular design allows up to 16 units to be connected together, giving a system cooling/heating capacity range of 30kW to 960kW.

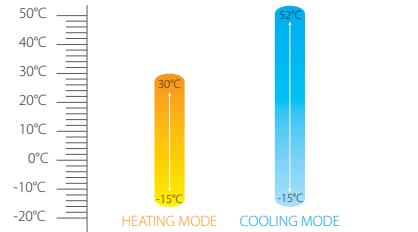

Compatible with fan coil units and air handling units.

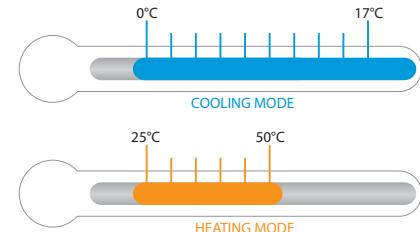

## Ambient temperature »

Stable operation even under extreme conditions: -15°C to 52°C.

## Outlet water temperature »

Wide outlet water temperature range with lowest outlet temperature in cooling mode of 0°C.

# Advanced Technology

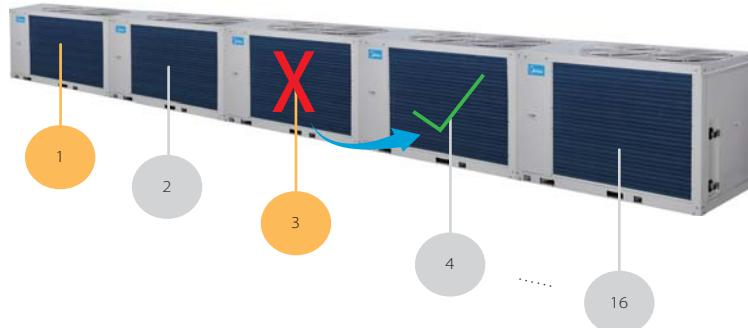

## Duty cycling »

Duty cycling equalizes the running time of the outdoor units in a multiple-unit system, significantly extending compressor lifespan.

## Back up »

In a multi-unit system, if one module fails, the other modules provide backup so that the system can continue operating.

## Integrated inverter module board »

Integrated inverter module board combines inverter module, three-phase bridge rectifier, capacitors and thermistors, greatly simplifying wiring connections and current loop and increasing control system stability.

## Highly-reliable MCU »

Fast, highly-reliable 144-pin Renesas Electronics MCU combines communication and control functions on one chip.

## Red LED display »

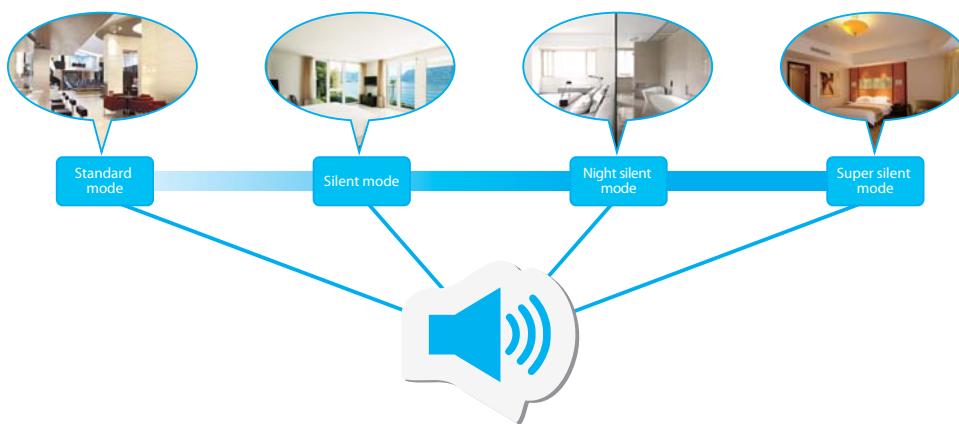

Red LED display is easy to read even in bright sunshine.

# Enhanced Comfort

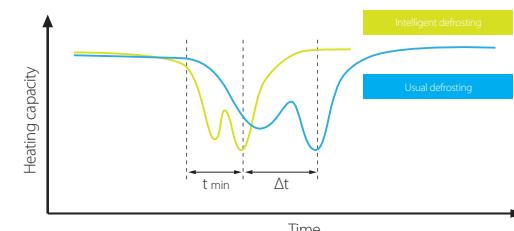

## Multiple silent modes »

Three different silent modes enable noise reduction to suit time of day and ambient noise levels.

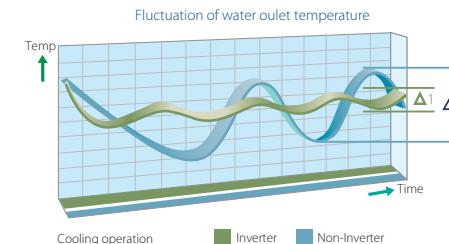

## Intelligent defrosting technology »

The intelligent defrosting program calculates the time required for defrosting according to the actual system status, eliminating heat losses from unnecessary defrosting. A specialized defrosting valve reduces time required for defrosting to as little as four minutes.

## Rapid cooling or heating »

The DC inverter compressor reaches full capacity rapidly, providing quicker cooling or heating with lower levels of temperature fluctuation during the cooling/heating operation.

# Easy Control

## Easy control »

Touch key wired controller as standard.

## Additional control »

ON/OFF, Cool/Heat and Alarm ports on chiller PCBs allow switches to be connected to enable additional remote control functionality.

Note: When the additional control functionality is added, the ON/OFF control and mode selection functionality of the wired controller is disabled.

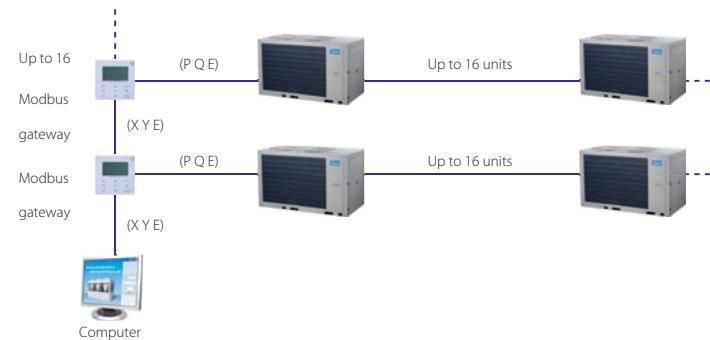

## Three user levels »

Three different user levels ensure users can easily access control functions and allow engineers convenient access to operating parameters.

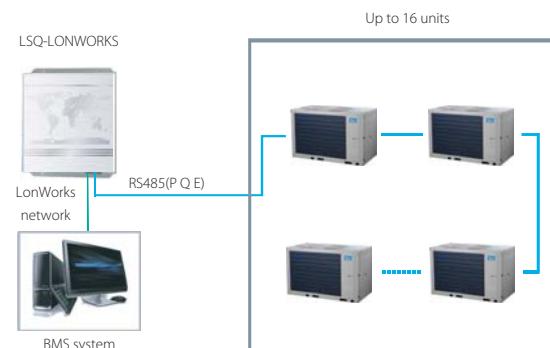

## Modbus gateway (customization option) »

Modbus gateway functionality can be added by adding X, Y, E ports to the wired controller. Up to 16 wired controllers can be connected together, with each controller controlling up to 16 units.

## LonWorks gateway (customization option) »

LonWorks gateway acts as an interface to a building management system.

## Easy Installation and Service

### Built-in hydraulic module (customization option) »

Option1:  
Built-in water circulating pump

Option2:  
Built-in water circulating pump and  
100L expansion tank

**Notes:**  
1. Option1 pump head 19m on MC-SU30-RN1L and 15m on MC-SU60-RN1L.  
2. Option2 is only available on MC-SU30-RN1L.

### Built in water flow switch »

Built-in water flow switch reduces installation time and reduces costs.

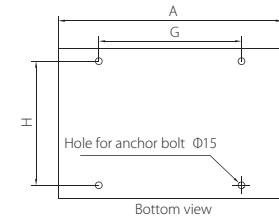

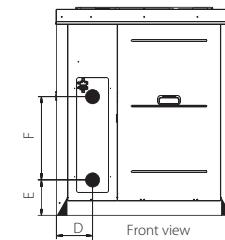

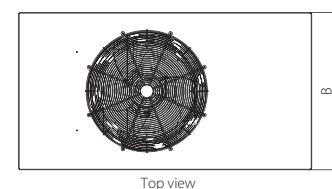

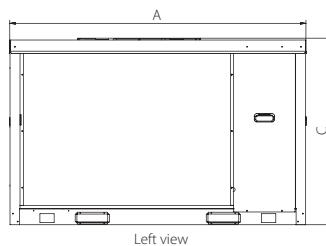

### Built-in wired controller »

Built-in wired controller in the electric control box saves installation space and time.

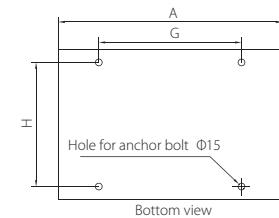

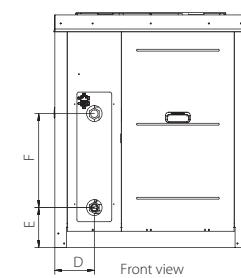

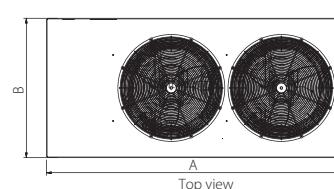

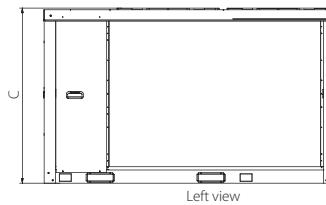

KJRM-120H/BMWKO-E

4. With water outlet temperatures lower than 5°C antifreeze must be added.
5. Capacity and efficiency data calculated in accordance with EN14511.

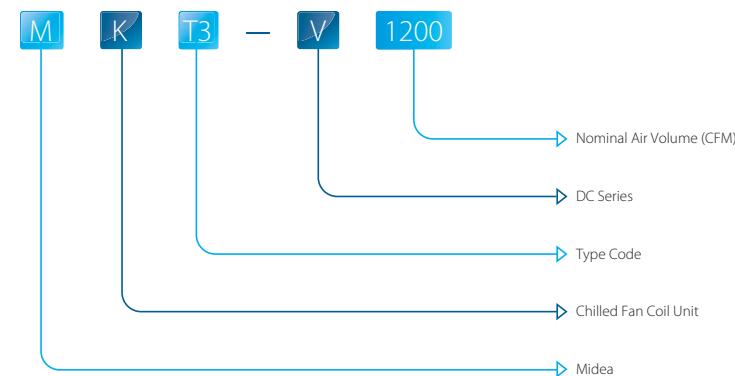

## DC Fan Coil Units

Midea DC Fan Coil Units operate in high efficiency and low sound level due to the DC brushless fan motor.

It contains cassette units, ceiling & floor units with or without cabinet, wall-mounted units and duct units. The air volume ranges from 150CFM to 1500CFM. It is a highly versatile product suitable for hospitals, office buildings, hotels, airports and various other applications.

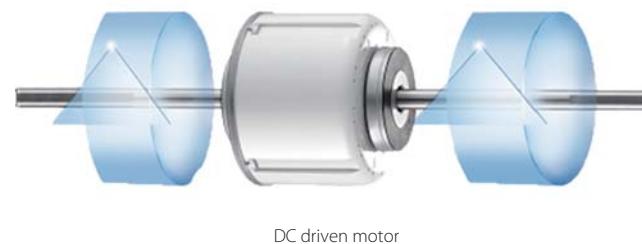

### Nomenclature

# Advantage of Fan Coil Units with DC Brushless Fan Motor

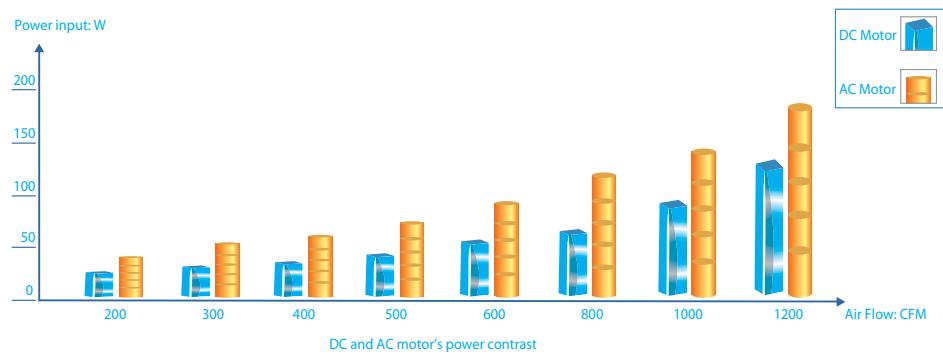

The DC fan coil units are the new energy saving products improved with advanced DC driven technology. The DC fan coil units have advanced technology of high energy efficiency, low noise operation and precision temperature control, so are ideal for hospitals, office building, hotels, airports and various other applications.

DC driven motor

## Energy Efficiency, Comply with CE Regulation »

The power consumption of DC driven fan coil units can be reduced up to 30% in comparison to corresponding AC type.

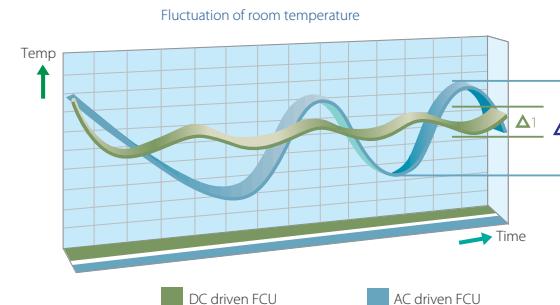

## Quiet Operation »

Unit noise is 2-5dB(A) lower compared to an AC motor fan coil unit, creating a quiet living environment.

## Constant Level of Air Temperature and Humidity »

The DC Inverter fan motor adjusts of air flow based on thermal load instantly providing less temperature fluctuation and an improved living environment.

## Versatile Selection »

Midea DC Fan Coil Units contain cassette units, ceiling & floor units with or without cabinet, wall-mounted units and duct units. The air volume ranges from 150CFM to 1500CFM. It is a highly versatile product suitable for hospitals, office buildings, hotels, airports and various other applications.

Compact 4-way cassette																		
Duct																		
Wall mounted																		
Ceiling & floor																		

## 4-Pipe FCUs

Air volume (CFM)		200	300	400	500	600	750	800		850	950	1000	1200	1500			
4-way cassette																	
Compact 4-way cassette																	

Note:

The standard power supply for all fan coil units is 220V-240V/50Hz; 208-230V/60Hz can be customized for some series fan coil units. For further information, please contact with our salesmen.

# Cassette Series

## 4-way Cassette

## Compact 4-way Cassette

## Various Selections »

- Versions for 2/4 pipe system.
- Versions for compact/normal size.

## Stylish Panel with Large Airflow Outlet »

- 4-way air supply panel is standard for 4-way cassette.
- 360° air supply panel is standard for compact 4-way cassette.

## 4-way panel

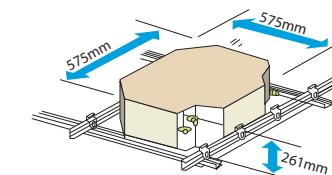

## 360°panel

## Compact Design, Easy Installation »

- For Compact Four-way Cassette: Extremely compact casing suits any room's decor and requires little space for installation on a low ceiling. Due to compact body and light weight, all models can be installed without a hoist.

## High Efficiency and Low Sound Operation »

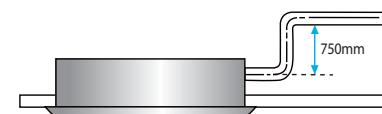

- Thanks to the DC brushless fan motor, the unit operates in high efficiency and low sound level.

## Various Accessories Selections »

- Safe factory-installed electric heater is optional.
- Extended drainage pan for better ceiling protection is optional.

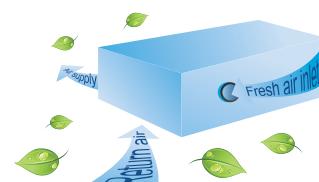

## High-lift Drain Pump »

- Standard built-in drain pump with 750mm pump head for normal size and 500mm for compact size.

## Fresh Air Intake »

- Fresh air can enter through the cassette unit so you can enjoy even fresher air in a room.

3:Heating mode (2) : (2-pipe coil): entering air temperature 20°C DB, enter water teperature/water flow 50 C °(same water flow as in standard rating condition in cooling).

(4-pipe coil): entering air temperature 20°C DB, entering/leaving water temperature 70/60°C, high fan speed.

# Duct Series

2-Pipe Duct

## Various Selections »

- Versions for normal/high temperature different systems.
- 2, 3 or 4 row coils for 2-pipe system, and 3 row coils for 4-pipe system.
- Large range of available static pressure.

## High Efficiency and Low Sound Operation »

- Due to the DC brushless fan motor, the unit operates in high efficiency and low sound level.

## Flexible Installation »

- Left and right hand piping connections are optional, flexible installation.

## Standard Return Air Plenum and Filter »

- Standard return air plenum and filter guarantees clean air supply and stable air flow rate.

## Fresh Air Intake »

- Fresh air can enter through the duct unit so you can enjoy even fresher air in the room.

# Wall Mounted Series

**S Type**

## Wall Mounted (S Type)

### Stylish Panel »

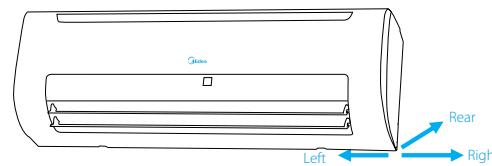

- Stylish front panel blends easily within any interior décor, ideal for use in shops, restaurants or offices with no or narrow false ceilings.

### High Efficiency and Low Sound Operation »

- Due to the DC brushless fan motor, the unit operates in high efficiency and low sound level.

### Convenient Installation »

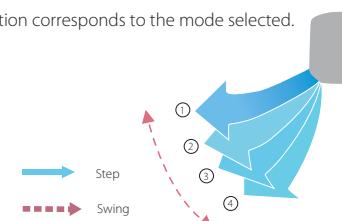

- Multi-directional outlet pipe feature: left\right\rear, to meet the needs of different rooms.

### Built-In 3-Way Electromagnetic Valve »

### Auto Swing Louver »

- The Auto Swing Louver function ensures that the air direction corresponds to the mode selected.

### Easy Maintenance »

- Removable front panel making maintenance convenient.

Based on Eurovent conditions:

H:High fan speed; M: Medium fan speed; L: Low fan speed.

1:Cooling mode (2 and 4-pipe coil); entering air temperature 27°C DB/19°C WB, entering/leaving water temperature 7°C /12°C, high fan speed.

2:Heating mode (1) : 2-pipe coil; entering air temperature 20°C DB, entering/leaving water temperature 45/40°C, high fan speed.

3:Heating mode (2) : (2-pipe coil); entering air temperature 20°C DB, enter water teperature/water flow 50 C /\*(same water flow as in standard rating condition in cooling)

## Ceiling & Floor Series

### High Efficiency and Low Sound Operation »

- Due to the DC brushless fan motor, the unit operates in high efficiency and low sound level.

### Flexible Installation »

- Cabinet and concealed versions meet various installation requirements.
- Horizontal or vertical installation.

Floor installation

Ceiling installation

### Flexible Air Return Type »

- Air return can be from side or bottom.

# Accessories

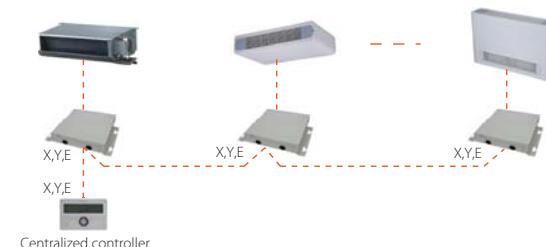

## PC Board Control Kit for FCU »

- ❖ Available for all non-PCB FCUs.
- ❖ Flexible installation, it can be attached to the unit, mounted on a wall or hung under a ceiling.
- ❖ External installation making maintenance more convenient.
- ❖ Functions: Three fan speeds control, Water pump control, Long-distance ON/OFF control, ALARM function, Electric heater control.
- ❖ Operating status can be displayed by wired controller lamp indicator.
- ❖ Centralized control function.
- ❖ BMS control function through Modbus protocol.

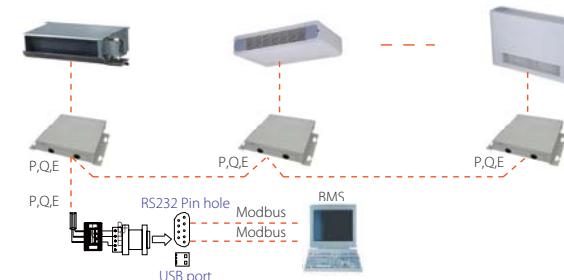

**PC Board Control Kit**

## Centralized control

## BMS control function through Modbus protocol

## Specifications

Model		CE-FCUKZ-03	CE-FCUKZ-04
Applicable appliance		2-pipe FCUs	4-pipe FCUs
Power supply	V-Ph-Hz		220~240-1-50/60
Operation range	Room temp.	°C	17-30
	Inlet water temp.	°C	3-75
Temp. controlling precision		°C	±1
Net dimension	WxHxD	mm	296x66x212
Packing size	WxHxD	mm	410x115x262
Net weight		kg	1.4
Gross weight		kg	2.5

## Valve Kit &gt;&gt;

- ❖ Working Voltage: AC230±10%, 50/60Hz(24V can be customized).
- ❖ Power Consumption: 4W
- ❖ Nominal Pressure: 1.6MPa.
- ❖ Applied Medium: Cold or hot water, 50% glycol water liquor.
- ❖ Medium Temperature: 2-15°C(DDSTF-01), -20-1°C(DDSTF-04/05).
- ❖ Environment Temperature: -5-50°C(DDSTF-01), 0-50°C(DDSTF-04/05).

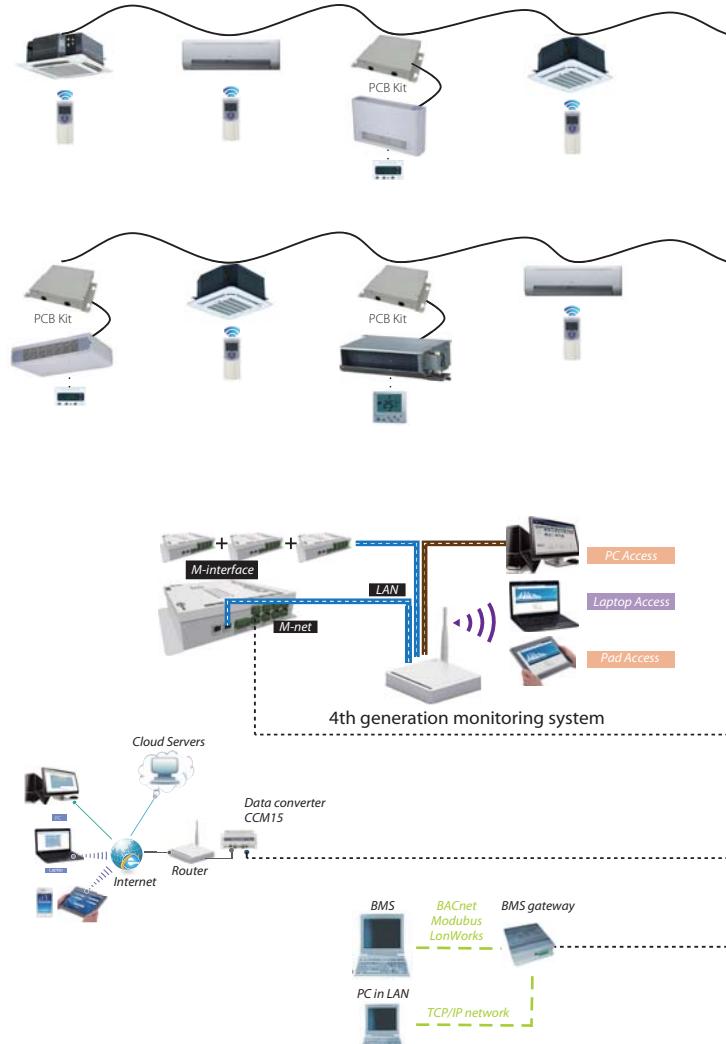

DDSTF-01

DDSTF-04  
DDSTF-05

Model	DN(mm)	Inner Screw Thread	Applicable Appliance
DDSTF-01	20	3/4"	2-pipe cassette/duct/floor standing, 4-pipe duct
DDSTF-04	15	1/2"	4-pipe cassette (for hot water)
DDSTF-05	20	3/4"	2-pipe ceiling & floor, 4-pipe cassette (for cold water)

Note:  
DDSTF-\* is the model of valve. The valve kit includes valve, actuator and connecting pipe. For different model of units, the models of valve kit are different.

# Application of Central Control & BMS Control

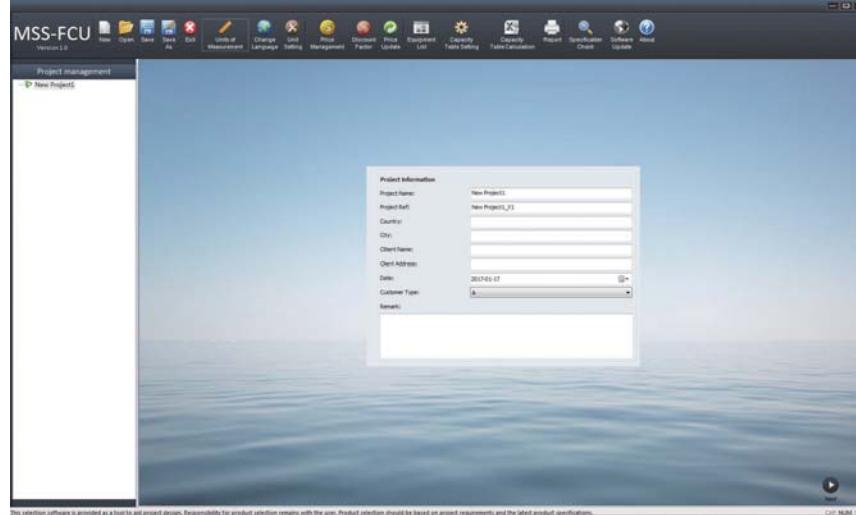

## Note:

If cassette type units connect to centralized controller or BMS, PCB of the unit should be customized.

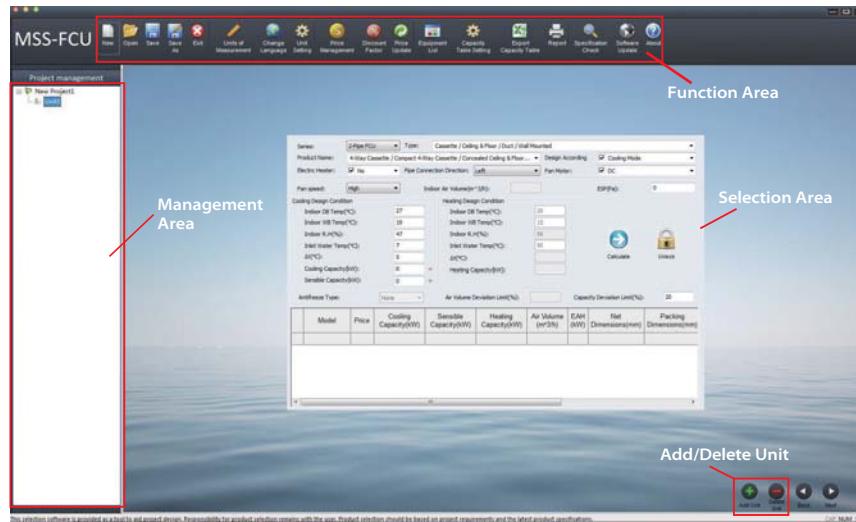

# Selection Software

## Features >>

- ❖ Select by entering air and water conditions as well as fan speed.
- ❖ Easy to operate interface and visual display.
- ❖ Powerful project management function.

## Main Interface >>

## Selection Interface >>

This selection software is provided as a tool for aid project design. Requirements for product selection remains with the user. Product selection should be based on project requirements and the latest product specifications.

## Report Data Interface >>

This selection software is provided as a tool for aid project design. Requirements for product selection remains with the user. Product selection should be based on project requirements and the latest product specifications.
